

Using CoreFTP Lite 2.1

1. If the Site Manager does not open immediately, go to Sites–Site Manager
2. Click on 'New Site'

At 'Site name', enter relevant name

At 'Host/IP/URL', enter **wegener.uoa.abdn.ac.uk**

At 'Username', enter userid provided

At 'Password', enter password used to access secure site

The following settings should be set automatically:

Port 21, Timeout 60 Retries 2 Connection FTP

3. Select **Connect** to connect to FTP server.

The left hand window lists files on your PC, the right hand window lists files on FTP server.
Select relevant files and use arrow keys in window to transfer

4. Select **Close** to save the site
5. Once the Site has been created, you quickly re-connect by going to File-Connect
