CONFERENCE ANNOUNCEMENT AND CALL FOR PAPERS

The Economic and Social Implications of Health and Safety at Work

Università Cattolica, Milan, 2 – 3 July 2010

KEYNOTE SPEAKERS

Harvey M. Brenner

University of North Texas and Berlin University of Technology

Maarten M. Lindeboom

Free University of Amsterdam

The aim of the conference is to provide a better understanding of the economic implications of health at work, bringing together the contributions of different disciplines: economics, sociology, occupational health and epidemiology. Indicative areas for submission may include *the relationship between health and working conditions; the economic costs of adverse work-related health conditions; the impact of work-related health and the social and economic value of improvement of health at work on factors such as injury rates, absenteeism and quits; compensation for adverse working conditions; research on data and indicators for health and safety, absenteeism and accidents at work.*

SUBMISSION AND REGISTRATION

Contributors should submit a full draft paper in PDF format by 30 March 2010, to Ioannis Theodossiou (theod@abdn.ac.uk) and Claudio Lucifora (claudio.lucifora@unicatt.it). Decisions on acceptance will be announced by 30th April 2010. Papers to be considered for selection must be delivered in finalised form at the conference, with the full text submitted by 1 August 2010. Participation fee (meetings, access to papers, lunches and conference dinner): £150 (£80 for PhD students). Please use the following payment and registration facility at <http://www.abdn.ac.uk/haw/>.

The project 'An Inquiry into the Health and Safety at Work; a European Union Perspective' (HEALTH at WORK) is a Coordination and Support Action (Supporting) project financed by the European Commission, FP7, (Grant Agreement: no.: 200716). It brings together some thirty European researchers working on issues related to health and safety at work in the European Union.
