Configuring Android 4.x for wireless connectivity
Slavomir Sekerka. February 2012 (Reviewed August 2014).

The screenshots in this guide were taken from an HTC Desire HD running Android 4.0.3. Other phone models may display different menus, options and icons.

To check your Android version, go to Settings > About the phone > Software information.

Please read instructions carefully as the text on some screenshots may not be fully visible.

1. Settings Screen
2. Wireless & Networks
3. Wi-Fi menu

- Tap Settings
- Tap to the right of Wi-Fi to enable
- Wait until ON is displayed
- Tap Wi-Fi to enter Wi-Fi settings
- Select eduroam or resnet

4. Network settings

Scroll down until you see Identity, then enter the following:
- Identity: yourusername@abdn.ac.uk
- Anonymous identity: anonymous@abdn.ac.uk
- Password: your university password
- Click Connect
