

The Provisional Committee of the Aberdeen Working Men's Association congratulate their brethren throughout the country on the success which has already attended the establishment of such associations. The Committee feel convinced that no disinterested and unprejudiced person can read the addresses on "National Education, to the Canadians, to the Working Classes of Europe, and especially to the Poles," issued by the London Association, without acknowledging that they are calculated to do immense good, and contain a more able, upright, and straightforward exposition of the true principles and policy of government, than ever came from the pen of any of the University-clergy-taught-gentlemen legislators. We congratulate the Working Classes of Aberdeen on the appearance of a spirit of liberty being at length kindled up among them, which we hope, by the aid of increasing knowledge, and communication with "kindred spirits" throughout the country, and the presence of some leading Radicals, expected soon, will continue unextinguished, until every specious subterfuge be removed, which Whig or Tory may seek to interpose between the people and their just rights. That this may be speedily realized, is the sincere wish of the Aberdeen Working Men's Association.

JOHN FRASER, *Secretary.*

#### OBJECTS.

1. To draw into one bond of unity the intelligent and influential portion of the Working Classes in town and country.
2. To seek, by every means, to place all classes of society in possession of their equal, political, and social rights.
3. To devise every possible means, and to use every exertion to remove those cruel laws that prevent the free circulation of thought, through the medium of a *cheap* and *honest* press.
4. To promote, by all available means, the education of the rising generation, and the extirpation of those systems which tend to future slavery.
5. To collect every kind of information appertaining to the interests of the Working Classes in particular, and society in general, especially statistics regarding the wages of labour, the habits and condition of the labourer, and all those causes that mainly contribute to the present state of things.
