COURSE DESCRIPTION
How does the human mind relate to the world? This course introduces two major systems of thought from the history of philosophy that take different approaches to answering this question. Students will first learn about 17th century rationalism by focusing on Rene Descartes’ *Meditations on First Philosophy*. Through reading this text, students will learn about Descartes’ rationalist approach to knowledge and reality, including his method of doubt, his doctrine of the separation of mind and body, and his argument for the existence of God. We will then turn to David Hume’s *Enquiry Concerning Human Understanding* as a key text of 18th century empiricism. Students will learn how Hume criticized rationalism and turned to experience to provide a foundation for knowledge. We will look at Hume’s distinction between impressions and ideas, the problem of induction, his account of causality, and his critique of miracles. Throughout the course we will critically compare and examine Descartes’ and Hume’s texts and arguments by drawing on their readers and critics.

We also work on developing the skills of reading philosophical texts and writing philosophy essays. While especially useful for students on Philosophy degrees, these skills are beneficial for students in all disciplines.
