**ABERDEEN HOUSING MARKET TO 3RD QUARTER 2011
 KEY FACTS**

Change of constant-quality home prices in Aberdeen and surrounding areas

Table 1 shows changes in house prices in Aberdeen and Aberdeenshire to the third quarter of 2011. Growth rates are measured using constant-quality home price indices developed by the Centre for Real Estate Research at the University of Aberdeen. The note at the website, <http://www.abdn.ac.uk/business/cpr/>, explains how these indices are constructed. For comparison, Table 1 also reports the price growth rate for Scotland as a whole and the UK as measured by the Halifax constant-quality indices.

In the third quarter of 2011, house prices in Aberdeen fell by 1.2%. There was a decrease of 1.5% in Scotland overall while, over the same period, average prices rise by 0.1% in the UK as a whole. The annual change in prices is shown to be negative in Aberdeen, Scotland and UK as a whole. The last row of the table gives the annualised price growth of a five year holding period, where Aberdeen prices increased by 2.4% p.a., a large positive figure compared to the negative Scotland figure of 0.7% and the UK overall, which also recorded a negative figure.
