

Poster P038

10:30 - 11:10 (morning break, and on-demand), Screen no. 1

Measuring social engagement in rheumatic and musculoskeletal diseases (RMDs)

Despite being an important outcome for patients with RMDs, social engagement is rarely measured in studies or clinical practice. This study evaluates existing social engagement measures used in RMD populations, and what people with living with RMDs value in terms of social engagement, identifying the need for a new person-centred measure of social engagement.

Poster P184

16:10 - 16:50 (afternoon break, and on-demand), Screen no. 4

Geographical variations in delivery of intravenous treatments for ANCA-associated vasculitis

As part of the [VOICES](#) study, vasculitis service providers across the UK and Ireland identified timely access to cytotoxic and biologic therapy as a key service priority to improve care but there is significant variation in how services achieve this. We discuss some of the challenges and recommendations to improve access to intravenous treatment for vasculitis.

Workshop: Planning survey-based studies

13:10 – 13:55, Room 23

Planning survey-based studies

This workshop covers the intricacies of planning, execution and reporting a survey-based study, to improve its chances of publication and enhances its value to the scientific community at large. Hear from Dr Hollick about designing a survey, Dr Mohit Goyal on dissemination and ethics and Dr Latika Gupta on reporting of surveys and publication.

10:30 – 11:30 (morning break, and on demand), Screen no. 7

Janus Kinase Inhibitors – a retrospective study on side effects and discontinuation reasons

In light of drug safety warnings for Janus kinase inhibitors (JAKi), this poster looks at an evaluation of the occurrence of adverse events, and seeks to identify reasons for discontinuation of JAKi in clinical practice.

Talk / workshop

Poster presentation

Plenary session

Vasculitis SIG

07:45 – 08:45, Room 1a

A mixed method evaluation of vasculitis health services in the UK

Come and hear about the findings from the [VOICES](#) study, which for the first time provides evidence of how best to deliver effective services that will improve outcomes and experiences of care for people living with vasculitis.

Dr Rosemary Hollick

BSR Registers: The state of play

09:30 – 10:30, Room 11

AxSpA – retrospective & looking forward

A look back at output from the BSRBR-AS register and looking forward to future international collaboration.

Prof. Gareth T Jones

PsA – Looking forward

Initial data from the BSR-PsA register and plans for the future as we embark on data analysis.

Prof. Gareth T Jones

2024 Heberden Oration

11:10 – 12:10, Room 1a

Life is as much a pain as it ever was
