

## The 2023 Thackrah Lecture

### How can we support young people living with chronic pain as they transition from school to work?

09:00 – 09:45, Main Hall / Parallel 1

Outlining the current landscape of sources of support for young people with MSK pain, including potentially radical solutions to improve provision and access.

Dr Elaine Wainwright

Abstract O10

#### Designing a new questionnaire tool by comparing the literature to patient and stakeholder priorities

11:50 – 12:50, Parallel 2

The latest progress in Quantifying the Impact of Chronic pain on engagement with paid work (QUICK), a mixed methods study aimed at creating a new instrument capturing a range of work impacts for people with chronic pain.

Dr Elaine Wainwright

Abstract O17

#### Improving awareness and access to work resources for people with rheumatic and musculoskeletal conditions

13:50 – 14:50, Parallel 2

Insights from our study exploring awareness and use of work-related support services amongst people with RMDs, work resources provided by UK RMD charities, and identifying areas for improvement.

Dr Rosemary J Hollick

Abstract O14

#### Adapting the Canadian Making it Work™ programme for inflammatory and non-inflammatory conditions in a UK health and social care context

13:50 – 14:50, Parallel 2

An overview and update from the Making it Work™ - Scotland Study, adapting a Canadian work intervention for people with inflammatory arthritis to include non-inflammatory MSK conditions, and make it suitable for delivery in the UK.

Mr Stuart Anderson
