

NHS Grampian Charity Research Fund List

Enhancing healthcare together

NHS Grampian Charity holds over 200 dedicated funds for specific hospitals, wards, departments across Grampian, as well as specific medical conditions. Any member of NHS Grampian staff can apply for funds in alignment with the Charity's purpose and the Fund's purpose.

Funds are categorised under three broad themes:

+ Patient Wellbeing

These funds can be applied to for an activity or item which enhances the services of NHS Grampian, or anything which might make a patient's stay in hospital more comfortable or give more support to families and visitors.

+ Staff Wellbeing & Development

These funds can be applied to for activities which improve staff health and wellbeing and support learning and development. The purpose of these activities should lead to improvements in our services and the health and wellbeing of our patients. For example, activities that are targeted at an earlier return to work or an improvement in performance or service delivery, leading to increasing the effectiveness of NHS Grampian and creating a positive impact for our patients. Only current members of staff can be supported through charity funds.

+ Research

These funds can be applied to for a wide variety of research projects which seek to improve the health of Grampian patients.

Please ensure you have fully read and understood the charity's Fund Guidance before submitting an application.

An alphabetical list of all the NHS Grampian Charity research funds begins on the next page. Please click the fund name to be taken to more details about the fund, or scroll down to view all the charitable fund details.
