UNIVERSITY OF ABERDEEN

MEDICAL HUMANITIES

MEDICINE AND ECONOMICS

COURSE CODE: ME33ES

COURSE BOOKLET 2023 / 2024
I Course overview

Resources available for the provision and payment for health care are limited. However, knowledge of economics helps ensure that available resources are used in the most effective and efficient way possible. Economics allows more informed decision making about a variety of issues: choosing between alternative treatments; setting priorities between patients; choosing between alternative new technologies and organising the provision of health care.

This course provides an introduction to the application of economics to health care. It does not assume any prior knowledge of economics.

The course consists of 4 Units, covering the following areas:

1. **Background and basic economic concepts**: where we will introduce the key concepts of demand and supply along with the concept of the market and how these relate to health care

2. **Healthcare Systems**: where we will consider the challenges relating to health care financing and payment to providers. Specifically, we will introduce different ways for organising and financing health care systems, as well as methods of payment to service providers

3. **Economics of health behaviours**: will provide an explanation of why and how we should intervene in population health behaviours and the role of behavioural economics in developing health behaviour interventions; and

4. **Economic evaluation**: will provide an explanation of the rationale for, and main techniques of economic evaluation of health care interventions and their use for decision making.

Each teaching session will be of three hours duration. Each session consists of a mix of lecture, tutorial style, group work and practical exercises. With tutorial integrated within the sessions, *attendance is required* and monitored for class certificate requirements. Teaching will take place in Old Aberdeen. Due to the interactive nature of the sessions, there will be no recordings made of the live sessions. There will however be support material available in the form of short videos of the basic concepts covered within the sessions.

The course is examined through 2 multiple choice tests (worth 20% overall) and an essay of 1,800 words (worth 80%) on a topic bringing an economic way of thinking to some health care issue or problem. Each multiple choice test will consist of 11 questions giving a total of 22 which will convert directly to the (grade point) CAS mark for that portion of the course assessment. A list of the essay topics will be provided during the course. The essay is due to be submitted no later than **Friday, 1st December at 2pm**. Further details of the essay will follow including an essay guide and instructions for submission.

---

*Note we are aware of a timetable clash for one session for some students.*
II Learning outcomes

Knowledge and understanding
Through this course you should acquire a knowledge and understanding of:
• the key themes of economic theory as applied to health care
• the use of incentives within health care systems
• some of the main techniques of health care evaluation
• the rationale for intervening in health behaviours

Subject specific skills and concepts
Through this course you should be able to:
• critically appreciate the distinctive economic characteristics of health care and how this affects the demand for, and supply of, health care
• apply different health care evaluation techniques
• using behavioural economics to develop health behaviour interventions

Key (transferable) skills
Through this course you should demonstrate and further develop the following:
• intellectual skills for learning and understanding, defining issues, conducting analysis and reaching conclusions
• self management skills for independent study, including the use of time and self motivation
• oral and written communication

III Administration and teaching of the course

The course co-ordinator is Diane Skåtun who is based in the Health Economics Research Unit (HERU), Room 1.063, Polwarth Building, Foresterhill. If you have any questions regarding the course please contact Diane Skåtun by email: d.skatun@abdn.ac.uk

All the staff involved with the course are based at HERU which is part of the Institute of Applied Health Sciences (IAHS) within the School of Medicine, Medical Sciences and Nutrition (SMMSN). Please feel free to look up the Unit to see the variety of Health Economics Research that we undertake: http://www.abdn.ac.uk/heru.

The lecturers who will lead the live sessions will be

Diane Skåtun (DS): E-mail: d.skatun@abdn.ac.uk
Marjon van der Pol (MvP): E-mail: m.vanderpol@abdn.ac.uk
Mary Kilonzo (MK): E-mail: m.kilonzo@abdn.ac.uk

Course administrator support comes from Ryan Watson ryan.watson@abdn.ac.uk
IV  Timetable of delivery

The sessions are mainly on Monday afternoons BUT there is one on a Thursday morning. Don’t forget it! All sessions are at the Old Aberdeen campus. The 2 multiple choice questionnaires are included within the timetable as they will have timed, restricted access but they will not be taken in a set lecture/tutorial room.
