TOP THIS!

1. Print out the cards below and glue them on cardboard.
2. Cut out the cards.
3. Deal out all the cards.
4. Hold your cards in a face-up stack so that you can only see your first card and the other players cannot see your cards.
5. The oldest player begins.
6. Choose one attribute – for example size.
7. Everyone then reads out the value of that attribute on their first card and whoever has the highest or best value wins all the first cards, collects them and places them at the bottom of their stack.
8. Whoever won the cards then chooses any attribute to read from their next card.
9. Whoever eventually manages to collect all the cards wins the game.
10. Go to the Zoology Museum when it is open again and look at the different animals. Can you remember which ones were in the game?

Clownfish

- Weight: 1 (250g)
- Size: 1 (8–18cm)
- Age: 10
- Danger: 1
- Believability: 5

**FUN FACT:** All Clownfish are born males, the most dominant Clownfish in a group develops into a female later in life.

Anglerfish

- Weight: 3 (50,000g)
- Size: 2 (20–100cm)
- Age: 20
- Danger: 3
- Believability: 3

**FUN FACT:** Only the female Anglerfish has a “lamp” on her face.

Kelpie

- Weight: 4 (500,000g)
- Size: 3 (200–300cm)
- Age: 1,000
- Danger: 5
- Believability: 2

**FUN FACT:** Kelpies are mythical creatures that trap humans on their backs and drown them.

Seahorse

- Weight: 1 (200g)
- Size: 1 (2–35cm)
- Age: 3
- Danger: 2
- Believability: 5

**FUN FACT:** The male seahorse is the one who gets pregnant and bears the children.

Dinoflagellates

- Weight: 1 (> 0g)
- Size: 1 (0.0005–0.2cm)
- Age: immortal
- Danger: 3
- Believability: 3

**FUN FACT:** Dinoflagellates are one-celled organisms living in the sea that produce light when moved.

Vampire Squid

- Weight: 1 (500g)
- Size: 1 (10–30cm)
- Age: 8
- Danger: 2
- Believability: 4

**FUN FACT:** The vampire Squid lives in deep waters. It is not dangerous to humans despite its name.

Selkie

- Weight: 4 (140,000g)
- Size: 3 (100–500cm)
- Age: 30
- Danger: 1
- Believability: 2

**FUN FACT:** Selkies are mythical creatures that can change their seal form into a human.
**Sunfish**
- **Weight**: 5 (900,000g)
- **Size**: 3 (200–400cm)
- **Age**: 10
- **Danger**: 2
- **Believability**: 4
- **Fun Fact**: Sunfish are unable to fully close their mouths.

**Narwhal**
- **Weight**: 5 (1,500,000g)
- **Size**: 4 (390–600 cm)
- **Age**: 50
- **Danger**: 3
- **Believability**: 3
- **Fun Fact**: The Narwhal tusk can grow up to 270cm long.

**Mermaid**
- **Weight**: 3 (55,000g)
- **Size**: 2 (160–180cm)
- **Age**: 100
- **Danger**: 5
- **Believability**: 1
- **Fun Fact**: To see a mermaid while on sea was considered an omen of shipwreck.

**Giant Squid**
- **Weight**: 4 (200,000g)
- **Size**: 5 (1005–1700cm)
- **Age**: 5
- **Danger**: 4
- **Believability**: 2
- **Fun Fact**: The first image of a live giant squid was taken in 2004 in Japan.

**Swordfish**
- **Weight**: 3 (45,000g)
- **Size**: 3 (300–460cm)
- **Age**: 15
- **Danger**: 3
- **Believability**: 4
- **Fun Fact**: Sword fish have a special organ next to their eyes to keep their brain and their eyes warm.

**Manatee**
- **Weight**: 4 (400,000g)
- **Size**: 3 (240–400cm)
- **Age**: 40
- **Danger**: 1
- **Believability**: 4
- **Fun Fact**: A manatee can eat a tenth of its own weight in 24 hours.

**Hippocampus**
- **Weight**: 4 (250,000g)
- **Size**: 4 (500–600cm)
- **Age**: 200
- **Danger**: 1
- **Believability**: 1
- **Fun Fact**: The Hippocampus comes from Greek and Roman mythology and is the animal of Poseidon/Neptune.

**Dolphin**
- **Weight**: 4 (500,000g)
- **Size**: 3 (300–430cm)
- **Age**: 50
- **Danger**: 3
- **Believability**: 5
- **Fun Fact**: There are nearly 40 different species of dolphins.

**Sea Cucumber**
- **Weight**: 2 (2,000g)
- **Size**: 2 (2–200cm)
- **Age**: 10
- **Danger**: 1
- **Believability**: 3
- **Fun Fact**: Sea Cucumbers breathe through their anus.
**Humpback Whale**
- **Weight**: 5 (36,000,000g)
- **Size**: 4 (1,500–1,800cm)
- **Age**: 50
- **Danger**: 1
- **Believability**: 4

**Sea Otter**
- **Weight**: 2 (3,000g)
- **Size**: 2 (100–160cm)
- **Age**: 23
- **Danger**: 3
- **Believability**: 5

**Turtle**
- **Weight**: 5 (900,000g)
- **Size**: 3 (100–240cm)
- **Age**: 80
- **Danger**: 2
- **Believability**: 5

**Nudibranchs**
- **Weight**: 2 (1,500g)
- **Size**: 1 (0.6–30cm)
- **Age**: 1
- **Danger**: 2
- **Believability**: 4

**FUN FACT**
- Humpback whales are the only otters to give birth in the water.
- It can take up to 35 years for a sea turtle to be ready to mate.
- Sea otters are the only otters to adapt the color of the food they eat and some even retain the poisons of their food.

**FUN FACT**
- The biggest threats to humpback whales today are collisions with ships and entanglement in fishing gear.
- It can take up to 35 years for a sea turtle to be ready to mate.
- Sea otters are the only otters to adapt the color of the food they eat and some even retain the poisons of their food.

**Invent your own sea creatures and put them in the game:**

**Nudibranch**
- **Weight**: 2 (1,500g)
- **Size**: 1 (0.6–30cm)
- **Age**: 1
- **Danger**: 2
- **Believability**: 4

**FUN FACT**
- Nudibranchs adapt the color of the food they eat and some even retain the poisons of their food.
