**Course Summary**
What can people do to improve their health and well-being? In this course, students will learn key theories about behaviour and behaviour change, including behaviour change techniques, and try them out for improving their own health and well-being. We will aim to better understand the following questions:

- What makes people healthier and happier?
- What is the best way to measure success?
- Is there a formula for happiness and health?
- Why do people find it difficult to change their behaviour?
- What are the most promising strategies for improving health and well-being?
- How do friends and family influence health and well-being?
- How can people build happier and healthier relationships?

We are offering this course as part of the elective module. We believe this is an opportunity for undergraduates to better understand the role of behaviour and its influence on health and well-being. It will be relevant to many disciplines across the university where students need to take human behaviour into consideration, ranging from psychology and sociology, to education and economics, computer science and engineering.

Course Co-ordinators are Dr Gertraud (Turu) Stadler and Dr Dan Powell.

**Course Aims & Learning Outcomes**
This course aims to give students an introduction to theory and research on the links between behaviour, health, and well-being. Students will learn key theories about behaviour and behaviour change, including behaviour change techniques, and try them out for improving their own health and well-being.

1. Understand what behaviours make people healthier and happier
2. Be able to measure success in changing behaviour, health and well-being
3. Understand and describe the role of theory for changing behaviour, health and well-being
4. Understand evidence that shows what influences health and well-being
5. Describe promising strategies to initiate and maintain changes in health and well-being
6. Describe how family and friends contribute to health and well-being
7. Understand the basics of behavioural interventions to change health and well-being
8. Be able to present a case study of the link between behaviour, health and well-being
9. Be able to critically reflect on theories and evidence promising to change health and well-being

**Course Teaching Staff**
Course Co-ordinator(s):
Dr. Gertraud (Turu) Stadler:  
gertraud.stadler@abdn.ac.uk  
01224 438407
Dr Dan Powell:  
daniel.powell@abdn.ac.uk

Assessments & Examinations

One 1-hour multiple-choice test (50%) and continuous assessment (50%).

The multiple-choice test will be held on **Thursday 15th November, 4pm**, and will cover material taught in lectures as well as material read from the essential course reading list outlined below.

Continuous assessment refers to work carried out towards the submission of a poster assignment submitted on **Wednesday 21st November, 12pm (noon)**. There are other deadlines students need to meet to keep on track with this assignment, mostly short tasks around data entry. Please see the Lecture synopsis for more details (deadlines presented in blue font) and more will be explained in Lecture 1.

You will briefly present your posters (i.e. 2-3 minutes) to a section of the class on **Thursday 22nd November** (the final teaching session of the course). This will be an informal but compulsory session to communicate what everyone has done. The presentation itself is not graded, but staff can provide informal verbal feedback if requested.

Feedback: The instructors will provide example tests and posters in sessions before the assessments and give feedback for students to improve their work. The instructors will provide selected answers to the exam questions to individual students if requested, and give feedback on the posters via MyAberdeen.

Class Representatives

We value students’ opinions in regard to enhancing the quality of teaching and its delivery; therefore in conjunction with the Students’ Association we support the Class Representative system.

In the School of Medicine, Medical Sciences & Nutrition we operate a system of course representatives, who are elected from within each course. Any student registered within a course that wishes to represent a given group of students can stand for election as a class representative. You will be informed when the elections for class representative will take place.

What will it involve?

It will involve speaking to your fellow students about the course you represent. This can include any comments that they may have. You will attend a Staff-Student Liaison Committee and you should represent the views and concerns of the students within this meeting. As a representative you will also be able to contribute to the agenda. You will then feedback to the students after this meeting with any actions that are being taken.

Training

Training for class representatives will be run by the Students Association. Training will take place within each half-session. For more information about the Class representative system visit [www.ausa.org.uk](http://www.ausa.org.uk) or email the VP Education & Employability [vped@abdn.ac.uk](mailto:vped@abdn.ac.uk). Class representatives are also eligible to undertake the STAR (Students Taking Active Roles) Award with further information about this co-curricular award being available at: [www.abdn.ac.uk/careers](http://www.abdn.ac.uk/careers).
Problems with Coursework

If students have difficulties with any part of the course that they cannot cope with alone they should notify the course coordinator immediately. If the problem relates to the subject matter general advice would be to contact the member of staff who is teaching that part of the course. Students with registered disabilities should contact Mrs Jenna Reynolds (medsci@abdn.ac.uk) in the School Office (based in the IMS, Foresterhill), or Mrs Sheila Jones (s.jones@abdn.ac.uk) in the Old Aberdeen office associated with the teaching laboratories, to ensure that the appropriate facilities have been made available. Otherwise, you are strongly encouraged to contact any of the following as you see appropriate:

- Course student representatives
- Course co-ordinator
- Convenor of the Medical Sciences Staff/Student Liaison Committee (Professor Gordon McEwan)
- Medical Sciences Disabilities Co-ordinator (Dr Derryck Shewan)

All staff are based at Foresterhill and we strongly encourage the use of email or telephone the Medical Sciences Office. You may have a wasted journey travelling to Foresterhill only to find staff unavailable.

If a course has been completed and students are no longer on campus (i.e. work from second semester during the summer vacation), coursework will be kept until the end of Freshers’ Week, during the new academic year. After that point, unclaimed student work will be securely destroyed.
Course Reading List

Students should expect to spend **3-4 hours per week** on self-study, in addition to any work carried out toward the assignment.

In the following reading list, all “essential course reading” items are compulsory, and students should read these in advance of attending the lecture/workshop, as these readings will often be discussed. The class test will be based on material delivered in lectures and in the essential readings, so it is important not to fall behind.

Of course, we recommend that all students read around topics presented to gain a deeper understanding, and the “recommended further reading” items are suggestions that we have found useful ourselves but is not intended to be an exhaustive list.

**Thu 14 September**

Essential course reading:

Recommended further reading:

**Thu 21 September**

Essential course reading:

Recommended further reading:

**Thu 28 September**

Essential course reading:

Used in workshop, please review after class:

Recommended further reading:

**Thu 5 October**

Essential course reading:

Recommended further reading:

**Thu 12 October**

Essential Reading:

Recommended Reading:

**Thu 19 October**

Essential Reading: None. Please spend this time working with your data and revising content up to this point.

**Thu 26 October**
Essential Reading:

Recommended Reading:

**Thu 2 November**

Essential Reading:

Recommended Reading:

Thu 9 November

Essential Reading:

Recommended Reading:

Thu 16 November

Essential Reading: No essential reading. Time should be spent revising.

Thu 23 November

Essential Reading: No essential reading. Time should be spent finishing poster assignment.
# Lecture Synopsis

<table>

<td>Lecture: Stress and Health What characteristics of stressors lead to physiological, emotional, and behavioural problems? Addressing some of the myths around stress. Workshop: Working with data Formulating a research hypothesis. Graph and interpret data.</td>
<td>Ch 13, Marks et al. (2005).</td>
</tr>
<tr>
<td>Wed 17 Oct</td>
<td><strong>ASSIGNMENT DEADLINE (NOON): COMPLETE AND SUBMIT DATA ENTRY 4</strong></td>
<td></td>
</tr>
<tr>
<td>Thu 18 Oct</td>
<td>Lecture: Making sense of behavioural data Examining fluctuations in behaviour and psychological processes (univariate and bivariate) from N-of-1 data. Overview of N-of-1 trials. Workshop: Assignment data exploration Graph and interpret data.</td>
<td>WORK ON DATA</td>
</tr>
<tr>
<td>Thu 25 Oct</td>
<td>Lecture: Adherence to medical recommendations Conceptualising adherence as a behaviour. Introduction to research on adherence to medical recommendations (e.g. medications, diets, behaviours). How big is the problem? Workshop: Adherence self-monitoring – skittles regimen</td>
<td>Van Dulman et al. (2007).</td>
</tr>
</tbody>
</table>
Introduction to adherence self-monitoring. Distribution of diaries. Detailed instructions on the poster assignment format will be provided.

**Wed 31 Oct**

**ASSIGNMENT DEADLINE (NOON): COMPLETE AND SUBMIT DATA ENTRY 5**

**Thu 1Nov**

Lecture: Behaviour change techniques and methods
Introduction to evidence-based methods for changing behaviours: “target the theoretical determinant to change the behaviour”

Kok et al. (2015)
(Read after class so it is easier to follow).

**Workshop: Designing a brief behaviour change intervention**
Applying behaviour change methods to change self-efficacy. Applying to own self-tracking of adherence.

**Wed 7 Nov**

**ASSIGNMENT DEADLINE (NOON): COMPLETE AND SUBMIT DATA ENTRY 6**

**Thu 8Nov**

Revision class

**Reading: Ch.2, Harrington (2013)**

**Brief Happiness Interventions**
Introduction to brief happiness interventions including mindfulness and gratitude.

**Wed 14 Nov**

**ASSIGNMENT DEADLINE (NOON): COMPLETE AND SUBMIT DATA ENTRY 7**

**Thu 15 Nov**

Multiple choice test

**Workshop: Poster Assignment**
Walk through of an example poster. Demonstration of how to search for evidence; properly format citations; etc.

**Wed 21 Nov**

**ASSIGNMENT DEADLINE (NOON): SUBMIT POSTER**

**Thu 22 Nov**

Assignment: Poster presentations
Present and discuss student posters

**Practical/Lab/Tutorial Work**

Each lecture gives an introduction to theories and evidence about how behaviour, health, and well-being are linked. We will try out key parts of the lecture for assessing and changing own behaviour in the workshops, as well as supporting working with data needed for your assignment.
University Policies

Students are asked to make themselves familiar with the information on key institutional policies which been made available within MyAberdeen (https://abdn.blackboard.com/bbcswebdav/institution/Policies). These policies are relevant to all students and will be useful to you throughout your studies. They contain important information and address issues such as what to do if you are absent, how to raise an appeal or a complaint and indicate how seriously the University takes your feedback.

These institutional policies should be read in conjunction with this programme and/or course handbook, in which School and College specific policies are detailed. Further information can be found on the University's Infohub webpage or by visiting the Infohub.

The information included in the institutional area for 2019/20 includes the following:

- Absence
- Appeals & Complaints
- Student Discipline
- Class Certificates
- MyAberdeen
- Originality Checking
- Feedback
- Communication
- Graduate Attributes
- The Co-Curriculum
## Common Grading Scale

<table>
<thead>
<tr>
<th>Grade</th>
<th>Grade Point</th>
<th>Category</th>
<th>Honours Class</th>
<th>Description</th>
</tr>
</thead>
</table>
| A1    | 22          | Excellent  | First         | • Outstanding ability and critical thought  
                                                   • Evidence of extensive reading  
                                                   • Superior understanding  
                                                   • The best performance that can be expected from a student at this level |
| A2    | 21          |            |               |             |
| A3    | 20          |            |               |             |
| A4    | 19          |            |               |             |
| A5    | 18          |            |               |             |
| B1    | 17          | Very Good  | Upper Second  | • Able to argue logically and organise answers well  
                                                   • Shows a thorough grasp of concepts  
                                                   • Good use of examples to illustrate points and justify arguments  
                                                   • Evidence of reading and wide appreciation of subject |
| B2    | 16          |            |               |             |
| B3    | 15          |            |               |             |
| C1    | 14          | Good       | Lower Second  | • Repetition of lecture notes without evidence of further appreciation of subject  
                                                   • Lacking illustrative examples and originality  
                                                   • Basic level of understanding |
| C2    | 13          |            |               |             |
| C3    | 12          |            |               |             |
| D1    | 11          | Pass       | Third         | • Limited ability to argue logically and organise answers  
                                                   • Failure to develop or illustrate points  
                                                   • The minimum level of performance required for a student to be awarded a pass |
| D2    | 10          |            |               |             |
| D3    | 9           |            |               |             |
| E1    | 8           | Fail       | Fail          | • Weak presentation  
                                                   • Tendency to irrelevance  
                                                   • Some attempt at an answer but seriously lacking in content and/or ability to organise thoughts |
| E2    | 7           |            |               |             |
| E3    | 6           |            |               |             |
| F1    | 5           | Clear Fail | Not used for Honours | • Contains major errors or misconceptions  
                                                   • Poor presentation |
<p>| F2    | 4           |            |               |             |
| F3    | 3           |            |               |             |
| G1    | 2           | Clear Fail/ Abysmal | - | • Token or no submission |
| G2    | 1           |            |               |             |
| G3    | 0           |            |               |             |</p>
