Frist Aid Training Day for more details turn to page 3.
Hi everyone,

This month in the Project SEARCH classroom, the Interns have been settling into their first internships, as well as taking part in some further training. Sheena Holt from North East Scotland College visited the interns to deliver Emergency First Aid at Work training, and Neil Plant from Mitie visited to deliver training in Health and Safety Risk Assessment.

Interns have been busy trying to get sponsors as a large part of the team are taking part in Inpire’s annual Firewalk next month.

Interns were able to relax over the October break before chairing their first Intern review and employment planning meetings with family and support staff.

Interns began to prepare for the upcoming Meet the Interns event to be held on Tuesday 10th November at the Project SEARCH classroom.
Frist Aid Training Day

The Interns had their Emergency First Aid at Work training on Thursday 8th of October. The class was taught by Sheena Holt from North East Scotland College. Interns learned about the Recovery Position, how to perform CPR on different age groups (from baby and small child to adult) and practiced this on and different Dummies. Interns were also taught how to bandage different wounds and practised on one another. Everyone passed the assessment on the day and would like to thank Sheena for coming to the classroom to teach the Interns these valuable skills.
On Wednesday 28th of October Neil Plant from MITIE came to visit the Interns and deliver a Health and Safety Workshop on Risk Assessments. The Interns were very engaged and quick to spot hazards and risks throughout the training session. Everyone enjoyed the workshop and passed with flying colours. The Project SEARCH team would like to thank Neil for travelling the distance to Aberdeen just to visit the Interns.
Internship Profiles:

Retail: The Hub Shop

- Catering Assistant in the Hub

Music Department

- Hardback Café Assistant

The Sir Duncan Rice Library

- Porter at Hillhead

- Information Assistant
