How to support me well at work:

I need support with writing so I like to have a laptop or pc to help me with my work.

To get me to understand better I prefer to follow a list of instructions so a list or something similar would be beneficial.

Reading is easier for me if it is in short statements rather than long paragraphs.

I find it hard to meet deadlines for work, I find it beneficial to have some sort of prompt.

I prefer visual learning, I find this easier to understand so show me don’t just tell me.

I like to have someone to check my spelling etc once I have finished my work.
