UNIVERSITY OF ABERDEEN
Conditions for using Information Technology Facilities

1 Purpose
The purpose of this policy is to ensure that University of Aberdeen digital services and computing facilities are used for their intended purposes and utilised safely, lawfully and equitably. It also serves to protect the confidentiality, integrity and availability of University digital information and services.

You are strongly urged to read the accompanying Guidance Notes, which provide more detailed information.

2 Scope
These regulations apply to anyone using the IT facilities (hardware, software, data, network access, third party services, online services, or IT credentials) provided or arranged by the University of Aberdeen.

3 Summary
The following is a summary of the main points of the IT Conditions of Use. You are expected to be familiar with the full Conditions for using Information Technology Facilities.

- Governance
  Don't break the law, do abide by the University of Aberdeen’s regulations and policies, and do observe the regulations of any third parties whose facilities you access.

- Identity
  Don’t allow anyone else to use your IT credentials, don’t disguise your online identity and don’t attempt to obtain or use anyone else’s credentials.

- Infrastructure
  Don’t put the institution’s IT facilities, business operation or data at risk by introducing malware, interfering with hardware or loading unauthorised software.

- Information
  Safeguard personal data, respect other people's information and don’t abuse copyright material. Remember that mobile devices may not be a secure way to handle information.
• **Behaviour**

Don’t waste IT resources, interfere with others’ legitimate use or behave towards others in a way that would not be acceptable in the physical world.

4 **Governance**

When using IT, you remain subject to the same laws and regulations as in the physical world.

It is expected that your conduct is lawful. Furthermore, ignorance of the law is not an adequate defence for unlawful conduct.

When accessing services from another jurisdiction, you must abide by all relevant local laws, as well as those applicable to the location of the service.

You are bound by University of Aberdeen general regulations when using the IT facilities; these are available in the Policy Zone.

You must abide by the regulations applicable to any other organisation whose services you access such as Janet, Eduserv and Jisc Collections.

When using services via Eduroam, you are subject to both the regulations of the University of Aberdeen and the institution where you are accessing services.

Breach of any applicable law or third-party regulation will be regarded as a breach of these IT regulations and may result in disciplinary procedures.

5 **Authority**

These regulations are issued under the authority of the Court which has delegated responsibility for their interpretation and enforcement to the Director of Digital and Information Services.

If you have any doubt whether or not you have the authority to use an IT facility you should seek further advice from the IT Service Desk. Attempting to use the IT facilities without the permission of the relevant authority is an offence under the Computer Misuse Act.

You must comply with any reasonable written or verbal instructions issued by people with delegated authority in support of these regulations. If you feel that any such instructions are unreasonable or are not in support of these regulations, you may appeal to the Director of Information Technology.

6 **Acceptable Use**

The IT facilities are provided for use in furtherance of the institution’s mission. Such use might be for learning, teaching, research, knowledge transfer, public outreach, the commercial activities of the institution, the administration necessary to support all the above or other work in connection with your employment by the institution.

Use of these facilities for personal activities, if it does not infringe any of the regulations, is permitted, but this is a privilege that may be withdrawn at any point. Employees using the IT
facilities for non-work purposes during working hours are subject to the same management policies as for any other type of non-work activity.

Use of these IT facilities for non-institutional commercial purposes, or for personal gain, requires the explicit approval of the Director of Digital and Information Services.

Use of certain licences is only permitted for academic use and where applicable to the code of conduct published by the Combined Higher Education Software Team (CHEST). See the accompanying Guidance Notes for further details.

7 Identity
You must take all reasonable precautions to safeguard any IT credentials (for example, a username and password, email address, smart card or other identity hardware) issued to you. You must not allow anyone else to use your IT credentials. Nobody has the authority to ask you for your password and you must not disclose it to anyone.

You must not attempt to obtain or use anyone else’s credentials.

You must not impersonate someone else or otherwise disguise your identity when using the IT facilities.

8 Infrastructure
You must not do anything to jeopardise the integrity of the IT infrastructure by, for example, doing any of the following without approval:

- Damaging, reconfiguring or moving equipment.
- Loading software on University of Aberdeen equipment other than in approved circumstances.
- Reconfiguring or connecting equipment to the network other than by approved methods.
- Setting up servers or services on the network.
- Deliberately introducing malware.
- Attempting to disrupt or circumvent IT security measures.

9 Information
If you handle personal, confidential or sensitive information, you must take all reasonable steps to safeguard it and must observe the University of Aberdeen’s Data Protection and Information Security policies and guidance, available in the Policy Zone, particularly with regard to removable media, mobile and privately owned devices.

You must not infringe copyright or break the terms of licences for software or other material.

You must not create, download, store or transmit unlawful material, or material that is indecent, offensive, threatening or discriminatory. The University of Aberdeen has procedures to approve and manage valid activities involving such material; these are available on the University website and must be observed.
You must abide by University of Aberdeen Code of Practice for Electronic Publishing when using the IT facilities to publish information.

10 Behaviour

The way you behave when using IT service or social media should be no different to how you would behave under other circumstances. The University of Aberdeen policies concerning staff and students also apply to the use of social media. These include human resource policies, codes of conduct, acceptable use of IT and disciplinary procedures.

• Abusive, unlawful, inconsiderate or discriminatory behaviour is unacceptable.
• You must not cause needless offence, concern or annoyance to others.
• Adhere to University of Aberdeen guidelines on social media.
• You must not send spam, malicious email or unsolicited bulk email.
• You must not deliberately or recklessly consume excessive IT resources such as processing power, bandwidth or consumables. Use resources wisely. Don’t consume excessive bandwidth by uploading or downloading more material (particularly video) than is necessary. Do not waste paper by printing more than is needed; don’t print single sided when double sided would do. Don’t waste electricity by leaving equipment needlessly switched on.
• You must not use the IT facilities in a way that interferes with others’ valid use of them.
• If you are using shared IT facilities for personal or social purposes, you should vacate them if they are needed by others with work to do. Similarly, do not occupy specialist facilities unnecessarily if someone else needs them.
• When using shared spaces, remember that others have a right work without undue disturbance. Keep noise down (turn phones to silent if you are in a silent study area), do not obstruct passageways and be sensitive to what others around you might find offensive.

11 Monitoring

The University of Aberdeen monitors and records the use of its IT facilities for the purposes of:

• The effective and efficient planning and operation of the IT facilities.
• Detection and prevention of infringement of these regulations.
• Investigation of alleged misconduct.

The University of Aberdeen will comply with lawful requests for information from government and law enforcement agencies.

You must not attempt to monitor the use of the IT facilities without explicit authority the Director of Digital and Information Services.
12 Compliance

Non-compliance or infringement of this policy may result in action being taken under the University disciplinary procedures. You may also be subject to sanctions including restrictions on access to or use of IT facilities, withdrawal of offending material, fines and recovery of any costs incurred by the University of Aberdeen because of the breach.

If the institution believes that unlawful activity has taken place, it will refer the matter to the police or other enforcement agency.

If the institution believes that a breach of a third party’s regulations has taken place, it may report the matter to that organisation.

You must inform the IT Service Desk if you become aware of any infringement of these regulations.

13 Review

This policy is reviewed at least annually to ensure it:

- Remains fit for purpose and accurate.
- Reflects changes in technologies.
- Is aligned to industry best practice.
- Supports continued regulatory, contractual, and legal compliance.
