Employment

Since 2012: University of Aberdeen, Lecturer (Assistant Professor) in Economics,
jointly with the Health Economics Research Unit
(*On maternity leave from August 2019 to July 2020*)

2009–2012: Teaching Assistant, University of Warwick

2010 Summer: Intern, Centre for Educational Research and Innovation, OECD, Paris

2006 Summer: Research Assistant for Prof. Yasuyuki Todo, Tokyo

External Affiliation

Since 2017: Institute for the Study of Labour (IZA), Research Fellow
2012–2017: IZA, Research Affiliate

Higher Education

2007 – 2012: PhD Economics, University of Warwick (Completed in December 2012)
Thesis Title: “Identification of Causal Effects using the 1995 Earthquake in Japan: Studies of
Education and Health”
Advisors: Prof. Wiji Arulampalam, Prof. Robin Naylor and Prof. Fabian Waldinger
Thesis Examiners: Prof. Sonia Bhalotra and Prof. Victor Lavy

2006 – 2007: MSc Economics, University of Warwick (Distinction in dissertation)

2004 – 2006: MA Economics/Economic Policy, Tokyo Metropolitan University (First class)

2000 – 2004: BA Economics, Tokyo Metropolitan University

Research Interest

Main fields: Labour Economics, Health Economics

Secondary fields: Applied Econometrics, Economics of Education, Economics of Crime

Working Papers

“Where to live? English proficiency and residential location of UK immigrants” (with Lualhati Santiago), 2020.

This article analyses the causal effect of English proficiency on residential location outcomes of immigrants using a natural experiment. Based on the phenomenon that young children learn a new language more easily than older children, we construct an instrument for English proficiency exploiting age at arrival in the United Kingdom. Using a unique dataset, we construct measures of the extent of residential segregation, and find that poor English skills lead immigrants to live in a language enclave but not necessarily in ethnic or country-of-birth enclaves. We also find weak evidence of an impact of poorer English proficiency on living in a neighbourhood of lower quality.

“Shaking criminal incentives” (with Theodore Koutmeridis). IZA Discussion Paper No. 12781, 2019.

We study criminal incentives exploiting a historically unique source of exogenous variation, the unanticipated 1995 Kobe earthquake, which influenced several Japanese municipalities with thousands of deaths and building damages, while it left others unaffected. Natural experimental evidence between 1990-2000 indicates that the decline in burglaries post-earthquake is disproportionately large for affected municipalities, even after controlling for other key determinants, such as labour market conditions and police forces, possibly indicating the response of housebreakers to damages to housing that reduced the value of prospective takings. We tackle endogeneity concerns of housing damage by instrumenting the extent of damage with the distance from the earthquake epicentre, which arguably influences burglaries exclusively through devaluing the potential loot. This is the first comprehensive natural experimental study that explores the direct impact and potential substitution effects across different crime types in response to the changing economic value of prospective criminal takings, key but overlooked determinants of illegal behaviour.

“The intergenerational mobility of white working-class boys: Are they really the most disadvantaged?” (with Harminder Battu and Patricio Valdivieso Massa). Discussion Papers in Economics and Finance, vol. 19-2, 2edn, University of Aberdeen Business School, pp. 2-39, 2019.

We examine the relative intergenerational mobility of British white working-class boys where intergenerational mobility is gauged by estimating the degree of persistence in occupational status between parents and their children. Using data from the UK Understanding Society survey, we find that white working-class boys perform the poorest with respect to educational attainment, but outperform ethnic working-class boys in terms of income. This we call the “white working-class paradox”. In terms of social mobility, we find general upward mobility of British males, and that it is the ethnic working class rather than the white working class who perform the poorest.

“A longitudinal analysis of parents’ influence on children’s unhealthy food consumption” (with Zoe Ejebu, Anne Ludbrook, and Patricia Norwood), 2020.

Parents play a key role in influencing the frequency and intake of children’s discretionary food consumption. This paper uses cohort panel data from Scotland with information on parents’ health-related behaviour, socioeconomic characteristics, and children’s health-related behaviours to examine the impact of those factors on children’s frequency of discretionary food consumption. Using the logit fixed effects model and blow-up-and-cluster model, we find that the frequency of discretionary food consumption rises with children’s TV viewing but reduces when eating with adult family members. These results suggest that parents can influence the frequency of children’s discretionary food consumption by modifying their own and their child’s behaviour, leading important policy implications to tackle the challenge of childhood obesity.

Work in Progress

“The causal analysis of the impact of childhood obesity on academic performance: Evidence from Millennium Cohort Study” (with Wiji Arulampalam).

“Habit formation and children’s unhealthy food consumption: Evidence from Growing up in Scotland” (with Anne Ludbrook and Patricia Norwood).

“Intergenerational aspects of English proficiency: Language skills of parents and socioeconomic outcomes of second-generation immigrants” (with Lualhati Santiago).

Policy Papers

“Speak well, do well - English language proficiency and health and social outcomes of UK immigrants”, *Health Economics Research Unit Policy Brief*, University of Aberdeen, 2016.

“FDI and economic growth in less developed countries: A theoretical and empirical survey” (with Yasuyuki Todo), *OECD Journal General Papers*, 2008, vol. 2008, no. 1, pp. 1 – 186.

Scholarships, Awards, and Research Grants

Scholarships

2008 – 2011: Study Abroad Programme Bursary for graduate students from the Ministry of Education, Culture, Sports, Science and Technology, Japan (£54,160)

2004 – 2006: Scholarship for graduate studies from the Japan Student Services Organisation, Japan (£13,920)

2000 – 2004: Scholarship for undergraduate studies from the Japan Scholarship Foundation, Japan (£14,720)

Awards

2013: Winner of the Cairncross Prize for the best paper by an early-career economist, Scottish Economic Society 2013 Annual Conference (£1,000)

Grants

2015: Early Career Engagement Grant by the Scottish Institute for Research in Economics (£3,120)

2014: Research Grant by the Carnegie Trust for the Universities of Scotland (£2,366)

Teaching

Current

Undergraduate (Honours course): Health Economics, Course coordinator

Past

Postgraduate: Quantitative Methods; Topics in Health Economics and Econometrics; Economics of the Health Workforce

Undergraduate: Microeconometrics; Econometrics; Mathematical and Statistical Techniques

Relevant Professional Experiences and Qualifications

Teaching qualifications and achievements

2019: Shortlisted for the Best Postgraduate Taught Lecturer in the Principal's Excellence Awards, University of Aberdeen.

2018-: Higher Education Academy (HEA) Fellow.

Administrative duties

2020-: Programme director of MA Economics (equivalent to BSc Economics), University of Aberdeen.

- Involved with accreditation and curriculum review, among others.

2013-: Business School external and internal seminar organiser; Health Economics Research Unit & Business School joint seminar organiser, University of Aberdeen.

2017-2019: Athena Swan committee member, University of Aberdeen.

2013-2019: Undergraduate student recruitment and life-cycle officer, University of Aberdeen.

Refereeing

Journal of European Economic Association; Oxford Bulletin of Economics and Statistics; Journal of Economic Behaviour and Organization; Oxford Economic Papers; Economics and Human Biology; Applied Economics; National Tax Journal; Scottish Journal of Political Economy; Leverhulme Grant.

Conferences and Seminars (2015 onwards)

2021: University of Curtin Australia, online; Scottish Economic Society online; ESPE Barcelona online.

2019/2020: University of Birmingham; ESPE at Bath; EALE-SOLE online; Institute for Labour Law and Industrial Relations in the European Union (IAAEU) online.

2018: EEA-ESEM at Cologne; International Association for Applied Econometrics Conference at Montreal; Scottish Economic Society at Perth; Glasgow University Workshop on Health Challenges.

2017: SOLE at Raleigh; EEA-ESEM at Lisbon; Oxford Workshop on Immigration, Health and Well-Being; ESPE at Glasgow; University of Dundee.

2016: IZA Migration Meeting at Bonn; International Association for Applied Econometrics Conference at Milan; University of Warwick.

2015: EALE-SOLE at Montreal; Alicante University Health Workshop; Essen Health Conference; Applied Economics of Education Workshop at Catanzaro Italy; University of Heriot-Watt; The CPB Netherlands Bureau for Economic Policy Analysis seminar.
