Academic Programme

UNIVERSITY OF ABERDEEN

BIOLOGICAL SCIENCE		
Tuesday	Wednesday	Thursday
<p>Lecture 1: Welcome followed by Micro-Lab Challenge</p> <p>Lecture 2: Micro-Lab Challenge (Cont'd)</p>	<p>Field Trip to Ythan Estuary: <i>Explore the various habitats and animals that live there. As well as being one of the best places in the world to see seals, the Ythan is home to a wide range of bird species, including terns, cormorants, eiders, curlews and many, many others. Dolphins are commonly in the area and on occasion can be seen offshore, but we can't promise any will make an appearance while you're there. You will get to explore, observe and learn about the biology of the area and get involved in some hands-on biological science.</i></p>	<p>Lecture 7: Tour of Research Labs</p>
<p>Lecture 3: Evolution in Action</p>		<p>Lecture 8: Choice The Mind Machine Or Introduction to Mandarin</p>
<p>Lecture 4: Exploring Cruickshank Botanic Gardens <i>Up close and personal with animals, plants and microorganisms in the Cruickshank Botanic Gardens</i> (https://www.abdn.ac.uk/botanic-garden/). Using field equipment, and then microscopes, we will get up close - or as close as we can - to a broad range of living organisms. If the weather is a bit rubbish, we'll head into the labs to have a look at a range of microscopic organisms that may surprise you.</p>
