The University of Aberdeen is the fifth oldest university in the UK, dating back to 1495. Over the past 500 years, we have consistently offered life-changing opportunities for all of our students. Associated with five Nobel Prize winners, we have a proud heritage in research and teaching combined with a modern outlook. We are consistently ranked among the top 1% of the world’s universities: our knowledge and experience drive us to the cutting edge of learning excellence, delivered in modern facilities in the wonderful city of Aberdeen.

Come and see for yourself

Undergraduate open days
Saturday 17 June (Medicine), Saturday 26 August and Saturday 21 October 2017.
• Find out how our degrees will give your career a head start.
• Tour departments, the campus and our first-class facilities.
• Talk to our staff and students.

14,500 students

Hello Hallò

Teaching Gaelic courses since the 18th Century
ABERDEEN UNIQUE.

Why make it Aberdeen?

Welcome to one of the most prosperous and beautiful regions of the UK. Aberdeen is a vibrant, creative and ambitious city, known for its historic charm and cosmopolitan community. Aberdeen and Aberdeenshire have something for everyone: from the bustling city centre of Europe’s energy capital, to some of Scotland’s most beautiful countryside and coastlines.

The safest university city in the UK.*

*Source: Bank of Scotland poll, 2015
Why make it Aberdeen?
Listen and learn

From historical venues such as His Majesty’s Theatre and the Music Hall, to smaller intimate spaces for live entertainment such as the Lemon Tree, Aberdeen has something to offer everyone. Whether you love listening to poetry, laughing at comedy, or enjoying music, opera or theatre, Aberdeen is the city of the north that provides it all. Immerse yourself in our art and film culture by paying a visit to our independent cinema in the city’s popular Belmont Street, and be inspired by our regular art exhibitions that pop up all over the city.

Eat

In a city with so many international links, it’s little wonder Aberdeen has an array of restaurants catering for both international and local cuisines. The city has welcomed many well-known chains, but also provides its residents and visitors with a large choice of independent eateries and bistrost, including dedicated vegan, gluten-free and internationally-themed outlets. And, don’t forget, one of Aberdeenshire’s claims to fame is being the birthplace of craft beer specialist BrewDog, with its original venue located in Aberdeen.

Get social

Our city is filled with a variety of pubs and clubs to suit any mood and vibe. Traditional, cozy pubs, with candlelit atmosphere; sophisticated wine and jazz bars; or dance floors for committed clubbers - it’s all here. All of our pubs and clubs are within the city centre and in easy walking distance - giving you plenty of choice for your big night out.

Shop

Union Street and the surrounding area makes up the city’s main shopping hub. You’ll find designer brands, unique boutiques and all the big high street names spread across five shopping centres easily accessible on foot. In addition, our four retail parks dotted around the city provide larger stores with good parking facilities.

There are over 30 places named Aberdeen in the world (but we’re confident we’re the best!).
Get wild

The city and surrounding shire is famously known for many different types of wildlife. Spot dolphins in the North Sea, or see hundreds of seals at the Sands of Forvie National Nature Reserve, less than 20 miles from the city centre. To catch a glimpse of rare animal and plant species, visit the Cairngorms National Park, which is home to 25% of the UK’s threatened birds, animal and plant species.

Life’s a beach

Whether it’s surfing, walking or swimming, there are an abundance of activities to discover with 150 miles of coastline at your disposal. Or just take a stroll from our campus to the beach, a walk of only about 20 minutes – definitely something to impress visitors with.

Walk and trek

Sometimes the best way to discover the shire is on foot, where you can experience the impressive landscape up close. Take a trip to our picturesque lochs, like Loch Muick, or soak in the miles of scenery from the Mither Tap at the top of Aberdeenshire’s tallest mountain, Bennachie.

Proud of our history

Evidence of Aberdeenshire’s past is still very prominent today, with historical attractions ranging from the Neolithic age to World War II. Stone circles, castles, ruins and other buildings can be found all over the city and shire. One of our most well-known castles is Dunnottar Castle, which was part of the inspiration for Disney Pixar’s animation Brave.
Get adventurous

Keen skier, cyclist or horse rider? Fancy surfing, quad biking or golfing? Whatever interests you, there are endless opportunities to explore things you already love and are yet to discover. For all of our skiers and snowboarders, a visit to Glenshee Ski Centre is a must. Cyclist and horse riders can explore the various trails made with them in mind, and water sports fans have our numerous beaches and aquatic centres.

See the Northern Lights (Aurora Borealis)

A once in a lifetime experience, the Aurora Borealis is a stunning example of natural beauty that can only be seen from certain spots in the world (we’re thrilled to say we’re one of them). For hundreds of years Aberdeen has been a famous hot spot for this magical light show, attracting visitors from across the world. Look out for Aurora forecasts online, which help you pinpoint the best time and place to see the show.

Try a wee dram

Whisky production has defined Scotland's heritage and reputation for many centuries and still does today. Aberdeenshire has plenty of whisky distilleries where you can discover how the spirit is made. Tourists from across the world come to Scotland to visit our distilleries, with many of them located in beauty spots around the country.
Aberdeen Sports Village, located just across the road from the main campus, provides outstanding sports and exercise facilities, including:

• More than 150 exercise stations
• Over 100 group exercise classes
• A 50 metre Olympic swimming pool
• A 25 metre Olympic diving pool
• Full size 3rd generation FIFA approved indoor football pitch
• Full-size grass football pitch
• An eight lane 400m running track
• A six lane indoor running straight
• Four squash courts
• Three sports studios
• Two health and relaxation suites

www.aberdeensportsvillage.com

And if that’s not enough for you...

There are numerous other sports facilities available across the University:

• Two rugby pitches
• A lacrosse pitch
• An artificial cricket wicket
• Outdoor tennis courts
• Floodlit football training areas
• The Balgownie Playing Fields, for football, rugby and shinty teams
• The Hillhead Centre has a full-size grass football pitch, a full-size sand-dressed synthetic pitch and a grandstand
• The River Dee boathouse rowing club
• Royal Deeside climbing bothy

AUSA Sports Union

Whether your interest in sport has just begun or is well-established, the opportunities to get involved in sport at the University of Aberdeen are endless. As part of the Aberdeen University Students’ Association (AUSA), the Sports Union runs more than 50 sports clubs. The Union has an elected body with a full-time Sport Officer and Sports Administrator. Our clubs often compete against many of the universities across the United Kingdom.

Sport scholarship and bursary scheme

We provide support for high performance athletes through our bursary and scholarship schemes. These are generously supported by our alumni, individuals and companies through the University of Aberdeen Development Trust. This allows us to provide strength and conditioning, physiotherapy support and a seminar programme, as well as financial support for up to 20 sport bursars who will be competing at, or close to, national level in their chosen sport. We are also proud to offer the Quita Shivas Athletics Scholarship, and the John Robertson Sports Scholarship. Please visit /sportandexercise for more information.
Our Sir Duncan Rice Library has been named one of the most beautiful libraries in the world.*

Study with us

We invest heavily in our facilities and learning resources, giving you access to everything you need to help you succeed. The growth of our learning resources has placed Aberdeen on the map as one of the UK’s leading universities for study and research.

*CEOWORLD magazine, 2016
Your degree: choice, flexibility and employability

Our degrees are usually four years and let you choose your studies around your interests, giving you the opportunity to widen your knowledge and skills base and maximise your employability.

When you join the University we don’t limit you to a specific subject, school or department. This means you can usually study any subjects which interest you and, even if you know exactly what you want to do, you’re able to change direction as your interests, passions and ambitions develop.

This structure is different from the rest of the UK, but is a long-established model in Scotland and the rest of Europe, and similar to the system in the USA. But at Aberdeen we go one step further: flexibility and individuality are our real strengths. We know from experience that flexibility is very important in preparing our students for a world in which new graduates need a wide range of knowledge, understanding and skills.

Our BSc and MA degrees are especially flexible, and the LLB and BTh programmes also offer some flexibility. Other degrees like the MEng, the MBChB or our Education degrees – which train you for a specific profession – offer less flexibility, as the content of these courses must satisfy the relevant professional organisation.

Entry requirements

The entry requirements are the minimum standards and subjects required for entry into our degree programmes, and achieving these does not guarantee entry. You will find them alongside each degree in this prospectus.

Scottish Baccalaureate

The University of Aberdeen recognises the value of the Scottish Baccalaureate and believes the qualification is a good preparation for entry to university. The qualification will be considered alongside Advanced Highers for direct entry into year two across a range of degree programmes. Where appropriate, the Scottish Baccalaureate will be used in offer making. However, for Medicine the admissions process is highly selective. For the present time, Scottish Baccalaureates will not form part of the standard entry requirements for Medicine at Aberdeen.
Curriculum for Excellence (CfE)

Scotland has reformed its curriculum for young people aged 3-18. Curriculum for Excellence (CfE), introduced in schools and colleges in 2010, aims to make learning more relevant to the modern world and give young people the skills, knowledge and understanding they need to succeed in learning, life and work, ultimately helping them to take their place in modern society and community.

The University of Aberdeen is aware of the new curriculum and qualifications and will continue to review entry requirement criteria as the Scottish Qualifications Authority (SQA) introduces the new National Qualifications. Information on proposed University policy can be found at www.abdn.ac.uk/study/curriculum-for-excellence

Scottish Credit and Qualifications Framework

All degrees offered by the University of Aberdeen are compliant with the Scottish Credit and Qualifications Framework (SCQF). Visit www.scqf.org.uk

Courses and credits

Almost all of our degree programmes consist of courses (modules) at four levels (1-4, equivalent to SCQF levels 7-11). You can access our catalogue of courses at www.abdn.ac.uk/registry/courses

Duration

A Scottish honours degree normally takes four years to complete, giving you the option to delay your final degree choice until the end of your second or sometimes even third year. A number of our undergraduate Masters degrees take five years to complete, although second year admission is possible if you have very good qualifications. Some language programmes take five years if they include a full year of study or work abroad. There are some programmes that include a year’s industrial placement, which means they also last for five years. The MBChB degree takes five years.

Honours

If you are taking a four year degree, admission to the honours part of the degree is conditional on performance in the first two years (or in some cases the first three), but most students who want to progress to honours do so.

Flexible entry and exit

If you have very good qualifications you can be admitted to the second year of study in many of our degree programmes, enabling you to complete an honours degree in three years. In some cases it is even possible to enter the third year of a degree programme.

We understand the importance of recognising successful study, and know that students can find themselves in a position where they need to take a break from their studies for whatever reason. If you decide to leave the University before completing your degree, you will receive an Undergraduate Certificate or Diploma in Higher Education if you obtain 120 level 1 credit points (for the Certificate) and 240 credit points (including 90 at level 2, for the Diploma). Exiting with such an award does not prevent you from returning to study at a later date to continue your studies and complete a higher award (subject to meeting the necessary criteria for readmission).
How our courses work in practice

Here’s an example of a student who has applied to study History at Aberdeen. As you can see, they have plenty of flexibility and the chance to change their specialism during their studies.

<table>
<thead>
<tr>
<th>First year</th>
<th>Second year</th>
<th>Third &amp; fourth year</th>
</tr>
</thead>
<tbody>

<td>French (Enhanced Study option)</td>
<td></td>
</tr>
</tbody>
</table>

We encourage you to study subjects that not only interest you but will be useful and will make you attractive to a future employer. This means you could, for example, add a subject in science or law to your arts degree. Similarly, you could add a modern language or management studies to your science degree.

Enhanced Study Courses

At Aberdeen, you will gain a broad education rather than having to specialise from the start. The value of students having the opportunity to study subjects beyond their specialism is well recognised by employers and gives you the best chance of success after you graduate.
All new students studying for a first degree at Aberdeen, with the exception of Medicine and Dentistry, will include Enhanced Study options as part of their degree. The degree programmes are structured in such a way that this will not increase your overall workload. Visit www.abdn.ac.uk/study/enhanced-study-options.

There are three types of Enhanced Study:
- Discipline Breadth
- Sustained Study
- Sixth Century Courses

**Discipline Breadth Courses**

This option allows you to extend the scope of your study by taking just about any of the University’s undergraduate courses, as long as it is not a required or optional course for your chosen degree and is not a course that is in the same discipline as your degree intention (i.e. a student who is doing a Chemistry degree could not take a Chemistry course). For more information on the range of courses available, please visit www.abdn.ac.uk/registry/courses.

**Sustained Study Courses**

Sustained Study is designed to provide you with continual exposure throughout the first two years of your degree course to an area of study that is separate from your core discipline. For example, you may benefit from having a language, or perhaps some knowledge of business or science, alongside your main degree subject.

**Sixth Century Courses**

In recognition of over 500 years of teaching and learning at Aberdeen, we have developed a series of cross-disciplinary courses designed to help you develop a deeper critical understanding of your chosen area of study by setting the subject in a wider context.

**Part-time study**

We offer a broad spectrum of undergraduate degrees which draw high quality teaching and knowledge together. The majority of our degree programmes are available to study on a part-time basis on campus in Aberdeen. If you just want to study individual courses to update your qualifications or for interest then individual subject study (ISS) may be the route for you. Visit www.abdn.ac.uk/undergraduate/part-time.
Careers and employability

Whether you already have firm plans for your future, or are still making up your mind, we’re on hand to help you make informed career decisions and provide the practical support you need to secure a graduate job or prepare you for postgraduate study. Our team of professional Careers Service staff can help develop your CV, offer you support with finding work experience and provide advice on applications and interviews right from day one, and you can also carry on using the Service after you graduate.

Explore your options

During your time here you will have the opportunity to discuss your career plans with both experienced careers staff and employers, as well as with Aberdeen graduates who have gone on to successful and interesting careers. The Careers Service organises regular events, including careers fairs, employer-led skills sessions and alumni talks, for you to research a wide range of careers. You can also apply for a place on our successful Career Mentoring Programme, which can give you the opportunity to network with professionals from many different sectors, all of whom have benefited from their Aberdeen degree. Visit www.abdn.ac.uk/careers

Enhance your employability

Employability is at the heart of what we do. The Careers Service works closely with academic colleagues to develop bespoke work-related learning courses for your chosen area of study. Many degrees also offer integrated and assessed careers-related courses, including courses to prepare you for a 12 month work placement.

Throughout your studies, your co-curricular achievements will be documented in your Enhanced Transcript, which will be presented to you at graduation. The Enhanced Transcript is dedicated to additional information – rounding out the picture of the student beyond traditional academic achievement, helping you to stand out from the crowd to employers.

Develop your skills

In this competitive job market, a degree is often not enough. Employers expect a range of skills from graduates and there are many opportunities for you to develop these during your time at Aberdeen. You can become involved in one of the many sports clubs or societies, volunteer in the local community, or even develop ideas for your own business.
Gain work experience

According to a recent High Fliers Report, more than a third of jobs for new graduates are secured by graduates who have already had work experience with that employer. At the University of Aberdeen, we’ve worked hard to build close links with employers – ranging from small local companies to multi-nationals – who recruit our graduates and offer that all-important work experience to our students. The Careers Service has a dedicated work placement team who source opportunities exclusively for Aberdeen students, so you can get ahead of the competition. We also have our own work placement programme within the University: the Aberdeen Internship. Placements are a really important way of demonstrating to a future graduate employer that you have gained the skills and experience to set you apart from the crowd when applying for graduate jobs – indeed, many of our students have impressed their placement employers so much that they have been offered a graduate job at the end of their placement.

The STAR Award

The STAR (Students Taking Active Roles) Award is organised by the University’s Careers Service. The initiative rewards the contribution that many students make to the wider University community by recognising the transferable skills and competencies that you develop and enhance through your involvement in sports clubs, societies and volunteering. Employers are looking for evidence of attributes and transferable skills that graduates can bring to their organisation, and the STAR Award is one way you can demonstrate that you have these skills and competencies.

BP Student Tutoring Scheme

The BP Student Tutoring Scheme is a voluntary initiative that places students in local primary and secondary schools. Students work alongside pupils in an allocated class for eight weeks, gaining vital classroom experience and also acting as ambassadors for higher and further education. The scheme has been running for over 10 years, tutoring in more than 50 schools across Aberdeenshire. The initiative provides an excellent opportunity for you to get involved in the local community and also enhance your employability skills.

Leadership Academy

The Academy is designed to enhance your leadership skills and knowledge. It was set up to help with exploring and developing our students’ leadership skills, such as negotiation, networking, intercultural-awareness and many more. The Leadership Academy offers you a unique opportunity to learn how to present yourself in different situations by linking your skills with real-life examples. We also want to encourage you to take on new challenges, step out of your comfort zone, and not be afraid to take on the new responsibilities that come with being a leader.

Enterprise and entrepreneurship

The Careers Service works with the Scottish Institute for Enterprise (SIE) to promote the enterprise agenda at the University through events such as the Business Ideas Competition and ‘Lunch with an Entrepreneur’. These events are designed to encourage students across all subject areas in the University to become more enterprising and for some students to make the transition into entrepreneurship by creating their own businesses.

For information on all our initiatives, visit www.abdn.ac.uk/careers

More than 300 career mentorships (2016-17).
Student support

Right from the start, we aim to make sure that you have access to all the support you need. Our student support team is a group of people who are easy to contact and who can give you friendly, expert information and advice.

Support with your academic choices

On arrival at the University you will be allocated a Personal Tutor (or, for Medicine and Dentistry students, a Regent), who will meet you during induction week and welcome you to the University. Your Personal Tutor can provide general support to you throughout your studies and will be a point of contact for any queries you have as a student. They will often be the first person you turn to if you encounter difficulties.

Visit www.abdn.ac.uk/infohub

Looking after your health

Full NHS medical services are available to students. The Old Aberdeen Medical Practice, a comprehensive NHS health practice, has many years of experience in providing advice and treatment to students. The Practice is independent of the University, but located close to King’s College campus in a purpose-built health centre. The Old Machar Practice is also close to the King’s College campus.

Childcare

The campus-based Rocking Horse Nursery provides childcare for pre-school age children of students and staff. The nursery has three departments which cater for 0-2, 2-3 and 3-5 year-olds respectively.

Visit www.abdn.ac.uk/rockinghorse
Student support services

Located on the top floor of the Aberdeen University Students’ Association building (The Hub), the Student Advice and Support Office provides a wide range of support and information services across three main areas: disability, international student matters, and general advice and guidance. Visit www.abdn.ac.uk/infohub/support

Disability Advisers offer information, advice and support for students and applicants with physical and mobility difficulties, visual impairments, hearing impairments, medical conditions, specific learning differences such as dyslexia, mental health conditions, and autism spectrum disorders such as Asperger syndrome. Disability Advisers can support students who are eligible to apply for the Disabled Students’ Allowance (DSA). Email student.disability@abdn.ac.uk or call 01224 273935.

International Student Advisers have a wealth of experience and are professionally trained to provide advice on immigration issues, in particular Tier 4 visa extensions and queries regarding dependants. They will refer students to external resources for guidance which is outside their areas of expertise.

British immigration legislation is complex and our immigration advice and services are regulated by the Office of the Immigration Services Commissioner. The HOST UK scheme for international students at the University is administered by the International Advisers. Email student.international@abdn.ac.uk or call 01224 273935.

Student Support Advisers provide free, confidential, independent, and non-judgemental advice to students on a range of issues, which include student loans, finance, legal issues, University procedures, benefits and personal problems. Email student.support@abdn.ac.uk or call 01224 273935.

The University Counselling Service is a free, confidential and professional service for students who have personal, social, or emotional concerns. The service is student focused and is located in Dunbar Street on the Old Aberdeen campus. Email counselling@abdn.ac.uk or call 01224 272139.

Chaplaincies

The University Multi-faith Chaplaincy is a community hub for people of all faiths and none. The team comprises Honorary Chaplains and Faith Representatives who seek to encourage the spiritual life on campus. There is always a warm welcome for all and the Chaplaincy team is committed to giving personal and pastoral care to anyone who needs it: offering a listening ear, a hospital visit and much more. The Chaplains also encourage community across the University campus and oversee University services within King’s College Chapel. Visit www.abdn.ac.uk/chaplaincy

Our obligations and yours

The University has a student charter that sets out the responsibilities of the University and of students, and gives details of various University policies and procedures. As a condition of enrolment in the University, all students are required to abide by the University’s Code of Practice on Student Discipline, as amended from time-to-time. Visit www.abdn.ac.uk/infohub/study/student-discipline
Many degree programmes at the University of Aberdeen offer the opportunity for students to spend time in another country – some degree programmes even have a built-in period of study or work abroad. We offer a wide range of options for our students to spend a structured period abroad through either the Erasmus+ or International Exchange programmes. For the majority of students, a semester or year abroad is not an additional period of study and the academic credits gained abroad will count towards your degree.

Spending time abroad not only offers the opportunity to experience life in an exciting new culture, it also offers a new perspective on your university subjects, giving you a broader understanding of academia. Studying or working abroad is an increasingly vital element of our programmes, ensuring that your degree is internationally relevant and that you graduate with the skills needed to set you apart from other graduates. Students with international experience return to Aberdeen having developed skills such as independence, cultural awareness, self-confidence and the ability to work in a multicultural team.

International exchange programme

We currently offer international exchange opportunities in North America, Latin America, Asia and Australia. Our exchange partners include some of the most distinguished state universities and private colleges in their respective countries. All students are eligible to apply for the international exchange programme with the exception of those in Medicine (students studying Medicine have the opportunity to spend at least a limited time abroad during the project-based medical elective module in year 5).

Visit [www.abdn.ac.uk/iep](http://www.abdn.ac.uk/iep)

[www.facebook.com/ExchangeStudyAbroadAbdn](http://www.facebook.com/ExchangeStudyAbroadAbdn)

[studyabroad@abdn.ac.uk](mailto:studyabroad@abdn.ac.uk)

Erasmus+ programme

Erasmus+ allows you to study or work in another European country as part of your degree programme. We have exchange links with a large number of universities across Europe. Alternatively, students are free to source a suitable internship. Destinations available depend on the degree programme – study abroad options exist within most subjects. It is possible to participate even if you do not speak another language as a number of our partner universities teach in English. Others require visiting students to have a good command of their language.

Visit [www.abdn.ac.uk/erasmus](http://www.abdn.ac.uk/erasmus)

[www.facebook.com/ErasmusAbdn](http://www.facebook.com/ErasmusAbdn)

[erasmus@abdn.ac.uk](mailto:erasmus@abdn.ac.uk)
When can I go?

Study or work placements are available for either one semester or a full academic year. Most students apply in their first year to go abroad in their second year; however, with departmental approval students may participate in their third year of study.

Students undertaking a period of residence abroad as a requirement of a degree in Modern Languages or Law with another European legal system will usually study abroad in their third year.

I consider the year that I spent abroad to be the best in my life and, if I could, I would go for one more year.  
Ireneusz Polcik  University of Oklahoma, USA.

My Erasmus year gave me an insight into another culture and improved my language skills immensely. I was able to try many different activities that I wouldn’t have had the opportunity to do anywhere else and made friends for life with people from around the world. It was an unforgettable year.  
Rebecca Scott  University of Deusto, Spain.

The city, my friends, travelling, the food, the uni life, my courses... It was one of the best years of my life.  
Barbara Merino  Lingnan University, Hong Kong.
When you start your life in Aberdeen you become part of an international community that welcomes you whoever you are and wherever you come from. We have a hugely diverse student and staff population, with 32% of our students coming from outside of the UK.

The University is home to more than 120 nationalities.
We offer:

- **Guaranteed accommodation** – all new single students are guaranteed an offer of accommodation from within our portfolio, either University-owned, or owned by one of our preferred partners, provided your application reaches us by the deadline.

- **Accommodation on, or within walking distance of, the main campus** – a range of properties are available in, or close to, to the main Old Aberdeen campus, the Hillhead Student Village and the city centre.

- **Wireless network throughout.**

- **Frequent bus service** travelling to both the main campus and the city centre, and a dedicated bus route to our Foresterhill site.

- **A central hub** within the Hillhead Student Village which offers extensive social and study facilities, including a café bar.

- **Launderettes, tennis courts and bike storage facilities.**

- **Advice and information from our Community Liaison Officer, supported by a team of Student Residents’ Assistants (SRAs)** – their job is to ensure your wellbeing and help you enjoy the student experience. As well as providing advice and guidance, the SRAs run a variety of social events throughout the year.

- **Single study bedrooms (only) with both ensuite and standard facilities available with prices to suit all budgets.** The majority of the accommodation is within five bedroom cluster flats. In addition to this, there are also three large traditional halls with shared bathroom and kitchen facilities. The University has very limited accommodation for couples and no family accommodation.

Costs and additional information

Up-to-date information on the various accommodation offered by the University (including the all-important costs) is available via our Student Accommodation Office. Visit [www.abdn.ac.uk/accommodation](http://www.abdn.ac.uk/accommodation)

When to apply

From late May onwards, applicants who have firmly accepted an unconditional or conditional offer of admission will be able to apply online for accommodation up to the application deadline. The application process allows you to make up to five choices. We endeavour to allocate first choice where possible, but this is not guaranteed.

New students are guaranteed an offer of accommodation.*

*Applicable to single students only. Offer of accommodation from within our portfolio of accommodation. See above for details.
FAQs

What are my options if my accommodation requirements are less than a full academic year?

Limited short-term lets are available, for example for one semester. Please contact us for further information. Visit www.abdn.ac.uk/accommodation

Are part-time students entitled to accommodation?

Full-time students are given priority but it is often possible to accommodate part-time students too.

How do I pay my rent?

Rent is normally paid at the start of each term. Alternatively, arrangements may be made by individual agreement to pay on a monthly basis.

Will I be housed with other first year undergraduates?

The University has dedicated undergraduate accommodation and we aim to place all first year students together where possible.

Is there a deadline for accommodation applications?

Yes, usually in August, although we recommend that you book as early as possible. Unfortunately, accommodation applications received after the deadline cannot be guaranteed.
The Aberdeen University Students’ Association (AUSA) aims to represent the vibrant student community here at the University. We strive to create an influential student community by listening to our members and changing to adapt to their needs. We think student life is better together, which is why we run events, clubs, societies and sport to bring everyone closer.

Where we are?
You’ll find our digs on campus: Ground floor of The Hub, Elphinstone Road.

Getting the student voice heard
We want you to get the best out of university life and encourage our members to speak up. We represent them to encourage positive change at the University. We also campaign on issues that benefit our members and reflect their concerns.

Sports, clubs, societies and events
Clubs and societies are a massive part of student life. Our choice of more than 130 clubs and societies is sure to give you the opportunity to meet people with similar interests and the chance to try something new. If sport is your thing, we have an additional 50 clubs devoted to different sports. We run events most months of the year, including student festivals, Scottish ceilidh nights, international events and live music nights.
New to Scotland?

If you’re new to Scotland, why not join a club or society, like the International Society? Members organise trips to Scotland’s famous tourist attractions such as Loch Ness and our whisky distilleries.

Volunteering

Volunteering in AUSA is an excellent way of widening your experience whilst at Aberdeen. It helps you to build professional skills and opens doors for new opportunities. It’s easy to get involved, whether you have one free hour or hundreds. AUSA has a tradition of students undertaking voluntary roles to deliver an excellent student experience. Volunteers provide the unrivalled personality of the organisation and are the lifeblood of the student movement on campus. Today, AUSA has hundreds of volunteers, running clubs and societies, writing for the newspaper, sitting on committees, putting on events and acting as guides for new students during freshers’ week.

Student media

Fancy a career as a radio DJ or journalist? Then this is the place to start. You could be hosting your own radio show, or seeing your name in print for the student newspaper, The Gaudie, which has been in circulation since 1934 and is one of the oldest in the UK.

Activism and elections

University politics is often the training ground for future country leaders. If you want to make a change at the University, locally or nationally then get involved in one of the many campaigning or political organisations. Or why not stand for one of the student committees?

Alcohol impact

AUSA and the University of Aberdeen are working together with the National Union of Students (NUS) to support the alcohol impact campaign. We want to raise awareness amongst students, staff, parents and the wider community of the responsible provision and consumption of alcohol. Visit www.abdn.ac.uk/cluedup

Life at Aberdeen
International students

Aberdeen has a long tradition of welcoming international students from all over the world. We have a large international community of students and staff drawn from over 120 different countries, making Aberdeen their home away from home. If you are an international student, and you wish to take a full undergraduate degree course, you must apply for entry through UCAS. The International Office is here to advise and help you before, during and after applying to study at Aberdeen. Visit www.abdn.ac.uk/study/international or email study@abdn.ac.uk

Fixed fees

The University of Aberdeen is committed to providing a fixed fee structure for international undergraduate students. This means that you will be charged the same fees over your programme of study in each year of study.

In line with UK Visas and Immigration (UKVI) advice, we advise on budgeting for £1,015 per month on top of tuition fee costs to cover living expenses throughout the duration of your study in Aberdeen. The UKVI advice is subject to change so it is important you are aware of and adhere to the most up-to-date advice on their website. Visit www.abdn.ac.uk/study/international/finance

International Undergraduate Scholarship

The University of Aberdeen International Undergraduate Scholarship is offered to all international students who are studying an undergraduate degree of four or more years (with the exception of those studying Medicine). The scholarship is to the value of the final year tuition fee: an international student studying a four year programme only pays tuition fees for the first three years of their degree. What’s more, you do not even need to submit a separate application, as all international students are eligible and this scholarship will be granted automatically, providing you meet the criteria.

Visit www.abdn.ac.uk/study/international/finance

English language

There is a set minimum entry requirement for your level of English to ensure you have sufficient language skills to cope with your studies. For more information on our English language requirements and the various English courses offered by our language centre visit www.abdn.ac.uk/study/international/english-requirements and www.abdn.ac.uk/languagecentre

Our International Centre

As a leading international university, we recognise the importance of helping our international students fully integrate in to Aberdeen, helping you to live, study and make friends during your time here. We understand that studying here is a huge investment in your future, and we are dedicated to ensuring all of our international students feel part of the University. To help you have the best possible student experience, our International Centre is designed to make you feel welcome and help you as much as possible during your transition to life in the Silver City. The International Centre is for all students, whether you are from Edinburgh, Manchester, Dubai or Texas: we are here to help you have an international experience.

The Centre is also a space where students who are either on or interested in exchange/study abroad programmes can speak with a member of staff. To find out more about study abroad opportunities, please see page 26.
The International Centre is designed to:

- Help integrate new students to the University and city through our orientation and transition programmes.
- Provide a forum for students to meet people from around the world through different activities and events, including trips around Scotland.
- Allow students to practice a variety of languages in an informal and casual atmosphere, including English, Spanish, Japanese and Arabic.
- Give students the opportunity to develop leadership skills through the volunteering programme of the centre activities team.
- Highlight to students with families the many opportunities to meet other families, and ways to get involved in the local community through ‘Global Families’.
- Present students with the various tools, maps and tips that will allow their time in Scotland and Aberdeen to be a success.

**International partnership activity**

The University of Aberdeen is a global institution with extensive links around the world. We have a number of undergraduate and postgraduate level agreements with a range of universities, sponsorship bodies and agencies. We are always expanding and developing these relationships, and are delighted these links help us welcome students from all corners of the globe. Visit [www.abdn.ac.uk/study/international/inmycountry](http://www.abdn.ac.uk/study/international/inmycountry)

For information on our foundation pathway programmes in engineering, run in conjunction with Kaplan International Colleges in Nottingham, visit [www.abdn.ac.uk/study/international/foundation-programmes](http://www.abdn.ac.uk/study/international/foundation-programmes)

**Non-graduating or visiting international students**

We welcome visiting students from all over the world. A wide range of courses are available, with the exception of Clinical Medicine. Further information, including application forms, is available at [www.abdn.ac.uk/study/international/study-abroad-and-exchanges](http://www.abdn.ac.uk/study/international/study-abroad-and-exchanges)
Life at Aberdeen

ABERDEEN GLOBAL.

Where our students come from

Our student population is represented by students from more than 120 different countries spanning all seven continents.*

Finance and funding

Students from Scotland

If you are a Scottish student living and studying full-time in Scotland, support for your living costs while at university comes from a means-tested system of repayable loans and non-repayable grants. Provided that you have not had tuition fees paid for a previous course and you are not repeating part of your programme, you do not have to contribute towards the costs of your course.

For students living full-time in Scotland, the first step to finding out more about, and applying for, financial support is to contact the Student Awards Agency for Scotland. Visit www.saas.gov.uk

Students from England, Northern Ireland and Wales

If you come to study in Scotland from elsewhere in the UK, you will be liable to pay tuition fees, but you will be able to borrow this and repay it after graduation, just as you would if studying in England, Northern Ireland or Wales.

The University of Aberdeen’s tuition fee for students from England, Northern Ireland or Wales in 2017* is £9,000 per year for all of our full-time undergraduate degrees; however, no student will pay more than £27,000 for a full four-year honours degree programme (with the exception of enhanced degrees, Medicine and Dentistry). This means that students studying with us will pay no more for their degree programme at Aberdeen than they would for a three-year degree at universities of similar standing across the rest of the UK. Visit www.abdn.ac.uk/infohub/finance/ tuition-fees

You can apply for a government loan to cover the full cost of your fees and the money will be paid directly to the University. The loan is not repayable until after graduation and you are earning a set salary.

Depending on where you live, you will also be able to apply for additional financial help, including government grants, scholarships and bursaries, and maintenance or living cost loans to help cover your living costs while at university.

For more information visit the site that applies to you:

England: www.gov.uk/student-finance

Northern Ireland: www.studentfinanceni.co.uk

Wales: www.studentfinancewales.co.uk

Non-UK students from the European Union

You may be eligible for your tuition fees to be covered by the Scottish Government, if you are:

- An EU national from a non-UK EU country
- Studying for your first undergraduate degree
- Studying full-time

To find out more, contact the Student Awards Agency for Scotland (SAAS). Visit www.saas.gov.uk

Part-time students

Charges for part-time programmes are based on the credits or courses (modules) you register for. Part-time students studying up to 75 credits (maximum) may be eligible to apply for the SAAS Part-Time Fee Grant or Skills Development Scotland (SDS) Individual Learning Account (ILA) to help towards the cost of tuition fees. Please note that you can only be awarded either an ILA or a Part-Time Fee Grant at any one time. Therefore it is important that you look at both options and decide at the beginning of the academic year which award is most appropriate for your study. Visit www.abdn.ac.uk/infohub/finance/ tuition-fees

All of the financial information you need can be found at www.abdn.ac.uk/ ugfinance

*For full information about our 2018/19 tuition fees visit www.abdn.ac.uk/infohub/finance/ tuition-fees
Scholarships and bursaries

The University of Aberdeen is committed to attracting the very best students, regardless of financial circumstances, which is why we offer a large number of scholarships. Visit www.abdn.ac.uk/ugfinance

Scholarships for students from England, Northern Ireland and Wales

Students from England, Northern Ireland and Wales may be eligible for specific RUK (Rest of UK) scholarships, allowing them to receive additional funding. These are designed to provide assistance to help students support themselves during their time here and also reward academic excellence.

Our RUK scholarships are available based on two criteria. Access scholarships are there to support those who may otherwise struggle to meet the cost of studies, while merit scholarships are designed for those who have shown considerable academic potential in their A Level results. Students meeting the criteria of both scholarships are entitled to receive both payments. These scholarships are available in addition to applicable Government loans and grants and are automatically awarded to those who meet the criteria, so there is no need to apply. Visit www.abdn.ac.uk/study/undergraduate/finance

Entrance scholarships

Each year we award entrance scholarships for undergraduate study. A number of these are generously supported by alumni, individuals and companies through the University of Aberdeen Development Trust. Most scholarships are worth at least £1,000 per year for each year of study. If successful, you will have an additional £3,000 to £5,000 – depending on the length of your degree course – to support you. The award of a scholarship does not affect the amount you can borrow under the loan arrangements or other entitlements from public funds.

All UK-domiciled applicants who are eligible for home fees, and are applying for a full-time undergraduate degree course at the University of Aberdeen, can apply.

Applicants do not have to be UK nationals and will be given equal consideration whatever their sex, race, religion or subject interest. Scholarships are only available to those who are offered and firmly accept a place at Aberdeen; however, those who have submitted a UCAS form but have not yet received an offer from the University are welcome to apply. Visit www.abdn.ac.uk/study/entrance-scholarships and www.abdn.ac.uk/funding

University scholarships

A number of additional scholarships are made available each year to students at the University. Visit www.abdn.ac.uk/study/undergraduate/scholarshipsandfunding

Other support

Our Student Support Office provides a money advice service and can advise on personal budgeting. The Aberdeen University Students’ Association’s (AUSA) Student Advice Centre can also help you find part-time work and vacation work if you need it, which won’t impact on your studies. Aberdeen’s buoyant local economy means there’s no shortage of holiday and part-time work on offer.
The University of Aberdeen has a long-standing commitment to widening access to higher education. We aim to create an outstanding and inclusive educational environment, ensuring every student has the opportunity to reach their potential. We try to raise aspirations and improve access to higher education, particularly for people from disadvantaged backgrounds.

**Summer School for Access programme**

The Summer School for Access is a six week programme providing a route into higher education for those whose current qualifications do not reflect their true potential for degree level study. It is aimed at applicants who come from low progression schools, residents in Scottish Index of Multiple Deprivation (SIMD) 20/40 areas and care leavers (other factors may be taken into consideration). Please note that the Summer School for Access does not provide an alternative entry route into Medicine, Music, English or Maths courses or entry onto teacher training programmes.

Entrance to the Summer School is by invitation only, and applicants should express a note of interest in their UCAS personal statement. Successful applicants will be notified via their UCAS conditional offer. On acceptance of this offer the University will contact offer holders. Visit [www.abdn.ac.uk/study/undergraduate/summer-school-for-access-2116](http://www.abdn.ac.uk/study/undergraduate/summer-school-for-access-2116)
Aim4Uni

Aim4Uni is a widening access to higher education scheme developed by the University of Aberdeen. It represents a new approach to supporting students in schools in the north of Scotland. Through one point of contact, Aim4Uni offers a wide range of activities and events that are designed to inform and encourage young people to make appropriate post-school study choices.

Aim4Uni supports specific secondary schools in Aberdeen, Aberdeenshire, Angus and Moray. Support is also offered to the feeder primary schools. Schools are selected on the basis of progression rates to higher education; currently all target schools have an an average of 25% progression over a three year period. Visit www.abdn.ac.uk/aim4uni

Care experienced/estranged applicants

We are fully committed to supporting care experienced and/or estranged applicants and students. The University is a recipient of the Buttle UK Quality Mark for Care Leavers. Visit www.abdn.ac.uk/study/undergraduate/care-experienced-students-and-corporate-parenting-2037

Student carers

The University of Aberdeen is also fully committed to supporting student carers who wish to study full or part-time. Visit www.abdn.ac.uk/study/undergraduate/student-carers-2038

Reach Scotland

Reach Scotland is a national project that provides information, advice and guidance on applying to high demand professional subjects. At Aberdeen the project works closely to support pupils in S4 – S6 who are aiming to study Medicine or Law by offering a range of on-campus activities, school-based workshops and Medicine and Law student liaison opportunities. Visit www.abdn.ac.uk/reach

Children's University

The University of Aberdeen supports the Children's University Aberdeen. For more information on this project, learning destinations and the graduation event which the University of Aberdeen hosts, visit www.childrensuniversityscotland.com

Financial support

For more details on the range of access scholarships and bursaries available please see page 43.

Transferring from college to university

We welcome applications for degree level study from students with HNC and HND qualifications. Applications should be submitted through UCAS and each will be considered on its individual merits. Students may be offered places in first to third year depending on their level of academic experience.

The University of Aberdeen has defined articulation routes with a number of Scottish colleges where our curriculums match closely; this allows students to enter appropriate degree courses at level two or level three, with additional support offered by the University during their college study.

We encourage all students considering continuing their education at our University to visit us. We offer open days (pre-UCAS application), an articulation day (for students at our partner colleges), offer holder days (for students who have applied to us through UCAS) and private visits (visit www.abdn.ac.uk/study/private-visits for more information). All are aimed at providing students with the necessary skills and knowledge to move smoothly into university study.

Visit www.abdn.ac.uk/study/undergraduate/college-articulation-pathways-2115 for more information about moving between college and university.
How to apply

- You should apply online to UCAS. Schools and colleges can provide advice and guidance. UCAS will accept applications for 2018 from September 2017. If you wish to contact UCAS from outside the UK, you can write to them at the address provided here, or you can visit its website.

- Your completed application should be submitted to UCAS with the applicant's fee of approximately £24. If you wish to apply for only one course at one institution, a reduced price of approximately £13 applies.

The exceptions are for part-time courses, and non-graduating or visiting students, who apply direct to the University. Visit www.abdn.ac.uk/study

Medical applicants (A100) and graduate Dental applicants (A201) must take the UKCAT Admissions Test. Visit www.ukcat.ac.uk

Closing dates

15 October 2017 for all Dental, Veterinary Science and Medicine applicants and anyone including the Universities of Oxford or Cambridge among their choices. 15 January 2018 for all other applicants.

Late applications may be considered at the discretion of the University. Priority is given to applications received by the normal closing date of either 15 October 2017 or 15 January 2018. Where vacancies exist at Aberdeen, UCAS continues to forward applications until 30 June; candidates whose applications are received at UCAS after 30 June will be automatically entered into Clearing. Visit www.abdn.ac.uk/study/undergraduate/how-to-apply

Admissions policy

For further information on our admissions policy, or to download it in full, visit www.abdn.ac.uk/study/undergraduate/admissions-policy
1. Choose your degree
Check out the programme section in this prospectus or visit www.abdn.ac.uk/study/undergraduate/degree-programmes

2. Check the entry requirements
Entrance requirements vary depending on the degree. Check out the programme section for details.

3. Check the application process
Make sure you know exactly what is required to apply for the degree.

4. Complete your UCAS application
Deadline is 15 October 2017 for Medicine and Dentistry and 15 January 2018 for all other degrees.

5. Education, Medicine and Music interviews
If you have applied for one of these degrees you may be called for an interview or audition.

6. Early 2018
We’ll be in touch to tell you if you have been made an offer (conditional or unconditional) or been unsuccessful.

7. Make your choice
Make Aberdeen your first choice by early May!

8. Your exams
For those still sitting exams: good luck!

9. Results day
If you’re waiting for results they are released in July and August and we will confirm your place if all conditions are met.

10. University starts!
Visit www.abdn.ac.uk/study and get ready to join us.
The tradition in Scotland is to admit students to a particular kind of degree (e.g. the MA or the BSc) rather than to a particular subject or course. You do have to name particular subjects on your UCAS application, but essentially we admit you to the MA degree rather than specifically to the MA in Anthropology or History or Philosophy, for example. As a result, it is possible in most cases to change your subject preference after you get here, irrespective of what you told UCAS. All single honours students and most joint honours students have the opportunity to study a foreign language as part of their degree. You can start any of the languages we offer as a complete beginner, and if you follow language courses for two years this is specially noted on your degree certificate.

In the ancient Scottish universities, the MA is a very flexible degree. In their first year, most students will study one or two (or even three) subsidiary subjects alongside their main degree subject(s), narrowing down to two subjects in second year. In their third and fourth years they can specialise in just one subject for single honours, or continue with two (dividing their timetable equally) for joint honours. Most first year classes are open to you (subject only to timetabling constraints) even if you have not studied the subject before, and this allows you to experiment with new subjects and add breadth to your academic profile.

What kind of degree?
Honours degrees normally take four years to complete, but if you have appropriate advanced qualifications in the subject(s) concerned, you may be able to come directly into second year. This would mean missing the flexibility of the first year experience, so it is a pathway that is best suited for people who have a very clear idea of what they would like to study, but it does allow you to graduate in three years. It is also possible to change, at the end of second year, from an honours degree to a designated degree (i.e. a three-year non-honours degree), if your interests change and you decide to graduate early.
Employment prospects

Arts degrees are sometimes thought of as educationally attractive but not strongly job-related. In fact, some degrees within the Arts and Social Sciences area are strongly vocational: most graduates in Accountancy, Business, Computing, Mathematics and Real Estate, for example, will have no difficulty in finding a job, and will be employed because of the knowledge and skills they have acquired at university.

As with most Science students, however, the majority of graduates in Arts and Social Sciences subjects go into careers in which they may not often use their subject knowledge directly. They nevertheless have access to a wide range of career openings, because a great many job vacancies are for holders of degrees in any subject. Employers are looking for the qualities that any good graduate will have: the ability to assimilate a lot of new information quickly; to form an opinion on it and to express that opinion persuasively in speech and writing; adaptability; good time management and the capacity to meet deadlines; independence and an ability to work reliably without supervision. Your studies – whatever the subject – are only part of the story. Employers will also be interested in how much you gained from the informal opportunities universities offer to extend your experience, take risks and show enterprise, whether in the debating chamber, on a university expedition, performing in a concert or working for a student charity campaign.

Entry requirements

With the very wide range of Arts and Social Sciences degrees, some in subjects taught in school, but many not, it is appropriate the we should have a very flexible entrance policy. Entry requirements are rarely subject-specific; we are more interested in your overall ability than in the precise content of your pre-university studies.
## Degrees in Arts and Social Sciences

Minimum entry requirements for 2018 – MA/MA (honours)

Offers of admission

Admission is competitive, and consequently precise entry requirements may vary from year to year. We have many more applicants than places, and most applicants meet our entrance requirements, so achieving the grades listed will not guarantee an offer of admission. An applicant's academic profile will normally be the most significant factor in our decision making. Additionally, certain features of the personal statement and reference may help to strengthen an applicant's case.

Typical entry requirements for all of our MA degrees are for grades of AABB at one sitting of Highers (where it is a school's policy for an applicant to take one Higher in fourth year and three more in fifth year, we count all four as being achieved at one sitting).

Our minimum requirements are for grades of BBBB at Higher.

Where applicants are taking two sittings to accumulate their qualifications, we normally look for a better performance than the above. We do not double-count a Higher and an Advanced Higher in the same subject, but we do consider that a B-grade in Advanced Higher can represent an improvement on a B-grade at Higher, so an Advanced Higher may be used to upgrade a Higher.

Applicants choosing to resit a Higher in which they achieved a grade C or below in their first sitting will normally be required to achieve an A-grade in their second attempt. If the Higher at C was achieved in S4, this policy does not apply, even if the resit is not until S6.

We are keen to encourage people from the widest possible range of backgrounds to participate in university studies, and we appreciate that not all applicants have the same opportunity to meet our typical entry requirements. For this reason we take certain "contextual information" into account when deciding on the exact grades we might require in any given case. This might include information about whether an applicant has had health problems or a disability, has been homeless, is a care leaver/estranged or a care giver, attends a school where a low proportion of pupils normally go on to higher education, lives in a relatively deprived area as defined by the Scottish Index of Multiple Deprivation, has attended or is eligible to attend widening-access programmes such as Aspire North, LEAPS, SWAP etc. Where information of this kind appears on the UCAS application, it may allow us to make an offer at our minimum level.

Foundation Apprenticeships

The University recognises that Skills Development Scotland, alongside other partners, is working with industry to increase the range of work-based learning opportunities for pupils in the senior phase of secondary schools. The development of Foundation Apprenticeships is one such initiative and this qualification will be considered alongside Highers across a range of degree programmes.

Articulation routes

The University welcomes applications for degree level study from students with HNC and HND qualifications, and has a number of college articulation routes in place which lead to advanced entry into our degree programmes. For full information contact your college, visit www.abdn.ac.uk/study/college-articulation or email study@abdn.ac.uk.
The University is a major international centre for teaching and research in all divisions of scientific study. It also has the advantage of close connections with local research institutes and the Royal Infirmary, advancing the frontiers of knowledge in areas such as environmental science, human nutrition, fisheries research and medically related sciences.

Unique facilities
Aberdeen has an unparalleled provision of buildings and equipment for science teaching and research. From the Zoology building, overlooking the University’s Botanical Garden, the impressive Fraser Noble building housing Engineering and Physics, to the striking Institute of Medical Science located at the Foresterhill site, the University has outstanding resources to sustain its teaching and research programmes.

Flexibility and breadth
The University of Aberdeen BSc degree structure is extremely flexible. When students apply, they are asked to nominate a specific degree title. However, admittance is actually to the general BSc Pure Science programme. Within this programme, students are free to change their degree intention to any of those listed in the BSc section of the prospectus. There are a few exceptions: the Biomedical Sciences, MChem, MPhys and some MSci degrees have higher entry requirements than other science degrees, and consequently formal approval is required before changing degree intention to one of these degrees.

Qualifications
Students are normally admitted to a four year honours degree programme. However, students who opt to complete their studies after one, two or three years can also receive an appropriate qualification.

The BSc can be awarded after successful completion of three full years of study. The BSc designated degree is a named variant of the BSc reflecting the fact that the curriculum has concentrated on a particular discipline in third year.

The honours BSc requires four years of full-time study. The degree classification is usually based on the student’s performance in the third and fourth year.

There are also a number of integrated Masters programmes (e.g. MChem, MPhys and MSci), which require five years of full-time study. These degrees often include an integral industrial placement.

A student who leaves the University after one, two or three years of study can apply to be re-admitted to study for a more advanced qualification.

Study and assessment
Generally, teaching is via lectures, tutorials, and laboratory classes. Depending on the subject there may also be opportunities for e-learning, field trips and group or individual projects.
Course assessment is usually a mixture of continuous assessment and written examinations. Continuous assessment may be based on laboratory reports, project dissertations, essays and other types of assignment. Written examinations are held at the end of each half-session of teaching. In the fourth year, a considerable period of time is spent on an individual research or investigative project.

**Employment prospects**

As a science graduate from Aberdeen you will be well equipped for a wide range of high-quality employment opportunities. With a good honours classification you will also be qualified for study towards a higher degree or PhD study.

Good Aberdeen graduates are highly regarded, and consequently many major employers in industry and commerce target the University in their annual recruiting exercises. An extremely high percentage of science graduates secure good jobs or further study/training opportunities within six months of graduation.

**Entrance requirements**

Our flexible curriculum allows students to change degree intention within the overall science programme on commencement of study or later. As a consequence of this flexibility, our entrance requirements are expressed in very general terms. We look for a good level of proven academic ability overall, and strength in science or mathematics subjects. Beyond this we do not usually insist on specific subjects.

In some cases, such as chemistry, physics and mathematics, previous study of the subject is usually desirable in order to cope with the first year material. A student applying for one of these degrees who does not have the required background may still be offered a place, but in this case may be directed towards one of the other science degrees for which their background provides a better preparation.

**Advanced entry**

The four year length of the degree programme provides the opportunity for the breadth and flexibility that is such a significant feature of the Aberdeen honours degree; however, for those who are well-qualified, and who are clear about their degree intention, it is possible to complete an honours degree in three years rather than four. Such students effectively join the second year of the degree programme, and during this year they study the required second year modules for their nominated degree subject, alongside a selection of other first and second year modules. Good entry qualifications are needed, at least up to the level of GCE A Level or SQA Advanced Higher, particularly in subjects that are essential for the intended degree and that would otherwise have been studied in first year. Opportunities for third year entry also exist for those with qualifications up to the level of a good HND, provided the core content of the first two years of the degree curriculum has been covered adequately. See tables on pages 56, 58 and 59 for more information.

**Enhanced Study**

You may have the opportunity to take Enhanced Study options as part of your degree and participate in co-curricular activities. See pages 20 and 21 for more information.
Degrees in Sciences (continued)

Five year degrees and industrial placements

A number of our degree programmes offer students the opportunity to study for 5 years and graduate with an undergraduate Masters degree instead of a BSc. The format of the extra year varies in each discipline but all involve either an extended research project or some time spent in an industrial, commercial or research environment where students will obtain a breadth of practical experience to complement their degree programme.

The following degrees are available as 5 year degree programmes:

- MChem
- MSci (Computing Science)
- MGeol
- MPhys
- MSci (Biological Sciences)
- MSci (Medical Sciences)

MSci Medical Science industrial placement year

All degree programmes offered by the School of Medical Sciences offer the opportunity for students to undertake a year’s placement in an industrial, commercial or research environment, provided the student successfully completes their first three years to a satisfactory standard. Students can spend the fourth year of their degree in paid employment and graduate after five years with an MSci (an undergraduate Masters Degree) instead of a BSc.

We currently have links with a number of different companies and have placed students in companies such as Novartis, GlaxoSmithKline, The Sanger Institute and NIMR, as well as a number of smaller companies both in the UK and abroad.

Why undertake a year’s industrial placement?

Employers now expect an impressive list of skills, knowledge and experience in their graduate recruits. They welcome ‘transferable skills’ acquired during a work placement, such as communication, numeracy, use of IT, group work and time management. In addition to allowing you to experience workplace culture, completing an industrial placement makes you a more effective employee following graduation. Increasingly, placements or periods of work experience are being used as a tool by employers for pre-selecting the best students for graduate roles. An industrial placement year may therefore become a passport to employment where employers consider a work placement as a central part of their graduate recruitment process.

Finding a placement

The application process for placements starts at the beginning of the academic year prior to the placement commencing. Throughout the application process students receive the full support of the Industrial Placement Co-ordinator and the University Careers Service. Students remain registered with the University during their placement year, and receive guidance and advice from a University tutor for the duration of the year in industry. At the end of their placement year students return to the University to complete their final year of study: their honours year.

A complete package!

For students wishing to maximise their career opportunities we offer the complete package of Medical Science degrees with Industrial Placement and Biobusiness. These five year MSci degrees will prepare the student for either a career in industry or a further postgraduate qualification, e.g. PhD or MBA.

For information please visit: www.abdn.ac.uk/sms/undergraduate/medical-sciences/industrial-placements
Biobusiness options

Biobusiness options introduce students to the basic concepts of business and how these can be used in conjunction with their scientific training.

Why choose Aberdeen?

The biobusiness options here at the University of Aberdeen are a unique opportunity for you as a medical scientist to find out about the commercialisation of scientific ideas. You will be given the chance to learn about the biotechnology and pharmaceutical industries and help in understanding the language of the biobusiness sector. The biobusiness options are for scientists who want to become business “savvy” while maintaining the quality of their science.

Background

The biotechnology industry is one of the fastest growing areas in the UK and at the University of Aberdeen we want to be the first in the higher education sector to train our graduates for these emerging opportunities. Scotland is often at the forefront of ground-breaking scientific achievements. Indeed, science income in Scotland by GDP is amongst the best in the world; however, when it comes to commercialisation of our science – making that critical journey from the lab to the marketplace – we could be better. In October 2009, the University of Aberdeen launched Scotland’s first programme to create the next generation of “business savvy” scientists and entrepreneurs enabled to bridge the gap between scientific excellence and commercial success.

What is biobusiness?

This exciting programme aims to introduce undergraduate students to the basic concepts of business and how these can be used in conjunction with their scientific training. The courses will give students an unprecedented insight into the rapidly expanding Medical Sciences industry – a sector where Scotland’s excellence is acknowledged around the world. We will challenge students to think about the nature of research when driven by commercial outcomes.

Why take biobusiness options?

The biobusiness programme will produce graduates who are first-class scientists but with the potential to be the next generation of bio-entrepreneurs. Many of the future recruitment opportunities for students with medical science skills will involve roles in biobusiness rather than exclusively research at the bench. Biobusiness options will broaden career opportunities, allowing successful students to pursue postgraduate training for a PhD or MBA.

Course structure

The biobusiness components will concentrate on models that relate directly to the commercialisation of science and technology. There are three courses studied as part of the biobusiness option: Introduction to Biobusiness can be taken in either first or second year; Biobusiness and Advanced Biobusiness are taken in third and fourth year respectively. The teaching is in the form of lectures, tutorials and seminars with assessment by presentation, essays and reports. Experts from biobusiness, intellectual property, law and finance will be brought in specifically to teach our biobusiness students. Students will even be given the chance to run their own virtual biotechnology company to see if they have what it takes to be a director of a business in this burgeoning sector, and to develop the skills required when pitching for funding.

For information please visit: [www.abdn.ac.uk/smmrn/undergraduate/medical-sciences/biobusiness-options](www.abdn.ac.uk/smmrn/undergraduate/medical-sciences/biobusiness-options)

* Please refer to individual course entries for specific subject requirements. Computing, Geography, Geology, Information Systems, Psychology and Technology are acceptable as Science subjects for entry purposes.

Offers of admission

Admission is competitive, and consequently precise entry requirements may vary from year to year. We have many more applicants than places, and most applicants meet our entrance requirements, so achieving the grades listed will not guarantee an offer of admission. An applicant’s academic profile will normally be the most significant factor in our decision making. Additionally, certain features of the personal statement and reference may help to strengthen an applicant’s case.

**Typical** entry requirements for most of our BSc degrees are for grades of AABB at one sitting of Highers (where it is a school’s policy for an applicant to take one Higher in fourth year and three more in fifth year, we count all four as being achieved at one sitting), and must include two science or mathematics subjects.

Our **minimum** requirements are for grades of BBBB at Higher.

Where applicants are taking two sittings to accumulate their qualifications, we normally look for a better performance than the above. We do not double-count a Higher and an Advanced Higher in the same subject, but we do consider that a B-grade in Advanced Higher can represent an improvement on a B-grade at Higher, so an Advanced Higher may be used to upgrade a Higher.

Applicants choosing to resit a Higher in which they achieved a grade C or below in their first sitting will normally be required to achieve an A-grade in their second attempt. If the Higher at C was achieved in S4, this policy does not apply, even if the resit is not until S6.

We are keen to encourage people from the widest possible range of backgrounds to participate in university studies, and we appreciate that not all applicants have the same opportunity to meet our typical entry requirements.

For this reason we take certain “contextual information” into account when deciding on the exact grades we might require in any given case. This might include information about whether an applicant has had health problems or a disability, has been homeless, is a care leaver/estranged or a care giver, attends a school where a low proportion of pupils normally go on to higher education, lives in a relatively deprived area as defined by the Scottish Index of Multiple Deprivation, has attended or is eligible to attend widening-access programmes such as Aspire North, LEAPS, SWAP etc. Where information of this kind appears on the UCAS application, it may allow us to make an offer at our minimum level.

**Scottish Baccalaureate**

The Scottish Baccalaureate qualification is a good preparation for entry to university. The qualification will be considered alongside Advanced Highers, for direct entry into year two across a range of degree programmes.

**Foundation Apprenticeships**

The University recognises that Skills Development Scotland, alongside other partners, is working with industry to increase the range of work-based learning opportunities for pupils in the senior phase of secondary schools. The development of Foundation Apprenticeships is one such initiative and this qualification will be considered alongside Highers across a range of degree programmes.

**Articulation routes**

The University welcomes applications for degree level study from students with HNC and HND qualifications, and has a number of college articulation routes in place which lead to advanced entry into our degree programmes. For full information contact your college, visit www.abdn.ac.uk/study/college-articulation or email study@abdn.ac.uk.

Five Nobel Laureates are associated with the University of Aberdeen.

Our programmes

From Archaeology to Zoology, and everything in between, we have almost 400 first degree programmes for you to choose from. Plus, nearly all of our degrees include Enhanced Study options, giving you the flexibility to learn about other topics outside of your chosen subject.
Our programmes

Accountancy

Accountancy at Aberdeen gives you thorough grounding in theory, practice and business skills, taught by experts in accounting practice, with the advantage of real-life employers and scenarios integrated in to your programme. You will gain a path to professional accreditation, and the skills, experience and attributes to give you a head start whether you aim for chartered accountancy or another option in the fast-moving world of business and finance.

Why choose Aberdeen?

• A UK top three university for the impact of world-leading research carried out by our business and management experts.

• Aberdeen is the main European centre for the oil and gas industry, and international accountancy firms, multinational companies and financial services all have offices in the city.

• Professional training facilities, including our virtual trading floor, integrating real activity in financial markets into our students’ courses.

Example degree structure

Course information is provided for guidance only and is subject to change. Core or compulsory courses are shown which are correct at the time of going to print.

Year 1

• Accounting and Accountability
• Accounting and Entrepreneurship
• The Economics of Business and Society
• Finance 1: Finance, Risk and Investment
• The Context of Business
• Professional Skills Part 1

Year 2

• Management Accounting 2
• Financial Accounting 2
• Understanding Statistics

Years 3 and 4

• Auditing
• Management Accounting 3
• Financial Accounting 3
• Accounting Theory
• Dissertation in Accountancy

More course information at
www.abdn.ac.uk/ug/accountancy
University league rankings

Career development

The majority of our students become chartered accountants in professional practice, industry or the public sector. Others choose alternative careers in management, education or banking and finance.

Recent graduate employers

• Arnold Clark
• Baillie Gifford
• Citco Corporate and Trust
• Johnston Carmichael
• Lloyds Banking Group

Accreditations

The University of Aberdeen’s courses are accredited by the Institute of Chartered Accountants of Scotland (ICAS), CIMA (Chartered Institute of Management Accountants) and ACCA (Association of Chartered Certified Accountants), which can form part of a direct path to being granted exemptions from the examinations necessary to get professional qualification status.

Graduate employment statistic

90.5% of our accountancy related graduates were in employment at the end of the 2014-15 academic year – University of Aberdeen careers data.

Careers in accountancy are in high demand globally, especially within private global industry where there is opportunity to work across countries or as a consultant and advisor upon further study.
Our programmes

Animal Behaviour

Why do wolves hunt in packs while cats hunt alone? Why do birds sing? Why do some animals have multiple mates and others only one?

Animal Behaviour is an interdisciplinary degree and field of science that examines the interactions between behaviour and biology. An organism’s evolutionary history and current environmental conditions drive behaviour, and feedback from behavioural decisions in turn drives evolutionary processes.

Our Animal Behaviour degree differs from our Zoology degree in that it includes courses from Psychology in the first two years; it also differs from Behavioural Biology in that it has a whole organism focus and less neuroscience.

Why choose Aberdeen?

- Unique programme offering study in the fields of biology and psychology – understand behaviour from all angles: evolution, development, mechanisms and adaptive significance.
- Teaching from researchers in biology and psychology gives access to the cutting edge of both subject areas.
- Academic and transferable skills are built in to the learning experience to maximise employability.
- Links with the Edinburgh Zoo provide an unrivalled opportunity to directly interact with a diverse range of animal species.
- In the REF 2014, the University of Aberdeen was 15th across the UK in Biological Sciences for research impact and 1st in the UK for Agriculture, Veterinary and Food Science.
- You will have the opportunity to get involved in research through summer research assistantships, project work and a compulsory final year research project.

Example degree structure

Course information is provided for guidance only and is subject to change. Core or compulsory courses are shown which are correct at the time of going to print.

Year 1
- Professional Skills Part 1
- Frontiers in Biological Sciences
- Introduction to Psychology I: Concepts and Theory
- Diversity of Life 1
- Ecology and Environmental Science
- Introduction to Psychology II: Concepts and Theory
- Diversity of Life 2
- The Cell

Year 2
- Biological Enhanced Skills Training
- Advanced Psychology A: Concepts and Theory
- Genes and Evolution
- Ecology
- Advanced Psychology B: Concepts and Theory
- Principles of Animal Physiology
- Zoology Field Course

More course information at www.abdn.ac.uk/ug/bio-env-sciences
Year 3

- Statistical Analysis of Biological Data
- Animal Evolution and Biodiversity
- Animal Management and Welfare
- Biological Psychology
- Behavioural Biology
- Life History Evolution

Year 4

- SBS Honours Project (Semester 1)
- Hormones and Behaviour
- Advanced Behavioural Ecology
- SBS Honours Essay

University league rankings

Career development

Graduates in Animal Behaviour can expect employment opportunities in industries such as pharmaceuticals and applied medicine, conservation and natural resource management, education and research, marketing, social media and software development, and business. This degree is also a good choice as a pre-medical degree programme for international students interested in medicine, veterinary science or dentistry.

ABERDEEN INSPIRED.

Our research facilities on campus include animal holding facilities, greenhouses, fresh and salt-water aquaria, an insectarium, molecular and analytical laboratories, and a state of the art genomics lab.
Anthropology at Aberdeen is a wide and fascinating exploration of humankind and what it means to ‘be human’, the differences in human cultures and societies and how they have developed across the world. The programme draws on the wide regional expertise of staff that ranges from the northern polar countries and their links to north-east Scotland, Tibet, Central Asia and South America. Our programme is a brilliant foundation for many careers, and scores 100% satisfaction with students.

Why choose Aberdeen?

- Research and teaching at Aberdeen are intimately linked. All members of staff are actively involved in research and this informs the teaching programme. We offer innovative ideas and a fresh vision of the subject, with an emphasis throughout on work at the cutting-edge of the discipline and research.

- Students in the honours programme are trained to become anthropologists themselves, and have the opportunity to undertake their own original ethnographic research projects.

- Our core staff specialise in regions as diverse as Canada, the Central Asian Republics, Iceland and Scandinavia, Siberia, Scotland and the UK, South America, Tibet and the Himalayas.

- A vibrant student anthropology society regularly organises academic and social events bringing together undergraduate and postgraduate students with staff outside the classroom.

Anthropology is a diverse field of study that will provide you with unique insights into the differences in human behaviour from a cross-cultural perspective.
Archaeology is the only discipline that offers its students the human past in its entirety, from the origins of our species to the events of yesterday. It is a subject that actively shapes our understanding of human past through discovery and insights made in the field, the lab or the library.

Why choose Aberdeen?

- Our staff are leading scientists, researchers and fieldworkers in Northern Europe, Scandinavia, the North Atlantic and high latitude regions from Siberia and Mongolia to North America.
- Study in a department ranked top for research in Scotland.
- Our approach is unique in the United Kingdom and draws on some of the richest archaeological resources in the world.
- Our staff are actively engaged in field projects in the north, including in Scotland itself, answering questions about the human past from the earliest colonisation of the north to later expansions.
- The department also draws on world leading research and expertise in archaeology undertaken in related subjects such as anthropology and geography.
- The modular degree system run at Aberdeen allows joint degrees in these subjects and choice and flexibility in your programme of study, allowing you to follow your own particular interests and enthusiasms.

Recent graduate employers

Year 2

- Prehistoric Britain: From Boxgrove to Bede
- Test Tubes and Trowels: an Introduction to Archaeological Science
- Past Lives
- The Archaeology of the North: Lifeways & Cultural Change

Year 3

- Geoarchaeology: Approaches to Past Human-Environmental Interactions
- Professional Archaeology I: Field Methods
- Archaeological Research Project Part I
- Professional Archaeology II: Post-excavation Analysis and Employment
- Archaeological Fieldwork Portfolio

Year 4

- Archaeological Research Project Part II
- Current Issues in Archaeology
- Bioarchaeology: Biological Approaches in Archaeology

**ABERDEEN INSPIRED.**

Archaeology at Aberdeen has a unique focus on the archaeology of the north: we study everything from prehistoric high latitude cultures to the physical remains of North Atlantic WWII battlefields.
Our programmes

Behavioural Biology

Behavioural Biology is an interdisciplinary degree and field of science that examines the bidirectional interactions between behaviour and biology. An organism’s genetic, physiological and immunological processes drive behaviour, just as an individual’s behaviour will impact on its physiological and immunological state.

Our Behavioural Biology degree differs from our Animal Behaviour degree as the focus is predominantly on Tinbergen’s questions on the mechanisms and functional significance of behaviour, and less on the evolutionary and development principles.

Why choose Aberdeen?

- Unique programme offering study in the parallel fields of biology and psychology: biologists, psychologists and neuroscientists focus on similar questions about the brain and behaviour but they approach the questions differently. The Behavioural Biology programme bridges these traditional fields and provides a new way of viewing an individual’s behaviour from multiple perspectives.

- Teaching from researchers in biology, psychology and medical fields gives access to cutting edge facilities and a diverse range of expertise.

- The curriculum is based on popular equivalent programmes in the USA.

- Academic and transferable skills are built in to the learning experience to maximise employability.

- Links with the Edinburgh Zoo and the Highland Wildlife Park provide an unrivalled opportunity to directly interact with a diverse range of animal species.

- Cross-institutional links increase access to a wide range of resources typically used in medical sciences, such as in-vivo imaging, histology and tissue cultures.

- You will have the opportunity to get involved in research through summer research assistantships, project work and a compulsory final year research project.

- At our regular careers events you will have the opportunity to listen to and meet prospective employers from outside the University, giving you excellent opportunities to get a fulfilling and challenging job in a biological field.

Example degree structure

Course information is provided for guidance only and is subject to change. Core or compulsory courses are shown which are correct at the time of going to print.

Year 1

- Frontiers in Biological Sciences
- Introduction to Psychology 1 and 2
- The Cell
- Chemistry for Life Sciences 1 and 2
- Diversity of Life 1 and 2

Year 2

- Advanced Psychology: Concepts & Theory A & B
- Genes & Evolution
- Ecology
- Principles of Animal Physiology

More course information at www.abdn.ac.uk/ug/bio-env-sciences
• Biological Enhanced Skills Training

Year 3

• Statistical Analysis of Biological Data
• Animal Evolution and Biodiversity
• Biological Psychology
• Behavioural Biology
• Neuroscience and Neuropharmacology
• Consciousness

Year 4

You will carry out a research project as well as writing an extended essay and completing four courses, three are of your choosing and can include Advanced Behavioural Ecology, Advanced Vector Biology, Molecular Ecology and Evolution, among others.

• SBS Honours Project
• SBS Honours Essay
• Hormones and Behaviour

University league rankings

In the top 25 UK universities for Biosciences – Guardian University Guide 2017.

Career development

Graduates in Behavioural Biology can expect employment opportunities in industries such as pharmaceuticals and applied medicine, veterinary practice, government education and research programmes and animal welfare.

Recent employers have included: Antarctic Survey, Charles River Laboratories, ICS Learn, National Marine Mammal Laboratory, National Trust for Scotland, Scottish Seabird Centre, the University of Aberdeen.

BSc Behavioural Biology

National student survey score

100% of our Zoology students say staff are good at explaining things – NSS 2016.

Graduate employment statistic

95% of our graduates go on to employment or further study within six months – UNISTATS 2016.

We have strong local, national and international links to industry, government bodies, charities and other research institutions.
Our programmes

 Behavioural Studies

Behavioural Studies at Aberdeen is a fascinating exploration of what ‘makes us tick’ as humans, learning from international experts in developmental, social and industrial psychology, neuroscience, memory, language and cognition. You will enjoy a supportive and stimulating teaching environment that gives you a hands-on approach to gaining the skills and grounding to succeed in any career involving ‘people’.

Why choose Aberdeen?

- The oldest School of Psychology in the UK, highly-rated and with a reputation gained over 100 years of developments in this field.

- Researchers who are leaders in their fields, regularly revealing new findings about human behaviour, including new insight on how we ‘place’ faces, how children learn empathy, and how eye movements may help identify mental illness.

- A strong focus on ‘learning by doing’, with experimental and practical work throughout your programme.

- State of the art equipment in our specialised laboratories, including technology for analysing brain images, recording eye movements and other neuroscience techniques that shed light on the workings of the human brain.

- The spectacular, award-winning Sir Duncan Rice Library with its top-class study environment, state-of-the-art technology and extensive collection of psychology publications and resources.

- A great track record for employment, with our graduates sought after by a wide range of employers for the quality of their degree and skills.

Example degree structure

Course information is provided for guidance only and is subject to change. Core or compulsory courses are shown which are correct at the time of going to print.

Year 1

- Introductory Psychology I: Concepts and Theory
- Introductory Psychology I: Methods and Applications
- Introductory Psychology II: Concepts and Theory
- Introductory Psychology II: Methods and Applications
- Professional Skills Part 1

Year 2

- Advanced Psychology A: Concepts and Theory
- Advanced Psychology A: Methods and Applications
- Advanced Psychology B: Concepts and Theory
- Advanced Psychology B: Methods and Applications

Year 3

- Psychological Assessment
- Perception
- Biological Psychology
- Developmental Psychology
- Memory and Language
- Social Psychology

Year 4

- Senior Honours Level 4 Psychology A
- Library-based Thesis Project
- Senior Honours Level 4 Psychology B

- BSc Behavioural Studies
- MA Behavioural Studies

Joint honours

- MA Behavioural Studies and Sociology
Biochemistry is the branch of science that combines biology with chemistry to study the molecules in living organisms, and how they interact with each other. Biochemists make important contributions to our understanding of how life works, leading to advances in health, agriculture and many other areas. Many advances in medicine result from progress in the biochemical understanding of disease.

Why choose Aberdeen?

- Excellent teaching: 100% of our students were satisfied with teaching on courses in Medical Sciences and 95% of our students were satisfied that staff made the subject interesting (2016 National Student Survey).
- Teaching combines core knowledge with developments at the forefront of science, allowing you to gain an understanding of life you can apply in many different areas.
- Teaching staff are actively involved in world-leading research at the Institute of Medical Sciences, a dedicated research facility.
- Research projects provide you with the opportunity to experience working in a research focused laboratory environment.
- You will receive training in both science and employment-related skills.
- Innovative and flexible teaching allows you to follow special interests.
- Opportunities for gaining (paid) experience in industry are available to you during the degree programme.

Single honours

BSc Biochemistry

MSci Biochemistry with Industrial Placement
(for entry requirements see page 59)

“My degree in Biochemistry at Aberdeen helped me gain an understanding of how the body works at a molecular level. This has been hugely advantageous when going into the technicalities of the products and services I promote in my job.”

Muzzamil Ali, Senior Sales Executive and Intravascular Specialist, graduated 2013.
Our programmes

Biological Sciences

The BSc and MSci programmes allow you to choose from a broad range of subjects, while ensuring that you take advantage of our core knowledge and skills-based courses that all students take. You will develop a broad understanding of the nature of living things, from molecules and cells to organisms and populations, communities and biomes, but, crucially, you will also become a specialist in the area that is of most interest to you.

The five year undergraduate Masters (MSci) programme is aimed at applicants who wish to graduate with a qualification that goes beyond the traditional four year honours degree. The additional year helps you to develop your research skills during an extended laboratory or field-based project.

Why choose Aberdeen?

- Our researchers work on birds, mammals, and invertebrates in terrestrial and marine environments and plants in all environments from alpine to the tropics.
- You will benefit from the extraordinary breadth of teaching and research we have to offer in everything from advanced molecular research in the laboratory to pioneering field work in the mountains, deep sea and tropics.
- You will gain invaluable experience from attending at least one of our highly-rated residential field courses in the Cairngorms, Shetland, Yorkshire, Spain or at one of our own facilities, namely Oceanlab on the Ythan Estuary, The Lighthouse (Sea Mammal Research Centre) on the Black Isle, and the field centre at Bettyhill, on the north coast of Sutherland.
- You will have the opportunity to get involved in our research through summer research assistantships, project work and a compulsory final year research project.
- At our regular careers events you will have the opportunity to listen to and meet prospective employers from outside the University, giving you excellent opportunities to get a fulfilling and challenging job in a biological field.

Example degree structure

Course information is provided for guidance only and is subject to change. Core or compulsory courses are shown which are correct at the time of going to print.

- Ecology and Environmental Science
- The Cell

Year 2

- Biological Enhanced Skills Training (BEST)
- Genes & Evolution
- Ecology
- Principles of Animal Physiology or Plants, People and the Environment

Year 3

- Statistical Analysis of Biological Data
- Animal Evolution and Biodiversity
- Environmental Physiology or Plant-Environment Interactions

More course information at www.abdn.ac.uk/ug/bio-env-sciences
Year 4
• Honours Project
• Honours Essay (4 year BSc)
• Grant proposal (5 year MSci)

Year 5 (MSci only)
• Research Project
• Public Communication of Science
• Plus two options from our MSci programmes

Career development
Grades find full-time employment in a wide range of careers. Typical employers include universities, research institutes, Government agencies (e.g. SEPA, SNH), environmental consultancies, charities (including WWF and RSPB), the NHS, libraries and commercial enterprises in aquaculture, animal nutrition and animal health. One of the great advantages of having a Biological Sciences degree from the University of Aberdeen is that it provides you with a very broad range of skills to offer employers. Not only do we train students in scientific methodology in the laboratory and in the field, we incorporate what we call 'graduate attributes' into the whole curriculum. Employers now expect an impressive list of skills, knowledge and experience in their graduate recruits and we aim to help you acquire these.

Recent graduate employers
• Environmental Consultancy
• Environmental Protection Agency
• Natural England
• National Trust for Scotland
• PhD studies at higher education institutions
• Royal Society for the Protection of Birds
• Science Communication (e.g. Scubazoo)
• Scottish Natural Heritage
• Scottish Seabird Centre

Graduate employment statistic
95% of our Biology related graduates go on to work and/or study within six months – Destinations of Leavers from HE Survey 2016.

“I enjoyed scientific research in my honours year and wanted to continue. The MSci allowed me to work with world-class researchers and helped me improve valuable skills like science communication. The MSci has prepared me for a PhD in the future.”
Michael Gallagher, Biological Sciences MSci.
Our programmes

Biology

Our degree in Biology requires you to develop a broad understanding of the nature of living things, from molecules and cells to organisms and populations, communities and biomes but, crucially, it also allows you to become a specialist in the area that is of most interest to you. Your courses (modules) will give you an excellent foundation in the theory and practical elements behind the study of life and provide you with the technical skills to pursue your own interests through your project work. You will graduate with a deep understanding of terrestrial and marine environments and the wealth of organisms that live there.

Why choose Aberdeen?

- Having over fifty members of staff with different research interests means that later in your degree you can work within one of our research groups, carrying out cutting-edge research in an area of biology that attracts you.
- Our researchers work on birds, mammals, invertebrates in terrestrial and marine environments and plants in all environments from alpine to the tropics.
- You will benefit from the extraordinary breadth of teaching and research we have to offer and have the opportunity to get involved in everything from advanced molecular research in the laboratory to pioneering field work in the mountains, deep sea and tropics.
- You will gain invaluable experience from attending at least one of our highly-rated residential field courses in the Cairngorms, Shetland, Yorkshire, Spain or at one of our own facilities, namely Oceanlab on the Ythan Estuary, Sea Mammal Research Centre on the Black Isle, and the field centre at Bettyhill, on the north coast of Sutherland.
- You will have the opportunity to get involved in our research through summer research assistantships, project work, and a compulsory final year research project.
- At our regular careers events, you will have the opportunity to listen to and meet prospective employers from outside the University, giving you excellent opportunities to get a fulfilling and challenging job in a biological field.

Year 4

You will carry out a research project as well as writing an extended essay and completing four courses of your choosing. The research project can be undertaken in any of the biological disciplines.

Career development

Biology courses are designed to provide a broad set of specialist and generic skills. A considerable number of graduates continue their education by reading for higher degrees. Graduates find full-time employment in a wide range of careers. Typical employers include universities, research institutes, Government agencies (e.g. SEPA, SNH), environmental consultancies, environmental charities, the NHS, and commercial enterprises in aquaculture, animal nutrition and animal health. Not only do we train students in scientific methodology in the laboratory and in the field, we incorporate what we call ‘graduate attributes’ into the whole curriculum. Employers now expect an impressive list of skills, knowledge and experience in their graduate recruits and we aim to help you acquire these.

“...One of my highlights of first year has to have been the optional field courses at the start of summer. It felt great to be out there in the field, conducting experiments and keeping a scientific notebook.”

Holly Pfeiffer, Biology BSc.
Our programmes

Biomedical Sciences

Biomedical Scientists bring together a broad range of subjects including anatomy, biochemistry, developmental biology, molecular biology, pharmacology and physiology. These combine to generate powerful multidisciplinary approaches to help unravel the problems associated with human diseases and to develop medicines and therapies to treat them. Biomedical Scientists are, therefore, often found at the cutting edge of medical research.

Why choose Aberdeen?

• Our degrees provide you with the scientific content of pre-clinical medicine plus the opportunity to study cellular processes from the whole-body perspective.

• You will gain a thorough grounding in the core medical sciences and a specialism chosen from anatomy, developmental biology, molecular biology, pharmacology and physiology.

• Biomedical scientists in Aberdeen have made major medical advances, including co-discovery of insulin (receiving a Nobel Prize) and discovery of the brain’s morphine-like chemicals: the endorphins.

• You will acquire core skills and knowledge vital to the modern workplace which will also provide you with the ideal training for progression to graduate programmes in medical research, medicine, dentistry and other healthcare professions.

• Excellent teaching: 100% of our students were satisfied with teaching on courses in Medical Sciences and 95% of our students were satisfied that staff made the subject interesting (2016 National Student Survey).

• Modern teaching facilities and laboratories will enhance your learning and provide you with an opportunity to experience working in a research focused laboratory environment.

Example degree structure

Course information is provided for guidance only and is subject to change. Core or compulsory courses are shown which are correct at the time of going to print.

Year 1

• Introduction to Medical Sciences
• Chemistry for Life Sciences 1 and 2
• The Cell
• Professional Skills Part 1

Year 2

• Human Anatomy 1 and 2
  (Dissection of Human Cadaveric Material)
• Physiology of Human Cells
• Physiology of Human Organ Systems
• Molecular Biology of the Gene
• Energy for Life (Biochemistry)

Year 3

Specialised courses in:

• Anatomy
• Developmental Biology
• Molecular Biology
• Pharmacology
• Physiology

Year 4

One half of the year explores biomedical topics within your chosen specialist discipline. The other half comprises a full-time, ten-week research project within a research institution, experiencing original research work in an active environment.

For entry requirements for the MSci degrees in Biomedical Sciences, see table on page 58.

We recently re-built and modernised our teaching lab space dedicated to practical teaching at years 1, 2 and 3.
**Biotechnology**

Biotechnology is a technology based on the unique properties of biological molecules, cells and organisms, and provides new ways of diagnosing disease, producing antibiotics, pharmaceuticals and chemical feedstocks for industrial processes, reducing industrial contamination of the environment and improving food safety.

The study of biotechnology at Aberdeen involves the study of microbiology, biochemistry and genetics. Knowledge of all three subjects is crucial in an area where microorganisms are frequently being genetically engineered to perform novel or enhanced biochemical reactions, and will become increasingly important as synthetic biology is used throughout biotechnological processes.

**Why choose Aberdeen?**

- Excellent teaching: 100% of our students were satisfied with teaching on courses in Medical Sciences and 95% of our students were satisfied that staff made the subject interesting (2016 National Student Survey).
- You will gain a broad base of knowledge regarding biotechnology at the molecular and cellular levels.
- First-class courses in Biochemistry, Genetics, Microbiology and Immunology.
- Innovative and flexible teaching allowing you to follow your particular interests.
- The University has a strong reputation in spinning out biotechnology start-up companies. For instance, there are over 30 patents worldwide pending or granted for their immunisation technology developed from shark immune systems.
- You will have opportunities for gaining (paid) experience in industry.
- Training is provided in both specialist and employment-related skills.

We are one of the top 10 UK universities for spin-out company formation.
Business Management

Business Management at Aberdeen explores the theory and practice of how people and organisations are managed in a highly competitive global business environment. You will benefit from real-life scenarios and the input of national and local employers, giving you the skills, experience and attributes for a head start across a wide range of careers in the international business world.

Why choose Aberdeen?

- UK top three University for the impact of the world-leading research being done by our academics in business and management.
- By studying Business Management at Aberdeen, you will gain a qualification from one of the top 1% of universities in the world.
- Our research centres, including ACREEF (the Aberdeen Centre for Research in Energy Economics and Finance) headed by leading international petroleum economist and author Professor Alex Kemp, adviser to the Scottish Government.
- Aberdeen is home to CELMR (the Centre for European Labour Market Research) which leads research in education, skills and labour markets.
- Professional training facilities, including our virtual trading floor, integrating real activity in financial markets into our students’ courses.
- A Business Management programme which perfectly balances theory and practical work, with strong links to local and global businesses giving you cutting-edge insights in to the subject.
- Aberdeen is the main European centre for the oil and gas industry, and international accountancy firms, multinational companies and financial services all have offices in the city.

Example degree structure

Course information is provided for guidance only and is subject to change. Core or compulsory courses are shown which are correct at the time of going to print.

Year 1

- Managing Organisations
- The Economics of Business and Society
- Accounting and Entrepreneurship
- The Context of Business
- Professional Skills Part 1
- Academic Writing for Business

Year 2

- Managing Customers and Markets
- Operations Management
- Understanding Statistics
- 60 credits of optional courses

Years 3 and 4

Specialised management courses for honours students have a mixture of compulsory and elective courses in subjects such as: Research Methods for Business, Human Resource Management, Business Ethics, New Venture Development, Business Modelling, Consultancy & Change, and Understanding & Managing Behaviour in Organisations. The courses we offer are based around our staff’s specialist research areas. Honours students will complete a dissertation in Business Management (or in their other joint honours subject).

“ABERDEEN INSPIRED.”

“The University of Aberdeen is making me more marketable – this is something I can put on my CV to say I can already work on a Thomson-Reuters terminal, I am already used to working with all these tools and data.”

Tobias Bullas, graduating student of 2016.
Celtic and Anglo-Saxon Studies

Celtic and Anglo-Saxon Studies at Aberdeen is an exciting new programme, building on a strong track record of Celtic teaching to offer a fascinating, flexible and interdisciplinary study of the Celtic, Anglo-Saxon and Scandinavian peoples. You will cross traditional boundaries of literature, history and culture, and develop skills which open wide career options across the arts, media and more.

Why choose Aberdeen?

- A unique programme in Scotland, emphasising critical thinking and small-group discussion, to gain in-depth knowledge of history, literature and languages, plus transferable skills to boost your employability.
- All teaching is on the beautiful, Medieval King’s College campus, and the surrounding countryside is rich in archaeological and historic remains of Scotland’s Celtic and Nordic past.
- Academic staff are leading international researchers who have published widely on Celtic, Anglo-Saxon, and Scandinavian literature and history, revealing new discoveries and debunking popular myths.
- A vibrant Celtic Society, one of the oldest, most famous and liveliest student societies in the University, organising social and cultural events, including Welsh and Irish-themed evenings and traditional music sessions.
- Small class sizes and plenty of group discussion and individual attention, with opportunity to explore your thoughts and ideas with staff and fellow students.

Example degree structure

Course information is provided for guidance only and is subject to change. Core or compulsory courses are shown which are correct at the time of going to print.

Years 1 and 2

- Academic Writing for Language & Literature
- Professional Skills Part 1
- Barbarians, Romans, Gods and Warriors
- Arthur in Medieval Celtic and Scandinavian Literature
- Vikings in Celtic and Germanic Scotland
- Love, Loss and Revival: Gaelic Ireland, 1700 to the Present
- The Celts, their Neighbours, and the Classical World
- Intermediate Latin 2
- Latin Language and Literature 1

Years 3 and 4

The degree culminates in the writing of a dissertation, in which the student undertakes a substantial research project on a subject of their own choice.

Courses offered include:

- Old Gaelic
- Medieval Welsh
- Old English language
- Tales of Vengeance and Enchantment: The Heroic Age in Irish and Icelandic Saga Literature
- Celtic and Anglo-Saxon Kingship and the Exercise of Authority in the Earlier Middle Ages
- Dangerous Liaisons: Love, Sex and Romance in the Celtic West and the Old North
- Celtic Myth in the Modern World: From Ossian to the New Age
- Celtic and Anglo-Saxon Poetry

ABERDEEN
INSPIRED.

Celtic and Anglo-Saxon Studies is an interdisciplinary programme, unique in Scotland, that allows you to study the culture and people of the past - with an impressive 93% of students saying they were satisfied with the course – UNISTATS 2016.
Chemistry

Chemistry students perform practical work with state-of-the-art instrumentation. Our staff includes internationally recognised researchers in material, biomolecular and environmental chemistry.

Why choose Aberdeen?

- Chemistry has been taught at Aberdeen for over 200 years and we were one of the first universities to introduce chemistry as a subject in its own right.

- Industries need a steady supply of skilled Medicinal Chemists, Synthetic Chemists, Analytical Chemists and Environmental Chemists.

- As an institution directly linked into the oil and gas industry here in Aberdeen, our Oil and Gas Chemistry degree provides the perfect platform to this industry.

- The MChem is seen as the flagship degree, and entry into the final two years is dependent on achieving at least an upper second class honours level of performance in third year.

- A feature of our MChem route is a final year four month research project placement in the area of specialisation, usually at an overseas university, research institute or industrial laboratory.

- 80% of our research in chemistry was rated as ‘world leading’ or ‘internationally excellent’ at 2014 REF.

Example degree structure

Course information is provided for guidance only and is subject to change. Core or compulsory courses are shown which are correct at the time of going to print.

Year 1

Our programmes

Computing (MA) and Computing Science (BSc)

Are you a computer whizz who enjoys digital information? Do you try to understand how computer systems work? Have you tried different computer languages to invent your own interface? Do you want to get into Big Data, Machine Learning, the Internet of Things and smart technologies? This programme will provide you with a solid foundation in a subject area that is in high demand, giving you skills in programme languages, data management, different systems, robotics and problem-solving.

Why choose Aberdeen?

• Computing graduates develop an ability to understand new and complex computer systems.

• At the University of Aberdeen, we give you every opportunity to broaden your horizons and develop the professional and personal skills and attributes you will need to build a successful career.

• The high quality of our degrees combined with our strong focus on employability open up a wide range of career options.

• Students benefit from the international reputation of the University’s Computing Science department, and strong links with industry.

• Flexible degree programmes available with options to suit your needs.

• Broad range of study abroad partner universities available so you can spend a period of time experiencing another culture and country during your studies.

• The Aberdeen Software Factory, a student-run software house where you can gain experience working on larger software projects and benefit from work experience by helping work with the factory’s clients.

“My placement year with Wincom was more than I could have hoped for. On top of all this, I have gotten the opportunity to return and work there after graduation, so I can very easily say that this has been an invaluable experience for me.” Vlad-Tudor Marchis, graduated 2016.
Our programmes

Conservation Biology

Conservation Biology focuses on the skills you need to explore strategies for conserving biodiversity in the face of rapid increases in human impacts on the planet. You build on expertise in ecology, zoology, plant and soil science, evolution and genetics and learn about the arguments and the effectiveness of different approaches to conservation, developing a conceptual and practical understanding of conservation.

Why choose Aberdeen?

- In the School of Biological Sciences the strong disciplines of Zoology, Ecology and Plant and Soil Science form the basis of the course with contributions from a range of other disciplines.
- Staff are active in conservation research and the development of policy, and work in close collaboration with a wide range of external organisations.
- Students benefit from field course teaching throughout the programme in a diversity of environments. There is a specific field course to explore conservation issues across Scotland and students may also participate in other field courses in Scotland and overseas (for example, in Germany or the Mediterranean).
- Our conservation scientists advise the UK Government on conservation conflicts (Prof Steve Redpath), climate change mitigation (Prof Pete Smith) and critical loads for air pollutants (Dr Sarah Woodin).
- In the REF 2014, we were 15th across the UK in Biological Sciences for research impact.

University league rankings

In the top 25 UK universities for Biosciences – Guardian University Guide 2017.

Career development

One of the great advantages of having a Biology degree from the University of Aberdeen is that it provides you with a very broad range of skills to offer employers. Not only do we train students in scientific methodology in the laboratory and in the field, we incorporate what we call ‘graduate attributes’ into the whole curriculum. Employers now expect an impressive list of skills, knowledge and experience in their graduate recruits and we aim to help you acquire these.

Many career possibilities are open to graduate Conservation Biologists. Our graduates have gone on to work in UK conservation agencies, National Parks, national and international NGOs, environmental consultancy, environmental protection agencies, environmental law, environmental education, industry, local government environmental departments and research.

As a Conservation Biologist you will be in increasing demand in similar posts with an edge over more traditionally qualified graduates. With your scientific training you will also be in demand for jobs requiring general graduate abilities.

Recent graduates have been employed as:

- Conservation Biologist
- Conservation Scientist
- Environmental Lawyer
- Environmental Protection Officer
- Nature Conservationist
- Researcher

“\n
I’m currently doing a PhD funded by NERC and Natural England, investigating the impacts of prescribed burning on blanket bog vegetation and Sphagnum re-establishment. My studies in Aberdeen helped me to get the job by providing the needed skills.”

Alice Noble, PhD student.
Our programmes

Dentistry

Dentistry at Aberdeen is designed specifically for graduates, capitalising on the knowledge and skills you already have to ensure you become a first-class dental professional.

Why choose Aberdeen?

- The University of Aberdeen Dental School offers the only graduate entry, four year, BDS programme in Scotland.
- The programme has been designed specifically for graduates and encompasses a variety of modern educational methods for teaching and learning. There is a focus on more independent and reflective learning, and clinical work is introduced from year one to maximise clinical experience.
- The Dental School is a modern, purpose-built facility with state-of-the-art equipment and teaching facilities.
- You will be part of a wider community of students who study on the Foresterhill health campus, including medical and science students, undergraduates and postgraduates.
- You will have excellent student support systems and access to other shared facilities such as the medical/dental library and the Suttie Centre for Teaching and Learning in Healthcare.
- The University and NHS Grampian continue to invest in new facilities on the Foresterhill campus, demonstrating the commitment to the training and education of healthcare professionals.
- All students also spend some time in purpose built outreach facilities in Elgin (NHS Grampian) and in Stornoway (NHS Western Isles) which provide our senior dental students with excellent real-life experience in the community dental setting.

Example degree structure

Course information is provided for guidance only and is subject to change.

Year 1

In year 1 you will develop a sound understanding of the oral environment, basic aspects of dental health and disease, together with an appreciation of the principles of patient management, communication and ethical practice. You will begin practical training in the clinical skills lab and have direct patient contact in your second term.

Year 2

In year 2 you will have clear understanding of the clinical relevance of the subjects you are learning. You will develop reflective skills in relation to your learning and further develop your clinical and communication skills in the restorative clinics. This regular patient contact is supported by training in the clinical skills lab and will develop your clinical experience in a variety of settings.

Year 3

In year 3 you will continue to develop the ability to apply your knowledge to clinical situations. You will be able to assess the needs of patients and tailor your knowledge to match these. You will be introduced to working within the paediatric, emergency and special care clinics. You will have the opportunity to enhance your clinical skills and patient management in outreach placements and with a number of visits to observe clinicians working in specialist areas of dentistry.

Year 4

In year 4 you will hone and apply diverse and multiple areas of knowledge within integrated oral care. This will include team working, ethical applications and management skills. You will be expected to complete and present several full and complex cases to demonstrate a high level of clinical skill and understanding.

More course information at [www.abdn.ac.uk/ug/dentistry](http://www.abdn.ac.uk/ug/dentistry)
Career development

Our programme will lead to full General Dental Council (GDC) registration. Following vocational training, a dentist may work as an associate, partner or principal in general practice, join the community dental service, the armed forces dental service, work in a hospital with a view to becoming a consultant, or become a clinical academic contributing to the training of the next generation of dental graduates.

Recent graduate employers

National student survey score

100% of students said that staff made the subject interesting – NSS 2016.

Graduate employment statistic

100% of graduates employed 2013-2015 – University of Aberdeen careers data.

Minimum entry requirements

• Graduate entry only: A first or upper second-class honours degree in medicine, medical science or a health-related degree (such as biomedical science, biochemistry, pharmacy).
• Undergraduates who are in their final year of study on an honours degree programme must ensure that their academic reference includes a prediction of their expected degree classification. We cannot consider an undergraduate whose application form lacks this information.
• We cannot accept applications from international students at this time.
• Non-academic requirements: Your work experience, hobbies and other non-academic activities are taken into account in the application process. Visit www.abdn.ac.uk/smmsn/undergraduate/dentistry/non-academic
• UK Clinical Aptitude Test (UKCAT): The University of Aberdeen Dental School uses the UKCAT to help select applicants for our programme. All candidates must complete the UKCAT by the appropriate closing date for that year’s entry. Visit www.ukcat.ac.uk

Single honours

BDS Dentistry

“It has been great. The course is really hands-on, so it’s the fact that when you’re going in you are learning a new technique almost every other week.”

Alan Purves, graduated 2015.
Divinity (BD and BTh)

Divinity at Aberdeen focuses on the study of the Christian faith and tradition in the context of its history, its beliefs and practices, and its role today. Whether you have a vocational or intellectual interest in learning more about Christianity, Aberdeen is the place for you. Our degrees in Divinity are accredited by the Church of Scotland, and teach transferable skills which open a wide range of career options in addition to ministry.

The Bachelor of Divinity degree (BD) is designed for students who are looking for specialised and comprehensive study of the Christian tradition, or who are preparing for a future in the Church of Scotland. The study of the biblical languages (Hebrew and Greek) by candidates for this degree is encouraged, but not compulsory. The designated degree of BD normally takes three years and the honours degree normally takes four years.

The Bachelor of Theology degree (BTh) is designed to be more flexibly structured than the BD. It provides greater opportunity to take courses in Religious Studies and to combine the study of Theology with subjects in other disciplines in the early years of the programme. It is particularly suited to the needs of those considering teaching religious and moral education in schools. The BTh can also be taken via distance learning.

Why choose Aberdeen?

- Our department is host to an international community of respected scholars, studying various aspects of theology and ministry studies.

- Our department is home to specialist research and teaching centres including the Centre for Ministry Studies, the Centre for Spirituality, Health and Disability, and the Kairos Forum for people with cognitive or intellectual disabilities.

- You will receive a warm welcome, and have access to excellent library facilities including the award-winning Sir Duncan Rice Library and the historic Divinity Library.

- Our department exists in beautiful surroundings, including the stunning King’s College Chapel, the construction of which was started in 1495 by Bishop Elphinstone, founder of the University.

Example degree structure

Course information is provided for guidance only and is subject to change. Core or compulsory courses for BTh are shown which are correct at the time of going to print.

Year 1

- Academic Writing for Divinity, History and Philosophy
- Professional Skills Part 1
- Sacred Rites and Worship

The University of Aberdeen has a tradition of study and excellence in Divinity dating back to 1495, producing notable scholars and theologians, including John Forbes, George Campbell, William Milligan, William Robertson Smith, David S Cairns and G D Henderson.
Interested in wildlife and natural ecosystems, the relationship between the natural world and people, the impacts of climate change and other environmental problems? An Ecology degree at Aberdeen will enable you to explore the science of all these topics, taught by experts who are actively involved in ecological research and its applications to environmental management and nature conservation.

Why choose Aberdeen?

- This degree combines the biology and ecology of plants, animals and ecosystems, with the opportunity to include our particular specialisms in marine biology and conservation biology in your curriculum.
- The degree is taught by a wide range of staff who are active in field ecological research from the tropics to the Arctic, and from the deep sea to the mountain tops; our teaching reflects our research and is always up-to-date and relevant.
- Students have the opportunity to get involved in our research through summer research assistantships and project work.
- Ecology students attend at least two residential field courses selected from our range of courses in the Cairngorms, Shetland, Yorkshire, Spain and at our own Oceanlab on the Ythan Estuary, sea mammal research centre on the Black Isle, and field centre at Bettyhill, on the north coast of Sutherland.
- Students benefit from contact with practising ecologists from a number of research and conservation organisations based in and around Aberdeen.
- At our regular careers events you will have the opportunity to listen to and meet prospective employers from outside the University, giving you excellent opportunities to get a fulfilling and challenging job in a biological field.

Example degree structure

Course information is provided for guidance only and is subject to change. Core or compulsory courses are shown which are correct at the time of going to print.

Career development

Our Ecology degree provides you with academic training and transferable skills relevant to both specialist employment in ecology and the wider biology graduate job market. Our graduates have gone on to develop specialist careers in ecological research, nature conservation, local government, environmental protection, forestry, ecological consultancy, environmental law, outdoor education and the media.

One of the great advantages of a degree from the University of Aberdeen is that it provides you with a very broad range of skills to offer employers. Not only do we train students in scientific methodology in the laboratory and in the field, we incorporate what we call ‘graduate attributes’ into the whole curriculum, including communication, working with others, use of specialist IT and time management.

Students in the School of Biological Sciences have the opportunity to collaborate with external organisations such as Scottish Natural Heritage and RSPB, for example whilst undertaking an honours project. In addition to allowing you to develop a valuable link with a potential employer, this gives you the opportunity to experience the application of your learning in the ‘real world’ and to develop a range of skills, all of which will make you a more effective employee following graduation.

“I thoroughly enjoyed my time at the University of Aberdeen as I was able to explore a wide range of subjects encompassing many different areas of natural history, giving me a great knowledge base which helped my career.”

Kirsty North, Scottish Natural Heritage, graduated in 2013.
Economics

Economics at Aberdeen gets to grips with the global economy and the factors that influence wealth from a social and financial perspective, taught by leading economists. You will gain a thorough understanding of economic theories and models and explore how they work in the real world, gaining skills that will be very attractive to top employers.

Why choose Aberdeen?

- An excellent teaching environment, committed to the needs of industry, which integrates research into teaching, grows transferable skills and develops intellectual skills on a range of contemporary economic problems.
- Thriving student societies, organising annual trips to international economic institutions including the European Union in Brussels, the European Central Bank in Frankfurt and the Organisation for Economic Co-operation and Development in Paris.
- Enterprise Campus, a new initiative to nurture entrepreneurial skills and support students wanting to progress their own business ideas.
- ACREEF (the Aberdeen Centre for Research in Energy Economics and Finance) headed by leading international petroleum economist and author Professor Alex Kemp, adviser to the Scottish Government.
- Home to CELMR (the Centre for European Labour Market Research) which leads research in education, skills and labour markets so topical today.
- The spectacular, award-winning Sir Duncan Rice Library, with brilliant study facilities, state-of-the-art learning technology, and an extensive collection of reference books, journals and other media for economics and business studies.

Major-Minor honours

LLB Law with options in Economics

National student survey score

87% overall student satisfaction – NSS 2016.

Our Business School has a well-established tradition of research in applied economics, particularly in the areas of labour and energy. We also have research interests in macroeconomics, the economics of health and well-being and experimental economics.
Our programmes

Engineering

We are Scotland’s number one School of General Engineering (and tenth in the UK) according to The Complete University Guide 2016/17. We offer an exceptional range of BEng and MEng Engineering programmes, all following a “general engineering” approach in years one and two.

Why choose Aberdeen?

• The first two years you study general engineering, with elements of Chemical, Civil, Electrical/Electronics, Mechanical and Petroleum Engineering. This means you have vital knowledge of all areas – making you far more adaptable in employment.
• Programmes reflect a ‘systems engineering’ approach in modern industry.
• World-class facilities, including laboratories dedicated to areas of work such as: biochemical engineering and water treatment; catalysis; computer aided design; concrete; electrical machines; electrochemical engineering and fuel cells; enhanced oil recovery; environmental and civil engineering hydraulics; geotechnics; HVDC networks; large materials testing and characterisation (including Micro-CT); satellite communications; sub-surface flow and transport; and thermophysics.
• Our philosophy is one of world-class teaching in an atmosphere of research. Staff in the School have won national research and teaching awards. Strong links with industry ensure teaching has up-to-date industrial relevance and provides work-ready graduates who are able to contribute within the wider society.
• The School has produced thousands of career-ready graduates over the decades, many who have progressed into Managing Director and Chief Executive roles in the oil and gas and wider engineering industries.
• Our strong working links with local, national and international industry allow students to get the chance of experiencing real-life industry challenges and projects through guest lectures, site visits and networking.
• Accreditation by the relevant professional engineering institutions provides the first steps to becoming a Chartered Engineer (CEng). Students intending to pursue an engineering career are encouraged to consider student membership of the relevant professional engineering institution.
• Our award winning Society of Petroleum Engineers (SPE) Student Chapter is one of the 230 student chapters around the world. We build strong relationships with members and non-members alike, and help you gain insight into the oil and gas industry.
• We support student-led projects, such as the TAU Racing Formula Student Team, which sees students from all years and disciplines in the School of Engineering working together to design and build a single seat car to compete in national and international competitions.

More course information at www.abdn.ac.uk/ug/engineering

ABERDEEN INSPIRED.

Each year the TAU Racing Team aims to design and build a single seat racing car to compete at Silverstone in the Formula Student competition.
Example degree structure

Course information is provided for guidance only and is subject to change. Core or compulsory courses at time of going to print are shown.

Year 1

- CAD and Communication in Engineering Practice
- Engineering Mathematics 1
- Fundamental Engineering Mechanics
- Fundamentals of Engineering Materials
- Principles of Electronics
- Professional Skills Part 1

Courses which may be taken to allow honours specialisation in specific disciplines:
- Chemistry for the Physical Sciences 1
- Chemistry for the Physical Sciences 2
- Electronics Design

Year 2

- Design and Computing
- Electrical and Mechanical Systems
- Engineering Mathematics 2
- Fluid Mechanics and Thermodynamics
- Process Engineering

Courses which may be taken to allow honours specialisation in specific disciplines:
- Electronic Systems
- Energetics of Change in Chemical and Biological Systems
- Introduction to Geology for Petroleum Engineers
- Organic and Biological Chemistry

Years 3, 4 and 5

- Courses according to chosen degree discipline
- Honours Individual Project
- Group Design Project

From third year, you will study courses that are more specific to your chosen discipline. For example, if you choose Mechanical Engineering, the courses you study will focus primarily on Mechanical Engineering.

University league rankings

Number 1 in Scotland for General Engineering and 10th in the UK – Complete University Guide 2016/17.

Recent graduate job roles

- Engineering Project Manager
- Graduate Chemical Engineer
- Graduate Civil Engineer
- Graduate Electrical Engineer
- Graduate Mechanical Engineer
- Graduate Process Engineer
- Graduate Transport Engineer
- Nuclear Safety Engineer
- Reservoir Engineer

- Marathon
- Mott MacDonald
- Shell
- Total
- WSP Parsons Brinkerhoff
Engineering (continued)

Graduate employment statistic

1st in Scotland and 3rd in the UK for graduate engineering employability – Guardian League Tables, 2016/17.

Accreditations

According to your choice of curriculum, our MEng honours degree is an accredited five-year honours programme satisfying the educational base for a Chartered Engineer (CEng) by the Institution of Chemical Engineers, the Institution of Civil Engineers, the Institution of Structural Engineers, the Institution of Engineering and Technology, Energy Institute or by the Institution of Mechanical Engineers.

The BEng honours degree is an accredited four year honours degree programme partially satisfying the educational base for a Chartered Engineer (CEng), while it fully meets the educational base for Incorporated Engineer (IEng) registration.

Articulation routes

The University welcomes applications for degree level study from students with HNC and HND qualifications, and has a number of college articulation routes in place which lead to advanced entry into our degree programmes. For full information contact your college, visit www.abdn.ac.uk/study/college-articulation or email study@abdn.ac.uk.

Offers of admission

Applicants should note that achieving the minimum entrance requirement from a single sitting of exams will not guarantee an offer of admission. We have many more applicants than places, and most of them meet our minimum entrance requirements. Consequently, we may need to ask for more than the minimum. An applicant’s academic profile will normally be the most significant factor in our decision making. Additionally, certain features of the personal statement may help to strengthen an applicant’s case.

Minimum entry requirements

MEng (Master of Engineering – 5 years)

- SQA Highers
  - 4H at AABB (AB required in Mathematics and Physics/Technological Studies. If applicant presents with H in Technological Studies instead of Physics, Mathematics must be A grade)
  - National 5 at grades A, B or C in English or equivalent qualification

- A Levels
  - ABB (AB required for Mathematics and Physics. B in Design and Technology or Engineering). If applicant presents with B in Physics, Design and Technology or Engineering, Mathematics must be A grade)
  - GCSE English at C

- IB
  - 34 points including Mathematics and Physics at HL (6 or above) and English at Standard Level

- ILC
  - For Irish Leaving Cert entry requirements, visit www.abdn.ac.uk/study/ug-entry

- BTEC
  - DDD Mathematics and Physics required
  - GCSE at C or above in English or English Language, Mathematics and in either Chemistry, or Physics or Dual Award Science
  - NOTE: BTEC in Applied Sciences is not normally sufficient on its own for entry into any of our Engineering programmes

Foundation Apprenticeships

The University recognises that Skills Development Scotland, alongside other partners, is working with industry to increase the range of work-based learning opportunities for pupils in the senior phase of secondary schools. The development of Foundation Apprenticeships is one such initiative and this qualification will be considered alongside Highers across a range of degree programmes.

More course information at www.abdn.ac.uk/ug/engineering
**BEng (Bachelor of Engineering – 4 years)**

- **SQA Highers**
  - 4H at ABBB (AB required in Mathematics and Physics/Technological Studies. If applicant presents with H in Technological Studies instead of Physics, Mathematics must be A grade)
  - National 5 at grades A, B or C in English or equivalent qualification

- **A Levels**
  - BBB, in Mathematics, Physics, Design and Technology or a B in Engineering

**ABERDEEN INSPIRED.**

“I think the best part about the degree was getting to try out so many different fields of engineering, at a stage of my life when I was unsure about the best direction for me to take.”

Our programmes

English

English at Aberdeen gives you all the advantages of a highly-rated teaching, research and creative hub, taught by internationally renowned academics, writers and poets. You will be inspired by the wonderful environment of a historic university with an award-winning library, outstanding literary treasures, and a vigorous calendar of literary events.

Why choose Aberdeen?

- Rated second in the UK for the quality of Aberdeen research in English language and literature in the 2014 REF national assessment of research quality at UK universities.
- Scotland’s top centre for creative writing in the Complete University Guide rankings for 2017.
- An international profile through major literary projects such as the Cambridge Edition of the Works of Jane Austen and the Edinburgh Edition of the Waverley Novels of Sir Walter Scott.
- The WORD Centre for Creative Writing, promoting creative projects in fiction, non-fiction and collaborative mixed-media in all the languages of north-east Scotland (from Doric to Polish).
- The spectacular, award-winning Sir Duncan Rice Library, home to literary treasures collected over 500 years, charting the power of the written word from ancient papyri and Medieval manuscripts to contemporary e-books and other media.
- Historic collections including rare printed books, the 12th century Aberdeen Bestiary, MacBean Stuart and Jacobite collection, the novels of Sir Walter Scott, and an exceptional collection of Charles Dickens’ first editions.
- Research centres include the nationally recognised Centre for the Novel, the Centre for Modern Thought, and the Research Institute of Irish and Scottish Studies.

Example degree structure

Course information is provided for guidance only and is subject to change. Core or compulsory courses are shown which are correct at the time of going to print.

Year 1

- Academic Writing for Language & Literature
- Professional Skills Part 1
- Acts of Reading
- Controversial Classics
- Rethinking Reading

Year 2

A wide range of courses covering the following subject areas:

- Encounters with Shakespeare
- The Tragedy of Knowledge

Year 3

- Medieval/Renaissance
- Romantic/Victorian
- Contemporary/Modern

Year 4

A wide range of research specialist courses which promote a deep understanding of the subject. Courses are taught in seminar groups of up to 15 students. The programme of study also includes a supervised dissertation.

Our programmes

Environmental and Forest Management

This applied science degree provides academic, graduate skills alongside technical and professional skills required for work in forestry and environmental consultancy. You gain a solid foundation in biological and environmental sciences and have the opportunity to specialise in forestry, environmental management or conservation science. Field courses and visits provide you with an opportunity to engage in discussion and debate and develop a deeper understanding of the practice of environmental and forest management in Scotland and beyond.

Why choose Aberdeen?

- You will benefit from the opportunity to work outdoors and to apply your classroom and field work knowledge to real life situations.
- Easy access to large areas of forest, including remnants of the internationally important native Caledonian pine forest, enhances the learning environment.
- Field courses form an important part of the degree programme, with residential trips to the Lake District in England and the Black Forest in Germany, and day trips from Aberdeen to local forests or industries built into a number of courses.
- You will develop quantitative skills that will enhance your employability and prepare you for your final year research project.
- Teaching on the programme is integrated with our other programmes, meaning that you benefit from structured training in transferable skills and have access to a range of elective courses.
- Career prospects are very good with opportunities in forest management, environmental consultancy, protected area management and a number of related environmental and ecological fields.
- You will have the opportunity to get involved in our research through summer research assistantships, project work and a compulsory final year research project.
- At our regular careers events you will have the opportunity to listen to and meet prospective employers from outside the University, giving you excellent opportunities to get a fulfilling and challenging job in a biological field.

Example degree structure

Course information is provided for guidance only and is subject to change. Core or compulsory courses are shown which are correct at the time of going to print.

**Year 1 (including field trip)**

- Professional Skills Part 1
- Frontiers in Biological Sciences
- Diversity of Life 1 and 2
- Ecology and Environmental Science
- Plants and Their Habitats in Northern Scotland

**Year 2**

- Biological Enhanced Skills Training (BEST)
- Ecology
- Plants, People and the Environment
- Conservation Biology
- Woodland Conservation and Management Field Course

More course information at [www.abdn.ac.uk/ug/bio-env-sciences](http://www.abdn.ac.uk/ug/bio-env-sciences)
Year 3

- Global Soil Geography
- Statistical Analysis of Biological Data
- Society and Environment
- Applied Forest Ecology
- Timber Harvesting and Measurement

Year 4

- You will carry out a research project as well as writing an extended essay and completing advanced courses of your choosing.

Career development

Many career possibilities are open to you as a graduate from this applied degree. Many of our graduates have gone on to become professional foresters within the state and private sectors in the UK. Others work as urban tree experts, in timber processing, forest recreation, with conservation agencies or environmental protection agencies, both within industry and within regulatory bodies. Recent graduates have also been taken on as interns with non-governmental organisations.

A great advantage of having a degree from the University of Aberdeen is that it provides you with a very broad range of skills to offer employers. Not only do we train students in scientific methodology in the laboratory and in the field, we incorporate what we call ‘graduate attributes’ into the whole curriculum. Employers now expect an impressive list of skills, knowledge and experience in their graduate recruits and we aim to help you acquire these.

Recent graduate roles

- Chartered Forester
- Ecologist
- Environmental Consultant
- Nature Conservationist
- Researcher
- Timber Process Worker
- Urban Tree Expert

Minimum entry requirements

See table on page 56 for more information.

SQA Highers:      A Levels:  
AABB*                  BBB*

Advanced entry - See page 53 for more information.

Single honours

BSc Environmental and Forest Management

Graduate employment statistic

95% of graduates go on to work and/or study within six months – University of Aberdeen careers data.

University league rankings

“Studying Forestry at the University of Aberdeen has allowed me to learn from knowledgeable lecturers, and also given me the opportunity to put theory into practice during their excellent field trips.”  
Rebecca Sinclair, recent graduate.
Our programmes

Environmental Science

An Environmental Science degree at Aberdeen will allow you to understand more about the environment from the local to global scale. It will allow you to appreciate the impact humans are having on the environment and how it can be managed. You will study an interdisciplinary programme which includes Environmental Biology, Geography and Geology, Soil Science and Chemistry. This degree will enable you to explore the science of all these topics, taught by experts who are actively involved in environmental science research.

Why choose Aberdeen?

- Our degree in Environmental Science aims to train you to recognise and understand the threats and conflicts in the environment today and appreciate the steps required to develop solutions.
- You will benefit from the opportunity to work outdoors and apply your classroom and field work knowledge to real-life situations.
- There is a focus on research-led teaching for this degree. The School of Biological Sciences has an international reputation for excellence in interdisciplinary research in terrestrial, aquatic and marine environments.
- You will have opportunities to interact with stakeholders and end-users, such as Scottish Natural Heritage (SNH), oil and gas companies and remediation companies.
- Our research for terrestrially related environmental sciences is ranked in first place in the UK (REF 2014). 92% of the research in the School is considered to be world-leading or internationally excellent (REF 2014).
- At our regular careers events you will have the opportunity to listen to and meet prospective employers from outside the University, giving you excellent opportunities to get a fulfilling and challenging job in a biological field.

Example degree structure

Course information is provided for guidance only and is subject to change. Core or compulsory courses are shown which are correct at the time of going to print.

Year 1
- Frontiers in Biological Sciences
- Diversity of Life 1 and 2
- The Earth through Geological Time
- Ecology and Environmental Science
- Global Worlds, Local Challenges
- Earth’s Materials
- Professional Skills Part 1

Year 2
- Biological Enhanced Skills Training
- Ecology
- Physical Environments
- Conservation Biology
- Plants, People and the Environment

Year 3
- Statistical Analysis of Biological Data
- Global Soil Geography
- Ecosystem Processes
- Soils for Food Security
- Environmental Analysis

Year 4
- You will carry out a research project as well as writing an extended essay and completing advanced courses of your choosing.

More course information at www.abdn.ac.uk/ug/bio-env-sciences
University league rankings

Career development

Completing a degree in Environmental Science at the University of Aberdeen will give you the essential skills required to pursue a career in the environmental science sector and the wider biology graduate job market. You will be equipped with the knowledge, understanding and practical experience to take the necessary action in resolving environmental conflicts. This includes nature conservation, in government or non-government conservation organisations and also in countryside departments of local government.

The combination of academic training, transferable skills and skills-based training that students gain during the Environmental Science programme at the University of Aberdeen means that as well as learning theory, they also have the opportunity to gain experience of applying their knowledge to real-life and environmental situations.

Graduate employment statistic

94% of graduates go on to work and/or study within six months – University of Aberdeen careers data.

Accreditations

Royal Society of Biology

“... really allows you to take your studies in a direction you want with its flexibility, and to explore your own interests. The independent research project in fourth year gives you very valuable experience researching.”

Alexander Louden, recent graduate.
Our programmes

European Studies and Modern Languages

At a time when the UK finds itself at a turning point with the rest of Europe, the MA in European Studies and Modern Languages develops an in-depth understanding of European politics, societies and cultures in the twentieth and twenty-first centuries. It includes training in up to two languages as well as a year abroad in relevant partner institutions.

Why choose Aberdeen?

• Language competency in two European languages, with options to start from beginners’ level (other European Studies programmes offer the chance to study only one language).

• An in-depth understanding of European politics, societies and cultures in the twentieth and twenty-first centuries, including key topics such as migration, xenophobia, nationalism, family and population change.

• Interdisciplinary training with a range of flexible options, including courses on culture, literature, history and politics (Aberdeen has one of the most flexible degree programmes in the UK).

• Targeted and personalised support within smaller cohorts compared to other, much larger programmes.

• Graduates of the programme go on to top European Institutions which can launch them into future diplomatic, European or academic careers (e.g. the College of Europe, the Diplomatic Academy Vienna and the European University Institute Florence).

Example degree structure

Course information is provided for guidance only and is subject to change. Core or compulsory courses are shown which are correct at the time of going to print.

Year 1

• Europe in the Twentieth Century
• French, Gaelic, German or Spanish language courses
• Cultural courses in French, Gaelic, German or Spanish or Film and Visual Culture
• Courses in Sociology, Politics, Law or Economics

Year 2

• European Culture, Politics and Society
• French, Gaelic, German or Spanish language courses
• Cultural courses in French, Gaelic, German or Spanish
• Courses in Sociology, Politics, Law or Economics

Year 3

• European Studies partner institutional credits
• European Studies junior honours projects (combining cultural, sociological and language elements)

Year 4

• European Societies
• European Studies Dissertation
• French, Gaelic, German or Spanish language courses
• Cultural courses in French, Gaelic, German, Hispanic Studies or Film and Visual Culture
• Courses in Sociology, Politics, Law or Economics

More course information at www.abdn.ac.uk/study
Career development

As a European Studies and Modern Languages graduate, you will have gained a range of transferable skills during your studies including skills in research, written and oral presentation, communication and presenting arguments – as well as your language skills.

Our graduates work in a range of areas including education, archives, politics, government services, journalism, non-governmental organisations (NGOs) and European Union bodies, with some starting their own business.

Our recent Modern Languages graduates have gone on to a variety of careers, including:
- Assistant Gaelic Development Officer
- Client Account Manager
- EU Policy and Events Stagiaire
- HR Administrator
- Intern
- Project Assistant

Recent graduate employers

- Bank of Scotland
- Konrad-Adenauer-Stiftung
- KPMG
- Scotland Europa
- University of Aberdeen

MA European Studies and Modern Languages

National student survey score

The School of Languages, Literature, Music and Visual Culture has an impressive overall student satisfaction rate of 92% – NSS 2016.

Graduate employment statistic

83.9% of our Modern Languages graduates were in work or further study (2013-15) – University of Aberdeen careers data.
Our programmes

Exercise and Health Science

Exercise and Health Science examines the role of sport and exercise as a means of improving quality of life.

Why choose Aberdeen?

- Excellent teaching: 100% of our students were satisfied with teaching on courses in Medical Sciences and 95% of our students were satisfied that staff made the subject interesting (2016 National Student Survey).
- The expansion of sectors emphasising the long-term benefits of exercise and nutrition for health means there are extensive employment opportunities for graduates of this programme.
- 2016 saw the opening of the new purpose-built Rowett Institute of Nutrition and Health building at the University’s Foresterhill Campus. It is equipped with state-of-the-art laboratory facilities, write-up areas and a specialist Human Nutrition Unit.
- You will develop a practical knowledge of research skills and methods related to the basic sciences underpinning the use of exercise in health and fitness.

Example degree structure

Course information is provided for guidance only and is subject to change. Core or compulsory courses are shown which are correct at the time of going to print.

- In year 1 you will take courses in Sports Science, Medical Science and Psychology or Chemistry. Additional courses are selected from the science programme and other areas.
- In year 2, further expansion of Sports Science and development of Exercise and Health studies are provided. These are combined with more advanced studies in Physiology and Psychology or Biochemistry, and courses delivering key skills applicable to Sports Studies.
- Sports Science, Clinical Exercise Physiology and Sports Psychology form important components of year 3, including more specific studies in Anatomy, together with health-related issues including Nutrition, Health and Disease.
- Year 4 comprises focused studies on Exercise and Health, the Science of Ageing and Nutrition, Obesity and Metabolic Health. An important feature is the ten-week research project, carried out in research laboratories at the University or in local research institutes. If you choose to follow the five year MSci course, your fourth year will be spent on placement.

More course information at
www.abdn.ac.uk/ug/exercise-health
University league rankings

Career development

Graduates find employment in many areas of biomedical and human-based science subjects allied to medicine, and also the sport and leisure sectors, where their understanding of the basis of human performance adds to their other skills. Many students will continue in research posts where the project work in the honours year provides valuable experience. Others will go on to a more vocational medical related MSc in, for example, Physiotherapy or Dietetics; or a postgraduate qualification in Primary Teaching, PE or Biology. Graduates may also begin careers in the public health industry, occupational health and therapy, social work and related social services, teaching, the mass media and marketing.

Recent graduate employers

- Aberdeen Sports Village
- Dublin City University
- NHS
- Skipton Building Society
- University of Stirling

National student survey score

Film and Visual Culture at Aberdeen takes you on a fascinating and unique journey through the history and theory of the moving image over the last 100 years of cinema, in the vibrant environment of a leading teaching and research university, a buzzing regional cultural scene, and a region of outstanding natural beauty and inspiration.

Why choose Aberdeen?

- A curriculum that perfectly balances creativity with broad study, theory and critical analysis as you learn to think within the movements of cinema, and pursue questions beyond the film frame.
- Director’s Cut, the University’s popular events series, which invites leading international film-makers onto campus for masterclasses with students, and packed public ‘in conversation’ events, filmed for the web and for teaching.
- Sir David Attenborough, Nicholas Roeg, John Akomfrah, Raul Ruiz, Kevin MacDonald, and film editor Peter Lambert (Love Actually to Twilight Saga) all among previous guests for Director’s Cut.
- The George Washington Wilson Centre for Visual Culture, promoting interest and organising events in visual culture, including film, photography, art history, anthropology and museum studies, through its VISION programme of events.
- A programme that also looks at the practical elements of film and visual culture, including the production and circulation of film.
- Strong emphasis on applied learning as well as theory, so you develop a range of practical skills that will give you a good grounding in your future career.
- Courses as diverse as Scientific Looking, Performance Art and Panoptic Digital Culture.
- An exciting and flourishing cultural scene in north-east Scotland, including the independent Belmont Filmhouse which celebrates world cinema in all its brilliance and diversity, and frequently partners with this academic programme.
- The spectacular, award-winning Sir Duncan Rice Library providing a stunning, iconic and inspiring study environment with state-of-the-art learning technology and reference works on film and visual culture.

Finance

Finance at Aberdeen gives you a powerful understanding of the principles of finance in a fast-moving global setting, and the business skills to take advantage of the many opportunities available to sought-after Aberdeen graduates across the business and public sector, expected to grow further with the increasing number of innovations in the financial world.

Why choose Aberdeen?

- An excellent teaching environment, committed to the needs of industry, which integrates research into teaching, enables transferable skills and develops intellectual skills on a range of contemporary financial challenges.
- Professional training facilities, including our virtual trading floor, integrating real activity in financial markets into our students’ courses.
- The spectacular, award-winning Sir Duncan Rice Library, with brilliant study facilities, state-of-the-art learning technology, and an extensive collection of reference books, journals and other media for finance and business studies.
- Enterprise Campus, a new initiative to nurture entrepreneurial skills and support students wanting to progress their own business ideas.
- Our location in the main European centre for the oil and gas industry, where multinational firms and financial services all have offices in the city, and close links to our teaching programmes.

Year 1

- Academic Writing for Business
- Professional Skills Part 1
- The Economics of Business and Society
- Finance 1: Finance, Risk and Investment
- Accounting and Entrepreneurship
- The Global Economy

Year 2

- Personal Investment
- Finance 2: Business Finance
- Financial Markets and Regulation
- Understanding Statistics

Years 3 and 4

- Finance 3: Corporate Finance
- International Financial Management
- Empirical Methods in Finance
- Financial Strategy and Investment Management
- Derivatives and Treasury Management

“I’ve always looked at Aberdeen as a great university and I always wanted to come here. There are so many positive things that you gain from the experience, especially through involvement with groups like the business society and events like the business ball.”

Michaela McCombie, 4th year Accountancy and Finance student 2016-17.
French

French at Aberdeen has an outstanding reputation. We are top-rated for teaching, with broad, flexible and diverse programmes covering language, literature, history and culture, researching topics from the Middle Ages to the present day and the Caribbean to North Africa. You will have five or four year options, study periods abroad, and many subject combinations for which a major European language adds a huge advantage in today’s world.

Why choose Aberdeen?

• A dynamic French Society, organising social and topical events throughout the year, and a brilliant way to get to know other students studying or speaking French.

• The spectacular, award-winning Sir Duncan Rice Library, with stunning study facilities, state-of-the-art learning technology, and a first-class collection of French books and films for your course.

• A packed campus programme of events, exhibitions, invited speakers and the popular annual May Festival which welcomes international figures, experts, authors and scientists to campus every spring, with an increasingly European flavour.

• Your year abroad as a language assistant or visiting student at locations including Lyon, Rennes, Grenoble, Réunion, Brussels, Geneva, Lausanne, the IFP (Institute of French Petroleum) School in Paris and the Club des Langues in Anglet.

• International recognition as a centre for study and research in French, with research covering not only France, but also French-speaking Africa and the Caribbean.

• You’ll benefit from language courses being taught in small groups and literature and culture courses being taught by a combination of lectures and tutorials.

Example degree structure

Course information is provided for guidance only and is subject to change. Core or compulsory courses are shown which are correct at the time of going to print.

Year 1

• Academic Writing for Language & Literature
• Professional Skills Part 1
• Introduction to Literature and Culture of Modern France 1
• Level 1 French Language 1A
• Introduction to Literature and Culture of Modern France in Context OR
• Level 1 French Language 1B

Year 2

• Advanced Introductory French Language 1
• Introduction to French Identities: Individual and Society
• Advanced Introductory French Language 2
• Introduction to French Identities: Centre and Periphery

Year 3

• Junior Honours French Language
• Level 3 French Language 7
• Academic year spent in French-speaking country

Year 4

• French Dissertation
• Level 4 French Language 1 and 2

Major-Minor honours

BSc Psychology with French (4 years)
MA French with Music Studies (4 years)

French at Aberdeen gained the highest possible rating of ‘Excellent’ in the last national Scottish Teaching Quality Assessment.
Why choose Aberdeen?

- Close links with the Research Institute of Irish and Scottish Studies, and its literary magazine, Causeway/Cabhsair, which frequently includes poems and short stories from established and new Gaelic writers.
- The spectacular, award-winning Sir Duncan Rice Library, with an extensive Gaelic collection and treasures, including the 10th Century Book of Deer with some of the oldest examples of Gaelic writing to have survived from Medieval Scotland.
- An intensive summer school, giving students the chance to practise their Gaelic language skills in a friendly, natural environment.
- A strong Gaelic theme in the University’s popular May Festival, at which thousands attend to hear world-famous authors, poets, public figures, scientists and other experts, and debate big issues in arts, literature, and current affairs.
- A warm welcome for students whatever your level of Gaelic, and long-standing experience in teaching this fascinating language to complete beginners.

Aberdeen is the perfect location to explore the Gaelic language, its history, literature and Gaelic culture up to the present day. Whether you are a native speaker or complete beginner, you will be inspired by our world-leading experts in the Gaelic field, and gain valuable skills and wide career options.

We have been teaching Scottish Gaelic (Gàidhlig) and culture for a hundred years, led by teachers and researchers passionate about Gaelic, and whose work directly influences Scottish policy on maintaining a vibrant, sustainable and respected Gaelic community in Scotland today.

Example degree structure

Course information is provided for guidance only and is subject to change. Core or compulsory courses are shown which are correct at the time of going to print.

Year 1

- Academic Writing for Language & Literature
- Gaelic for Beginners 1A/Gaelic Language 1A
- Gaelic Reading for Beginners 1A
- Modern Gaelic Scotland
- Gaelic for Beginners 1B/Gaelic Language 1B
- Modern Gaelic Scotland

Year 2

- Gaelic for Advanced Beginners 2A/Gaelic Language 2A
- Gaelic Folklore
- Gaelic for Advanced Beginners 2B/Gaelic Language 2B
- Introduction to Gaelic Literature

Years 3 and 4

As well as studying Gaelic Language and undertaking a dissertation, courses we regularly offer include:

- Gaelic Dialectology
- The Gaelic Short Story
- Comparative Language Planning
- Modern Irish Language
- The Gaelic Novel
- The Gaelic Poetry Renaissance

Student satisfaction score

93% overall student satisfaction – UNISTATS 2016.
Genetics

Genetics is the study of the inherited differences between individuals and is central to biology, medicine and biotechnology. It allows us to understand normal events such as development, growth and ageing in terms of the underlying molecular machinery of the cell and helps explain why these processes go wrong in disease.

When organisms reproduce, the offspring tend to resemble their parents, but they are not identical to either parent, nor are they simply a mixture of the two parents. Genetics is concerned with explaining the behaviour of inherited characteristics, in terms of the underlying genetic machinery which turns a single cell (the fertilised egg) into a fly, a worm, or a human. Genetics also explains how over longer time scales, living things change, or evolve, to produce the dazzling diversity of life.

Why choose Aberdeen?

• Excellent staff and teaching facilities: 100% of our students were satisfied with teaching on courses in Medical Sciences, and 95% of our students were satisfied that staff made the subject interesting (2016 National Student Survey).

• Genetics has been revolutionised by the application of new genome sequencing technologies. You will benefit from the investment made in this technology from the formation of the Centre for Genome Enabled Biology and Medicine at the University.

• Throughout the programme there is a strong emphasis on medical and human genetics.

• Training is provided in both specialist and employment-related skills.

• Innovative and flexible teaching allowing you to follow special interests.

• You will have opportunities for gaining (paid) experience in industry.

Example degree structure

Course information is provided for guidance only and is subject to change. Core or compulsory courses are shown which are correct at the time of going to print.

Year 1

• Introduction to Medical Sciences
• The Cell
• Chemistry for the Life Sciences 1
• Professional Skills Part 1
• Chemistry for the Life Sciences 2

Year 2

• Genes and Evolution
• Molecular Biology of the Gene
• Foundation Skills for Medical Sciences
• Energy for Life
• Microbes, Infection and Immunity
• Research Skills for Medical Sciences

Year 3

• The Molecular Biology of the Cell
• Genetics
• The Molecular Control of Cell Function OR
• Fundamentals of Immunology

- Honours Genetics – Option 1
- Honours Genetics – Option 2
- Honours Advanced Molecular Biology
- Genetics Honours Research Project

University league rankings
Aberdeen is ranked 9th in the world and 5th in Europe for its international research collaboration in Biomedical and Health Sciences (Leiden Ranking 2015), with a heritage of major innovations, including insulin.

Career development
One of the great advantages of a degree from the University of Aberdeen is that it provides you with a very broad range of skills to offer employers. Not only do we train students in scientific methodology, we incorporate what we call ‘graduate attributes’ into the whole curriculum, including communication, working with others, use of specialist IT and time management. Recent graduates have gone on to careers as varied as Veterinary Assistant and Support Assistant.

Recent graduate employers
- Aberdeen City Council
- Allied Health Care
- Scottish Water

Focused on developing future effective therapies, the Institute of Medical Sciences houses nearly 400 researchers and support staff working on understanding the human body’s response to infection and disease.
Geography

Geography is key to understanding and resolving many of the most pressing problems faced by society, and our curriculum reflects the changing nature of these problems and current approaches to addressing them. Geography at Aberdeen can be studied as a BSc or an MA degree. Each route offers a range of joint honours degrees where various arts or sciences can be studied.

Why choose Aberdeen?

• Geography has been taught at Aberdeen since the 1590s and the department of Geography was established in 1919.

• The degree programme reflects contemporary Geography, with course options showcasing the department’s research strengths in both human and physical Geography.

• Local, national and international field trips are an integral part of all our degree programmes, including Boston (USA) and the Italian Alps.

• The University is located close to some of the most environmentally important and geographically varied landscapes in the whole of the UK, which provide field sites for some of our teaching.

• We offer a range of Geography based degree programmes, including single and joint honours pathways, that provide graduates with a broad skillset.

• Students have the opportunity to study abroad. Amongst many options, Geography has a special relationship with the University of Wisconsin at Eau Claire.

• The student-led Geography Society runs an annual programme of events and is an important element of the social life of the department.

• Geography staff conduct internationally recognised inter-disciplinary research as recognised in the excellent results of the 2014 Research Excellence Framework.

• Graduate employment rates are very competitive. Our graduates are employed across the public, private and voluntary sectors.

• Our graduates are well placed to pursue postgraduate opportunities.

Example degree structure

Course information is provided for guidance only and is subject to change.

• Whether you are registered for BSc or MA, we make it possible for you to choose between science-focused, humanities-directed or social-science-based Geography courses throughout your degree.

• A student studying single honours in Geography will complete a four-year programme of study, specialising in Geography in third and fourth year.

• A student studying joint honours in Geography will complete a four-year degree, specialising in both Geography and another subject during third and fourth years. You might, for example, qualify with a BSc (Hons) Geography-Geology degree, or an MA (Hons) Geography-Sociology degree.

Graduate employment statistic

Our programmes

Geology and Petroleum Geology

Geology provides a knowledge of the way the Earth works and is vital to the understanding of the nature and origin of Earth’s resources.

Why choose Aberdeen?

- Aberdeen is the oil and gas capital of Europe, making it the most relevant place in the UK to study Geology and Petroleum Geology.
- Geology is the ultimate general science degree with an integrated mix of natural and physical sciences.
- If the interactions of people and planet are of special interest, our joint degree combining Geosciences with Geography is the degree for you.
- For those planning a career in geophysics or petrophysics with the hydrocarbon industry, Physics with Geology is highly relevant.
- Fieldwork is an important element of our geology degree, we make the best use of our location in Scotland – close to great areas for fieldwork, many of which feature in the Geological Society of London’s 100 Great Geosites.
- Fieldwork locations include - Arran, Skye, the north-west Highlands and other areas throughout the UK. The MGeol programme includes a trip to the Western Alps and to Sicily.
- Many past graduates continue to work in Aberdeen and links with industry are therefore very strong and employability second to none.
- You will have the chance to join the Geology and Petroleum Geology Student Chapter. This is an active and very social Student Chapter which will give you the opportunity to expand your knowledge, skills and networks beyond the classroom.
- To expand skills, knowledge and networks even further, many of our students join the Aberdeen Geology Society.

Example degree structure

Course information is provided for guidance only and is subject to change. Core or compulsory courses are shown which are correct at the time of going to print.

Year 1
- Earth Through Geological Time
- Earth’s Materials

Year 2
- Stratigraphical Principles
- Petrology & Mineralogy
- Introduction to Field Geology
- Geophysics

Year 3
- Petroleum Geology
- Field and Mapping Techniques
- Structural Geology & Tectonics
- Igneous & Metamorphic Petrology
- Sedimentology
- Field & Mapping Techniques 2

Year 4
- Independent Geological Mapping Project
- Petroleum Geology: Geochemistry and Geofluids
- Surface & Subsurface Digital Imaging
- Geological Synthesis

Year 5 (MGeol only)
- Integrated Sedimentary Basin Systems
- Geoscience Research Skills and Data Analysis
- The Basin Fill
- Geological Models
- Research Project

“The links with many different industries allows the University to be among the best for research and development, so you will know that you are learning the most up-to-date and relevant information during your studies.”

Becky Wain, Graduate Geologist.
Geophysics

Providing a knowledge of the way the Earth works is vital to understanding the nature and origin of Earth resources. A degree in Geophysics from the University of Aberdeen will allow you to learn about the history, structure and dynamics of the Earth system, and the physics behind them.

Why choose Aberdeen?

- Fieldwork is an important element of this degree, we make the best use of our location in Scotland – close to many great areas for fieldwork.
- Aberdeen is geographically perfect for the study of Earth Sciences, having some world-class field sites close at hand which can be conveniently visited on day courses. Many of the UK’s top 100 geological sites are within easy reach from Aberdeen and are visited by our students and staff alike.
- Many past graduates continue to work in the city and links with industry are therefore very strong with employability being second to none.
- Our department of Physics has a long and illustrious history, and former staff include great physicists such as James Clerk Maxwell and G.P. Thomson.
- We offer a modern, modular degree structure with a broad syllabus and a wide range of degree choices.
- We place emphasis on teaching employability and the development of generic skills, useful in a wide range of careers.
- You will be well equipped to pursue careers across the breadth of Geoscience sub-disciplines.

Example degree courses

Course information is provided for guidance only and is subject to change.

Topics you can study include (but are not limited to):

- The Physical Universe
- The Earth Through Geological Time
- Earth’s Materials
- Computer Programming and Principles
- Petrology & Mineralogy
- Light Science
- Dynamical Phenomena
- An Introduction to Field Geology
- Energy and Matter
- Structural Geology & Tectonics
- Principles of Petroleum Geology
- The Physics of Waves
- Interpretation of Seismic Reflection Data
- Sedimentology
- Igneous & Metamorphic Petrology
- Computational Geophysics
- Statistical Physics & Stochastic Systems
- Advanced Exploration Geophysics
- Modelling Theory
- Interpreting the Subsurface

University league rankings

Aberdeen is ranked 14th in the UK for Geology and 20th in the UK for Physics and Astronomy – Complete University Guide 2017.

Career development

Our Geoscience degrees open up career opportunities with the global oil and gas industry, as well as other key sectors. Our degrees are highly respected by the oil and gas industry and our graduates are in high demand. Geophysics is also a subject that opens up tremendous opportunities for further study, either at MSc or PhD level.

Many of our Geoscience graduates find employment within the hydrocarbon or mineral exploration and exploitation sectors. Additionally, postgraduate specialised study is a popular pathway toward careers in the oil industry. With a good numerate and technical degree such as Geophysics, employment prospects are excellent.

National student survey score

97% of our Geology students agreed that our staff are good at explaining things – NSS 2016.

Graduate employment statistic

90% of Geology graduates and 80% of Physics graduates go on to work and/or study within six months – UNISTATS 2016.

Minimum entry requirements

BSc Geophysics

A degree in Geophysics will give you the numerical and analytical skills, as well as the ability to interpret complex systems, which are prized by employers.
German at Aberdeen has an outstanding reputation, top-rated for teaching, with broad, flexible and diverse programmes covering language, literature, history and culture, with four or five-year options, study periods abroad, and many subject combinations for which a major European language adds huge advantage in today's world.

Why choose Aberdeen?

- The highest possible rating of ‘Excellent’ in the last Scottish National Teaching Quality Assessment.
- A vibrant international community on campus and across the region, with many German-speaking students, staff and activities to get involved in and practise your language skills.
- German Society open to all students interested in German and the German-speaking countries, organising drama performances and other events such as Kaffee and Kuchen, a German Stammtisch, film showings, and visits by German speakers and writers.
- Gaining a degree in German Studies is possible for students with or without any previous experience of learning German. At level 1 students may choose the ‘beginners’ or the ‘qualified’ pathway (for those with about 5 years learning German at school, or equivalent).
- Opportunities to study the rich literature and culture of Austria and Switzerland in addition to Germany.
- Your period abroad as a language assistant or visiting student - we have exchange scholarships with the Universities of Zurich, Kiel and Greifswald, and Erasmus partners including Leipzig, Cologne, Bonn, Trier and Graz in Austria.

Example degree structure

Course information is provided for guidance only and is subject to change. Core or compulsory courses are shown which are correct at the time of going to print.

Year 1
- Academic Writing for Language and Literature
- Professional Skills Part 1
- All students will take a language course appropriate to their current German skills – ‘beginners’ or ‘qualified’

Year 2
- Modern German Culture 3 and 4

Year 3
- German Honours Language Study

Year 4 & 5
- German Language Study for Senior Honours
- Dissertation

Our highly successful German drama group is student-led, and for the last 30 years it has produced a play every year. Taking to the stage is fun, and improves your confidence in spoken German.
Hispanic Studies

Hispanic Studies at Aberdeen has an outstanding reputation, top-rated for teaching, with a broad, flexible and diverse programme covering language, literature, history and culture and the opportunity to specialise in either Latin America or Spain. Your degree will last five years including study abroad in Spain or Latin America. Hispanic Studies can be studied with many subjects, giving you expertise in a fast-growing global language and its cultures and a huge advantage in today’s world.

Why choose Aberdeen?

• The opportunity to study literature, history, politics and anthropology in relation to Spain and/or Latin America.

• Special areas of research expertise include 20th Century Spain, contemporary and historical Mexico, gender studies, history of science in Latin America, and studies of citizenship and society.

• Multicultural north-east Scotland, with many Spanish speakers working or studying in this region due to its role as a world centre for oil and gas.

• The spectacular, award-winning Sir Duncan Rice Library, with top-class study facilities, state-of-the-art learning technology, and extensive Spanish and Latin American works to inspire your studies.

• A packed campus programme of events, exhibitions, film showings, and the annual May Festival which welcomes international figures, experts, writers and scientists to campus every spring, including authors writing in Spanish.

• A subject scoring the highest possible rating of ‘Excellent’ in the last Scottish national Teaching Quality Assessment.

History

Studying History at Aberdeen is an opportunity to immerse yourself in examination of all aspects of human experience in the past, exploring the medieval, early modern and modern periods in Scotland, Europe and the wider world at a university steeped in 500 years of history and now ranked top in Scotland for the impact of its History research.

Why choose Aberdeen?

- The inspiration of our beautiful historic campus in Old Aberdeen, centred around King’s College, begun in 1495 by University founder Bishop Elphinstone.
- Ranked top university in Scotland for the impact of its History research (REF 2014).
- A range of course choices shaped by particular strengths in Irish and Scottish studies, Scandinavia, the medieval and early modern period, and research centres studying global empires, history and philosophy of science, technology and medicine, and Russian and Eastern European history.
- Major international treasures including 7,000 early printed books, the magnificent 12th Century Aberdeen Bestiary, large Jacobite collection, works of the Scottish Enlightenment, and fascinating local records dating from the Middle Ages.

National student survey score

89% overall student satisfaction – NSS 2016.

Graduate employment statistic

89% of graduates went on to work and/or study within six months (2014-15) – University of Aberdeen careers data.

Example degree structure

Course information is provided for guidance only and is subject to change. Core or compulsory courses are shown which are correct at the time of going to print.

Year 1

- Academic Writing for Divinity, History & Philosophy
- Professional Skills Part 1
- Making History (15 credits) – An introduction to the subject at university level (compulsory)
- Plus a choice of 30 credits from:
  - Europe in the Twentieth Century (15 credits)
  - Renaissances and Reformations (15 credits)
  - Vikings! (15 credits)

Year 2

- Choice of level 2 history courses adding up to 60 credits, from:
  - Kingship, Clearances and Conflict: Debates in Scottish History (30 credits)
  - Power and Piety: Medieval Europe, 1100-1500 (30 credits)
  - Birth of Modernity: Politics, Culture and Science in Europe, 1700-1870 (30 credits)
  - Global Empire in the Long Nineteenth Century (30 credits)

Years 3 and 4

- Thinking History
- Special Subject
- History in Practice II
- Undergraduate Dissertation in History
- Plus a wide range of focused honours courses

History of Art

History of Art at Aberdeen provides the opportunity to study the art of Britain, Europe and America – architecture, sculpture, drawing, painting, print, and decorative and industrial arts – at a university steeped in 500 years of social and artistic development and rated top in Scotland for the impact of the work of its History of Art researchers.

Why choose Aberdeen?

- Our magnificent art collection, including the generous gifts from alumni through the centuries. In addition, modern artworks by leading Scottish artists make our spaces special and add thought-provoking inspiration to our campus.
- The inspiration of the beautiful King’s College Chapel, begun in 1495 by University founder Bishop Elphinstone, a treasure-house of history, showcases some of the finest work of Medieval craftsmen in Europe.
- Spectacular, award-winning Sir Duncan Rice Library with an excellent collection of art history books covering all periods, particularly strong in 18th and 19th Century material, including art theory and criticism.
- Home to the Buildings of Scotland Project, funded by the Leverhulme Trust, the definitive inventory of Scottish Architecture for Aberdeen, Aberdeenshire and Moray.
- Historic treasures include important Medieval manuscripts and estate papers, and the unique George Washington Wilson archive with over 45,000 original glass plate negatives made by this pioneer Victorian photographer.
- North-east Scotland’s distinguished architectural heritage from the Middle Ages onwards, the Aberdeen Art Gallery collections of French and British art, including one of the best collections of Victorian painting outside London.
- The National Galleries of Scotland, the Burrell Collection, Glasgow Art Gallery and the Hunterian Museum are within easy reach by train, bus or car.
- Visits to major galleries and architecture in Edinburgh and London as part of your programme, and a final year week-long visit to a city of artistic and cultural significance – recently Paris.
- A packed campus programme of student and public events, exhibitions, seminars, invited speakers, and the annual May Festival which includes tours and talks on our Medieval architecture and art treasures.

Our programmes

Human Embryology and Developmental Biology

Human Embryology and Developmental Biology is the study of the fascinating process in humans and animals that turns a single fertilised egg into a whole new individual with all the many specialised cell types.

Why choose Aberdeen?

- Excellent teaching: 100% of our students were satisfied with teaching on courses in Medical Sciences, and 95% of our students were satisfied that staff made the subject interesting (2016 National Student Survey).
- You will be trained in embryology, reproductive biology (including fertility/IVF science), stem cell technology, tissue regeneration, and the causes of, and cures for, human birth defects.
- You will benefit from access to excellent facilities and receive hands-on laboratory training.
- Teaching is delivered by world-leading researchers who are at the forefront of current research in developmental biology and stem cell technology.
- Emphasis is put on medically-relevant developmental genetics and stem cell technology.
- The majority of the model organisms used to study developmental biology are used by staff in the state-of-the-art Institute of Medical Sciences, using cutting edge techniques in genome editing as well as gene misexpression technologies.
- Feedback from students consistently ranks the degree programme as excellent, which is reflected in the high number of 1st class passes obtained by our students.

Example degree structure

Course information is provided for guidance only and is subject to change. Core or compulsory courses are shown which are correct at the time of going to print.

Year 1

- Chemistry for the Life Sciences 1
- Introduction to the Medical Sciences
- Chemistry for the Life Sciences 2
- The Cell

Year 2

- Physiology of Human Cells
- Molecular Biology of the Gene
- Foundation Skills for Medical Sciences
- Physiology of Human Organ Systems
- Energy for Life
- Research Skills for Medical Sciences

Year 3

- Human Embryonic Development
- Principles of Developmental and Reproductive Biology
- The Early Embryo
- Development of Organ Systems
- Genetics

Year 4

- Advanced Molecules, Membranes and Cells (Stem Cells and Regeneration)
- Evolution & Development
- Developmental Neuroscience
- Developmental Biology Honours Project

Our research has played a key role in making IVF safer, increasing the chances of having a healthy baby.
Immunology is the study of how the body defends itself against the huge variety of pathogenic microorganisms it may encounter.

Why choose Aberdeen?

- Our teaching is underpinned by world leading research groups, particularly in immunohaematology and the immunology of fungal infection.
- This is a wide-ranging programme that includes training in both specialist and generic employment-related skills.
- Excellent staff, passionate about high quality teaching (91% of our students were satisfied they received strong academic support), using modern, up-to-date teaching facilities.
- Modern teaching facilities and laboratories that will enhance your learning and provide you with an opportunity to experience working in a research focused laboratory environment.
- The University is ranked 9th in the world and 5th in Europe for its international research collaboration in Biomedical and Health Sciences (Leiden Ranking 2015).
- Immunology research here has led to major improvements in treatment for the debilitating autoimmune eye disease, uveitis.
- The Wellcome Trust medical research foundation has funded a £5.1 million strategic award in Medical Mycology and Fungal Immunology to members of the University’s Aberdeen Fungal Group. It represents the single largest award in the mycology-immunology field.
- Antibody research at Aberdeen has resulted in successful spin-out company formation with 30 patents pending worldwide or granted for immunisation technology developed from the shark immune system.

“...I was able to develop my knowledge of immunology, carry out innovative scientific research alongside world-leading scientists and spend a year working in industry. These experiences, and the extensive support I received, helped me develop an invaluable set of skills and a solid foundation for my career in pharmaceutical regulatory affairs. I thoroughly enjoyed my time at the University of Aberdeen.”

Beatrice Tilt, graduated 2013.
Language and Linguistics

Language and Linguistics at Aberdeen is the fascinating exploration of human language and how speech evolved to create a bridge between sound and meaning. You will study the ways in which we acquire languages as children and adults, how languages and dialects vary and change over time, and gain the knowledge and skills to give you choice across a wide variety of careers.

Why choose Aberdeen?

- A vibrant linguistics research and teaching community, and the benefits this study brings to other subjects such as modern languages, anthropology, sociology and history.
- Researchers revealing new insight into how spoken English is changing, including evidence gathered from tracking TV and radio soaps over the years.
- Major research partnerships such as the study of witness testimonies following the 1641 Irish Rebellion, with language revealing the social, economic, cultural and political situation in 17th Century Ireland, giving clues on sectarianism today.
- Award-winning Sir Duncan Rice Library with top-class study facilities and literary treasures collected over 500 years charting the power of the written word from ancient papyri and Medieval manuscripts to contemporary e-books and other media.
- A packed campus programme of events, exhibitions, invited speakers and the annual May Festival which attracts internationally acclaimed authors, broadcasters and public figures to discuss the written and spoken word in various languages.

Example degree structure

Course information is provided for guidance only and is subject to change. Core or compulsory courses are shown which are correct at the time of going to print.

Our programmes

Law

Students at Aberdeen have unique opportunities. We have programmes accredited for entry into the professional qualifications for Scotland, Northern Ireland and England and Wales. Students can also explore other disciplines and go on foreign exchange, and our student societies offer a range of unique experiences. We are ranked 12th in the UK of 100 law schools and in the top five for graduate prospects.

Why choose Aberdeen?

- Aberdeen Law graduates today occupy roles at the top of Scotland's legal system.
- Small class sizes and a highly personalised learning experience.
- Taught by top legal academics who are shaping national and international policy.
- A friendly international environment, studying alongside classmates from over 40 different nationalities within the Law School.
- Strong links with local and national employers, with legal professionals regularly giving career talks to students.
- An exceptionally high professional employment rate, with our Law graduates much in demand, not only in the UK, but abroad too.
- Our Aberdeen Law Project, in which law students gain experience by offering free legal advice in the community and conducting community projects.
- Our student Law Society, which organises a busy and varied programme of social, educational and supportive events.
- Our European Law Students' Association, a local branch of a pan-European network.
- Our Aberdeen Student Law Review, a student-led journal, which publishes our students' work.

Career development

The University places a strong emphasis on applied learning and, therefore, our Law graduates enjoy high employability. A Law degree from Aberdeen will help you enter the legal profession as well pursue a wide range of alternative careers. Our previous graduates have gone on to work in chartered accountancy, the media, merchant banking, stockbroking, human resources and financial management, the Civil Service, social work, teaching, the Inspectorate of Taxes and the police force.

Recent graduate employers

In order to practice law, you need to undertake professional qualifications. All our LLB programmes are accepted for admission to Scotland’s Diploma in Professional Legal Practice. Our Law with English Law degree is accepted for admission to England’s Legal Practice course and Bar Professional Training Course, and Northern Ireland’s Queen’s professional training course. Graduates can go on to work as a solicitor or advocate/barrister in firms, faculties or inns in the jurisdiction of their choice.

National student survey score

94% overall student satisfaction – NSS 2016.

Graduate employment statistic

98% of our graduates went on to further work or study (2014-15) – University of Aberdeen careers data.

Accreditations

Courses accredited by the Law Society of Scotland, the Faculty of Advocates in Scotland, and those with English Law also by the English Solicitors Regulation Authority.

Minimum entry requirements

SQA Highers:

AAAB/AABBB

obtained at a single sitting of highers.

Typical unconditional offer: AAAB or AABBB. Typical conditional offer: BBBB at the first sitting and either (i) AAABB or AABBBB over two sittings or (ii) ABB at Advanced Higher. Minimum of BBBB at Higher required in the first sitting. Higher English is desirable. National 5 level English required. Applicants should mention in their personal statement any circumstances which they would like considered for a departure from the typical requirements (e.g. unforeseen circumstances affecting exam performance, attendance at a low progression school).

A Levels:

ABB

More will be required of those qualifying over two sittings. English is desirable.

GCSE in English or English Language required.

ILC:

5 at H2

obtained at a single sitting. English is highly desirable.

More will be required of those qualifying over two sittings. O in English is required.

IB Points:

34 including 5, 5, 5 at HL

English is highly desirable.

Advanced entry - Direct entry to second year classes is not possible.

LLB in Law with a business-related subject: Accountancy, Business Management, Economics

LLB in Law with Music (additional entrance requirements apply)

For a comprehensive list of our Law options, visit abdn.ac.uk/ug/law
Legal Studies

Although not providing a degree which is qualifying for practice, this degree allows students to combine Legal Studies with a wide range of other subjects and is an attractive degree for students who wish to study law with another subject. The combination of analytical and intellectual skills you will develop will make you a very attractive graduate with wide career options. Law is concerned with the legal rules by which society is regulated, and the legal system(s) in which these rules operate. It is often seen as a purely vocational subject for those who wish to become lawyers, but law is interesting in its own right: a society’s laws and legal system are a product of historical, social, political and economic forces and, accordingly, the study of law gives an insight into the nature of society itself. The study of law also fosters important academic qualities including clear, careful and independent thought.

Please note that students who wish to enter legal practice should refer to the Law subject page on page 146.

Why choose Aberdeen?

- Legal Studies at Aberdeen gives you the benefit of studying a range of fascinating subjects in our highly-regarded Law School.
- Although you won’t be accredited to enter the legal profession, you will gain valuable knowledge of legal systems and important academic qualities that are greatly valued by employers.
- What makes Legal Studies at Aberdeen especially attractive is the breadth of courses, the user-friendly materials you will use and the experts who will teach you.
- The intellectual skills you will develop through a Legal Studies degree will include thinking critically, analysing and solving complex problems and presenting arguments in a clear, reasoned and logical manner – all attributes greatly sought by employers.

More course information at www.abdn.ac.uk/ug/legal-studies

Example degree structure

Course information is provided for guidance only and is subject to change.

Core or compulsory courses at time of going to print include:
- Academic Writing for Law

ABERDEEN
INSPIRED.

Our Law School is now ranked 12th in the UK – Complete University Guide 2017.
Our programmes

Marine Biology

In Marine Biology you learn about the diversity of sea life, from the smallest plankton to the largest marine mammals, and investigate their evolution, physiology, ecology and management. You study a range of marine habitats, including sandy beaches, rocky shores, mudflats and estuaries, open ocean and the deep sea, in field and lab-based practical work. This programme provides you with a strong foundation in biological sciences, principles and methodologies, while providing you with expertise in marine science.

Why choose Aberdeen?

• We are recognised internationally for our marine research on the deep sea, harbour seals and dolphins, seabird ecology, fisheries management, fish and shark biology, and marine protected areas.
• In your final year project you benefit from access to our specialist facilities, field stations and research vessels.
• Our programme is rich in hands-on practical sessions, where you work directly with organisms, analyse samples, and develop both technical and generic skills useful for a career in biology.
• Our links with professional and industrial partners, such as Marine Scotland in Aberdeen, The Scottish Association for Marine Sciences in Oban and The North Atlantic Fisheries College Marine Centre in Shetland, mean that you benefit from exposure to policy-makers, practitioners and regulatory professionals – many students take advantage of our collaborators’ facilities and expertise for their research projects or placements.
• You will have the opportunity to get involved in our research through summer research assistantships, project work and a compulsory final year research project.
• At our regular careers events you will have the opportunity to listen to and meet prospective employers from outside the University, giving you excellent opportunities to get a fulfilling and challenging job in a biological field.

Example degree structure

Course information is provided for guidance only and is subject to change. Core or compulsory courses are shown which are correct at the time of going to print.

Year 1

• Professional Skills Part 1
• Frontiers in Biological Sciences
• Diversity of Life 1 and 2
• Ecology and Environmental Science
• The Cell

Year 2

• Genes and Evolution
• Biological Enhanced Skills Training (BEST)
• Ecology
• Principles of Animal Physiology
• Ocean Biology
• Zoology Field Course

Year 3

• Statistical Analysis of Biological Data
• Animal Evolution and Biodiversity
• Animal Population Ecology
• Marine Ecology and Ecosystems
• Environmental Physiology
• Applied Marine Biology, Fisheries and Aquaculture

More course information at
www.abdn.ac.uk/ug/bio-env-sciences
Year 4
You will carry out a research project as well as writing an extended essay and completing advanced courses of your choosing.

University league rankings
21st in the UK for Biomedical Sciences – Complete University Guide 2017.

Career development
Many career possibilities are open to graduate Marine Biologists. Employers include fisheries’ laboratories, governmental and non-governmental conservation organisations, local government, environmental protection agencies and research bodies. There is a growing demand for marine specialists and a variety of companies have arisen as marine legislation and regulations increasingly require rigorous environmental audit and monitoring. There are also opportunities in environmental education.

Recent graduate job roles have included:
- Laboratory Technician
- Offshore Photographer
- Project Assistant
- Research Assistant
- Study Abroad Ambassador
- Technical Administrator

Recent graduate employers
- Aker Solutions
- DNV
- Imperial College London
- Oilcareers.com
- University of St Andrews

Minimum entry requirements

BSc Marine Biology

National student survey score
97% of students said staff are good at explaining things – NSS 2016.

Graduate employment statistic
95% of graduates go on to work and/or study within six months – UNISTATS 2016.

Accreditations
Accredited by the Royal Society of Biology.

“I could not be happier with my choice of university. The staff are amazing and so helpful. I’d also encourage all new students to join societies. I’m a part of the Zoology and Biological Sciences societies.”

Nora Hoog, Marine Biology graduate.
Our programmes

Mathematics

Mathematics is not just about crunching numbers – it is about solving problems and looking for opportunities. Employers are keen to recruit mathematicians because they can think logically and analyse new developments in business, commerce or technology: opening up opportunities, especially in the financial sector, computing and information technology, geophysics and data analysis.

Why choose Aberdeen?

• You have the weight of history behind you: Mathematics has been taught here since 1495.
• You will benefit from smaller class sizes (approximately 25 in honours years) and friendly, approachable staff.
• We engage you with a challenging syllabus, emphasising rigour, taught by leading researchers.
• Our notable former staff include Colin Maclaurin and James Clerk Maxwell.

Example degree structure

Course information is provided for guidance only and is subject to change. Core or compulsory courses are shown which are correct at the time of going to print.

Year 1

• Calculus I and II
• Algebra
• Set Theory
• Professional Skills Part 1

Year 2

• Linear Algebra I and II
• Analysis I and II

Year 3

• Group Theory
• Metric and Topological Spaces
• Rings and Fields
• Analysis III and IV
• Differential Equations

Year 4

• Galois Theory
• Number Theory
• Project

Optional courses at time of going to print include:

Our programmes

Medicine MBChB

Our modern, dynamic and clearly delivered MBChB uses a systems-based, integrated approach. Our curriculum is constantly reviewed and updated in response to changing General Medical Council (GMC) guidance, scientific and medical advances, changes in healthcare delivery and changes in educational theory and practice. Student feedback is highly encouraged.

Why choose Aberdeen?

You will find an exciting range of clinical attachments on offer at Aberdeen, both locally and across the Highlands and Islands. Most clinical teaching takes place at the Medical School and its main teaching hospitals (Aberdeen Royal Infirmary, Aberdeen Maternity Hospital, Royal Aberdeen Children's Hospital, Royal Cornhill Hospital and Woodend Hospital), all situated on or near the magnificent Foresterhill site, which is one of the largest clinical and teaching hospital campuses in Europe. The hospitals incorporate the full range of clinical facilities required for the population of the north-east of Scotland.

The Medical School has very close links with other clinical units in Grampian and the Highlands and Islands, in particular Dr Gray’s Hospital, Elgin and Raigmore Hospital, Inverness, and all students undertake hospital-based clinical placements outside Aberdeen. The Inverness campus at Raigmore Hospital is the gateway to healthcare delivery in the Highlands and Islands of Scotland where our students are able to utilise the splendid facilities of the clinical skills centre in the Centre for Health Science.

In addition, our extensive network of teaching general practices around Scotland also give students opportunities to experience patient care in many different community settings.

- Fully equipped clinical skills centres. The Suttie Centre for Teaching and Learning in Healthcare in Aberdeen and the Centre for Health Science in Inverness provide superb facilities. They allow Anatomy and Clinical Skills teaching to be co-located, giving students the opportunity to integrate and consolidate anatomical structure and function with clinical knowledge as they progress through the MBChB curriculum. Both Centres allow students to learn in the same environment as healthcare staff and to continue to develop their knowledge and skills after graduation.

- Early patient contact. You will work with our Patient Partners right from the very start of the programme and clinical attachments begin in year 1.

- The Clinical Skills Centre. The Centre provides modern facilities with the latest simulation technology designed to assist in the delivery of clinical teaching and skills in a safe and supported environment.

- A state of the art anatomy facility. The facility is designed and built to fit perfectly with the systems-based medical curriculum.

- The Medical Humanities Student Selected Component (SSC). The SSC in year 3 gives you an opportunity to acquire an alternative ‘take’ on medicine and/or health, sickness or disability, which is not provided by the mainstream medical curriculum.

- Intercalated honours degree. Medical students have the opportunity to enhance their skills and knowledge by undertaking a one year intercalated honours degree in Medical Science or Medical Humanities.

- Unique opportunities. Placements in the remote and rural areas of northern Scotland provide our students with fantastic, unique opportunities to experience healthcare in a variety of rural settings.

- Go abroad. The eight week elective project in year 5 allows you the opportunity to be completely independent in deciding where in the world you would like to go to study any aspect of medicine of particular interest.

More course information at www.abdn.ac.uk/medicine
Example degree structure

Course information is provided for guidance only and is subject to change.

Year 1

You will be provided with the knowledge and understanding of medical sciences and the disease processes that underpin medicine. The systems-based course commences in term 2. Here we use clinical cases to act as a focus for teaching. This means we teach you about the appropriate anatomy, physiology and biochemistry of each of the body systems as they are explored, as well as the disease processes that disorganise normal structure and function within each system.

Year 2

The systems-based teaching and the foundations of primary care continue to develop in year 2 where you continue to increase your knowledge and skills. A second four-week SSC will be undertaken, focussing on molecular mechanisms of disease. You will also experience a wide variety of weekly clinical attachments working alongside and shadowing various members of the multi-disciplinary hospital team.

Year 3

The study of the systems and the foundations of primary care course are completed in year 3. The SSC in third year provides a unique opportunity to study Medical Humanities for a six week module. A wide range of subjects will be available for students to choose from. In year 3, bi-weekly clinical attachments continue and, by the end of the year, you will be able to perform a complete head-to-toe examination of your patients.

Year 4

In year 4, students develop their diagnostic and management skills. Students undertake nine five-week clinical blocks during which they experience many different clinical areas and disciplines. At least one of these clinical blocks will be undertaken in Inverness. However, students may choose to undertake the Remote and Rural option for all the blocks in year 4.

Please note that the information described previously is the current course structure. The year 4 curriculum is currently under review and from 2018/19 a new curriculum will be delivered. Further information will be published as soon as it is available - www.abdn.ac.uk/smmssn/undergraduate/medicine/curriculum-overview

Year 5

This is very much the apprentice year where students prepare for the competent, safe, effective and professional practice of medicine as a doctor. All final year students complete student assistantships in their medical, surgical and GP/psychiatry attachments. The focus of the placement is to learn what is required post-graduation when you will be working as a foundation doctor.

National student survey score

97% overall student satisfaction – NSS 2016.

Graduate employment statistic

99% of graduates go on to work and/or study within six months – University of Aberdeen careers data 2016.

Accreditations

General Medical Council

ABERDEEN
INSPIRED.

Ranked 7th in the UK for Medicine –
Career development

At the end of the undergraduate programme you will receive your MBChB degree, which is a primary medical qualification (PMQ). Holding a PMQ entitles you to provisional registration with the GMC, subject only to its acceptance that there are no Fitness to Practise concerns that need consideration. Provisional registration is time limited to a maximum of three years and 30 days (1125 days in total). After this time period your provisional registration will normally expire.

Provisionally registered doctors can only practise in approved Foundation Year 1 posts: the law does not allow provisionally registered doctors to undertake any other type of work. To obtain a Foundation Year 1 post you will need to apply during the final year of your undergraduate programme through the UK Foundation Programme Office selection scheme, which allocates these posts to graduates on a competitive basis. All suitably qualified UK graduates have found a place on the Foundation Year 1 programme, but this cannot be guaranteed (for instance, if there were to be an increased number of competitive applications from non-UK graduates).

Successful completion of the Foundation Year 1 programme is normally achieved within 12 months and is marked by the award of a Certificate of Experience. You will then be eligible to apply for full registration with the GMC. You need full registration with a licence to practise for unsupervised medical practice in the NHS or private practice in the UK.

Although this information is currently correct, students need to be aware that regulations in this area may change from time to time.

The NHS National Health Careers (www.healthcareers.nhs.uk) and NES Scottish Medical Training (www.scotmt.scot.nhs.uk/foundation) websites contain lots of valuable information to assist you in planning your medical career.

Minimum entry requirements

Competition for places to study Medicine each year is extremely high. We strongly advise you to find out more about the academic and non-academic requirements for Aberdeen by visiting www.abdn.ac.uk/medicine

Achievement of the minimum academic requirements allows an application to be considered for selection – it offers no guarantee of success. The majority of successful candidates normally achieve the minimum academic requirements or better at the first sitting. We do not normally consider applicants who are re-sitting their examinations to upgrade results unless very exceptional extenuating circumstances at the time of the first sitting have been immediately disclosed and subsequently verified.

All applicants must hold a Standard Grade pass at 2, or National 5 pass at B, or GCSE level pass at B (or equivalent) in the following subjects: English Language and Mathematics.

Candidates whose first language is not English must also achieve an IELTS overall score of 7.0 with a minimum of 7.0 in the speaking section.

Scottish Qualifications (SQA)

Five full academic courses to be taken at one sitting are the normal SQA entry requirements. Normally the minimum grades to be considered are AAAAB.

Chemistry is required, plus two from Biology/Human Biology, Mathematics and Physics, plus two other subjects. Five programmes of study are required to demonstrate breadth and volume, in order to cope with the academic demands and rigour of Medical School.

Applicants should check with the medical admissions office if clarification is required.

There is no requirement, and therefore no advantage given, to obtaining the three sciences required in one sitting. Maths is regarded as a science.

Applicants only attempting four Highers owing to school policy or personal difficulties are normally required to achieve AAAA at the first sitting.

More course information at www.abdn.ac.uk/medicine
The Admissions Committee will not normally consider applications to Medical School directly from year 5. Candidates who have achieved the entrance requirements, i.e. five full academic courses at AAAAB or better in S5, may choose to continue their studies in S6 and are free to choose a programme of study which is of particular interest to them, noting that we expect candidates to engage fully with an S6 programme of study and that Higher Biology will prove useful.

Candidates who do not meet the requirements in S5 may be considered but must offer an appropriate programme of study in S6 and advice should be sought. For extensive information on entry criteria, please visit [www.abdn.ac.uk/medicine](http://www.abdn.ac.uk/medicine)

Please note that any offer of a place made to an applicant undertaking S6 studies will be a conditional offer. Each application is considered individually when setting these conditions, but a typical condition is BBB.

**General Certificate of Education (GCE)**

3 A Levels at AAA. Chemistry is required plus at least one from Biology, Mathematics or Physics, plus one other subject.

**Irish Leaving Certificate Ardteistimeireacht (ILC)**

6H at AAAAA obtained at a single sitting of Hs. Chemistry is required, plus two from Biology, Mathematics and Physics.

Three Higher Level subjects at Grade H1 to include Chemistry, Biology and one other subject and three Higher Level subjects at Grade H2 including English and either Maths or Physics, plus one other subject.

Grade B or better is required in English, Maths and Science in the Irish Junior Certificate (Higher Level).

**International Baccalaureate (IB)**

3 subjects at HL at grade 6 or better. (including Chemistry), plus 3 other subjects at an average of 6 (including two additional sciences – Maths, Biology or Physics, with at least one at HL) – i.e. at least 36 points overall, to exclude points for TOK and bonus points. Candidates with a minimum of two 7s in HL subjects, who do not meet our Standard Level requirements, may be considered.

**UK Clinical Aptitude Test (UKCAT)**

The University of Aberdeen Medical School, along with most other UK medical schools, uses the UK Clinical Aptitude Test (UKCAT) to help select applicants for the undergraduate medical programme. All candidates must complete the UKCAT by the appropriate closing date for that year’s entry. For more information, visit [www.ukcat.ac.uk](http://www.ukcat.ac.uk)

**Transfers from other degrees**

Transfer of students from another degree course into Medicine is not normally considered. Undergraduates enrolled in other degree programmes are advised to complete their current degrees and apply as graduates.

Based on one of the largest health campuses in Europe, on-site facilities include a large teaching hospital, paediatric and maternity hospitals, which means that you will have access to and be taught by experienced clinicians who are at the forefront of modern clinical practice.
Our programmes

Microbiology

Microbiology is the study of bacteria, yeasts and viruses at the level of protein and gene (molecular biology), at the level of the cell (cell biology and physiology), and at the level of the microbial community.

Why choose Aberdeen?

- Integrated teaching provision in the allied subject areas of Biochemistry, Genetics and Immunology.
- Microbiology at Aberdeen is taught by a range of world-leading microbiologists based in the Institute of Medical Sciences, a dedicated research facility.
- Among the University’s Microbiologists are members of the Aberdeen Fungal Group, the largest centre for medical mycology in the UK and one of the largest in the world.
- You will have opportunities for gaining (paid) experience in industry.

Example degree structure

Course information is provided for guidance only and is subject to change. Core or compulsory courses are shown which are correct at the time of going to print.

Year 1

- Introduction to Medical Sciences
- The Cell
- Chemistry for the Life Sciences 1 and 2
- Professional Skills Part 1

Year 2

- Genes and Evolution
- Molecular Biology of the Gene
- Foundation Skills for Medical Sciences
- Energy for Life
- Microbes, Infection and Immunity
- Research Skills for Medical Sciences

Year 3

- Molecular Biology of the Cell
- Molecular Microbiology

Year 4

- Honours Microbiology Option 1 and 2
- Honours Advanced Molecular Biology
- Microbiology Honours Research Project

Single honours

BSc Microbiology
MSc Microbiology with Industrial Placement (for entry requirements see page 59)

Professor Alexander Ogston discovered Staphylococcus aureus in Aberdeen. This discovery led to major understanding of treatment and infection control methods globally.
Molecular Biology

Molecular biology is one of the great successes of 20th Century science. It has revolutionised our understanding of biology over the last half-century, culminating in the determination of the complete human genome sequence. Recent innovations in molecular biology include the technology behind genome engineering, which will have broad and lasting impacts on biology and medicine.

Why choose Aberdeen?

- You will receive teaching in the cutting edge fields of genome analysis and bioinformatics through the Centre of Genome-Enabled Biology and Medicine at the University.
- The programme has a strong emphasis on medical and human genetics.
- Opportunities for gaining (paid) experience in industry are available to you throughout the degree programme.

MSci Molecular Biology with Industrial Placement (for entry requirements see page 59)

Aberdeen is ranked 9th in the world and 5th in Europe for its international research collaboration in Biomedical and Health Sciences (Leiden Ranking 2015).
Music

Music at Aberdeen gives you a wonderful opportunity to learn, compose and perform with world-renowned composers, musicologists and researchers working in a range of genres, styles and periods. You will benefit from first-class facilities, have unrivalled opportunities to grow as a musician, performer and scholar and be part of a the vibrant musical scene in north-east Scotland. Students can specialise in composition, performance, musicology, teaching music in secondary schools or working with music in community settings.

Why choose Aberdeen?

- Academic staff who are internationally recognised in composition and musicology.
- Wonderful collection of historic instruments including a 1771 Kirkman harpsichord, a full Balinese Gamelan, steel pans and an Aubertin pipe organ.
- A flexible degree enabling our students to find a balance of musical knowledge, compositional technique and performance skills.
- A wide range of performance opportunities in orchestras, choirs and ensembles.
- Prestigious music prizes and a range of scholarships and special support for outstanding students.

Example degree structure

Course information is provided for guidance only and is subject to change. Core or compulsory courses are shown which are correct at the time of going to print.

Year 1
- Key Moments 1 and 2
- Performance 1 and 2
- Professional Skills Part 1

Year 2
- Introduction to Musicology
- Analysing Music

Year 3
- Introduction to Research

Year 4

In year 4 you will write a dissertation, with a further 90 credit points from courses in Music such as Baroque Opera, English Musical Renaissance and Voice and the Machine.

Entry to honours programmes

Students apply for entry to BMus Single Honours and BMus Music & Communities programmes during the second year of study. While students apply for the BMus Education course at the point of entry to the University, admission to this degree is only finalised during the third year of study. Entry to BMus with Honours depends on satisfactory progress during core study years prior to this. Entry to the BMus with Honours (Education) programme involves an interview and assessment of keyboard skills, and candidates must meet the GTCS requirements which include SQA Higher/ESOL grade award at band C or above in English, or a National Course award at Higher Level at C or above in English and Communications (or equivalent) and National 5 Mathematics or equivalent.

More course information at
www.abdn.ac.uk/ug/music
A Protection of Vulnerable Groups (PVG) check will be conducted for those students choosing the BMus (Education) programme during their third year. Entry to the BMus with Honours (Music and Communities) takes place after an interview and assessment of musicianship. Music can also be studied as minor honours in the MA - relevant MA entry requirements are applicable. See table on page 50 for more information.

Recent graduate job roles

Choir Director, Community Learning and Development Worker, Music Director, Professional Performer, Secondary School Teacher, as well as further higher education studies at leading universities across the world.

Recent graduate employers

Aberdeen and Aberdeenshire Council, Chester Novello Music Publishers, Classic FM, Ocean Youth Trust, Royal Central School of Speech and Drama, Tinderbox Orchestra.

Foundation Apprenticeships

The University recognises that Skills Development Scotland, alongside other partners, is working with industry to increase the range of work-based learning opportunities for pupils in the senior phase of secondary schools. The development of Foundation Apprenticeships is one such initiative and this qualification will be considered alongside Highers across a range of degree programmes.

National student survey score

88% overall student satisfaction – NSS 2016.

**Minimum entry requirements**

Typical entry across two sittings would be ABBB.

IB Points:

**30** including at least a Grade 6 at Music at HL

*In four distinct disciplines (Music cannot be double counted). Music at Higher Grade A preferred.

**Minimum of 2 A Levels at BC, or 4 AS Levels at ABCC. Music A Level at minimum Grade B or AS Level minimum Grade A. Minimum of 3 additional GCSE passes.

Music qualifications for entry to BMus

Candidates should demonstrate musical attainment and potential. Candidates should have Grade VIII Associated Board (or equivalent) in their main instrument/voice or show great potential and intend to take Grade VIII. Musical skills are assessed at interview, at which competence on piano will need to be demonstrated. Further information about the interview process is available via www.abdn.ac.uk/ug/music. Applicants from outside the UK must also meet the above performance requirement.

Please note: for entry to the BMus (Education) with Honours programme, National 5 Maths, or Lifeskills Maths at grade C or above; or GCSE Maths at grade B or above, or equivalent, is required.

Single honours

MA French with Music Studies*
MA French with Music Studies (5 years)*
MA Hispanic Studies with Music Studies*
MA History with Music Studies*
LLB Law with options in Music*

*For entry requirements for the MA degrees see table on page 50. For LLB entry requirements see page 147.
Neuroscience with Psychology

Neuroscience is the study of nerve cells and how they work together. By unravelling the mysteries of normal brain function, Neuroscience promotes our understanding of the devastating neurodegenerative illnesses of the brain which afflict the lives of so many people.

Why choose Aberdeen?

• The University has a strong research base in Neuroscience where the behaviour of nerve cells is studied primarily at the molecular and cellular level.
• You will benefit from courses in both human and animal neuropsychology.
• The degree provides the opportunity to study courses in medical sciences, neuroscience and psychology in an integrated programme.
• Neuroscientists at Aberdeen discovered that the brain produces its own morphine-like substances (the endorphins) and made the first chemical and neuropharmacological characterisation of these substances.

Example degree structure

Course information is provided for guidance only and is subject to change. Core or compulsory courses are shown which are correct at the time of going to print.

Year 1
• Introduction to Medical Sciences
• Introductory Psychology 1 and 2
• Chemistry for the Life Sciences 1 and 2
• The Cell
• Professional Skills Part 1

Year 2
• Physiology of Human Cells
• Foundation Skills for Medical Sciences
• Advanced Psychology A and B: Concepts and Theory
• Physiology of Human Organ Systems
• Research Skills for Medical Sciences

Year 3
• Perception
• Biological Psychology
• Neurophysiology Research Topics
• Neurophysiology and Neuropharmacology
• Memory and Language

Year 4
• Brain Function and Malfunction
• Advanced Molecules, Membranes and Cells
• Developmental Neuroscience
• Physiology Research Project – the opportunity to carry out cutting-edge laboratory-based or literature-based scientific research

94% of our research is classified as world-leading or internationally excellent (REF 2014).
Pharmacology

This degree programme aims to instil a broad base of knowledge about drugs at the molecular, cellular, tissue and systems level. Additionally, you will gain an in depth understanding of selected aspects of Pharmacology, which reflect the research expertise and strengths of the School e.g. neuropharmacology, cancer and toxicology. By embedding an array of modern and relevant laboratory classes throughout, the programme also equips graduates with the skills necessary to succeed in this very practical discipline.

As part of the five-year MSci degree, you’ll undertake a year’s placement in an industrial, commercial or research environment and graduate with an undergraduate Masters degree (MSci) instead of a BSc.

Why choose Aberdeen?

- Our research-led approach delivers a modern, relevant and cutting edge programme, equipping graduates with the experience and skills required for success in pharmacology (and other) careers.
- You will receive cutting edge, applicable training and practical experience in classical pharmacology, toxicology and cell and molecular pharmacology.
- Pharmacology teaching at the University was graded ‘Excellent’ in the last Teaching Quality Assessment.
- Pharmacologists at the University of Aberdeen have been involved in fundamental scientific discoveries, such as morphine-like and cannabis-like substances in the brain.
- Award winning research on opioids and cannabinoids was carried out by world-renowned Professors Kosterlitz and Pertwee at the University.

The University has been recognised by the British Pharmacological Society as a site of special scientific interest based on its achievements in pharmacology.
Our programmes

Philosophy

Philosophy at Aberdeen is all about gaining crucial reasoning skills by addressing The Big Questions. The study of argument and how we apply it to a wide variety of questions of fundamental importance to human life and intellectual activity will be your focus. You will gain a high level of intellectual skills and experiences—rated by students as top in Scotland—which will enhance your career options.

What makes Philosophy at Aberdeen especially attractive is the breadth of courses, the user-friendly materials you will use, and the experts who will teach you. In your first year alone you will study topics such as How Should One Live?, Controversial Questions, and Experience, Knowledge and Reality. You will go on to study moral philosophy, metaphysics and epistemology (the nature of knowledge), philosophy of science and of religion, and the history of philosophy.

Why choose Aberdeen?

- The Aberdeen Philosophy in Education Group (APEG) trains students to discuss philosophical questions with local primary and secondary school pupils.
- Highly supportive learning environment led by approachable and research-active faculty.
- Famous philosophers who worked at the University include Thomas Reid, founder of the 18th Century Scottish School of Common Sense Philosophy, and Alexander Bain, who helped lay the foundations for modern scientific psychology.
- The skills you learn in Philosophy – for example, to think and write clearly, to explain complex ideas, to challenge orthodoxy – lend themselves to many careers.
- The spectacular, award-winning Sir Duncan Rice Library offers superb collections, including early printed works of natural philosophy and medicine, the archives of Thomas Reid, and records of the Aberdeen Philosophical Society.

Example degree structure

Course information is provided for guidance only and is subject to change. Core or compulsory courses are shown which are correct at the time of going to print.

Year 1

- Academic Writing for Divinity, History & Philosophy
- Professional Skills Part 1
- Experience, Knowledge and Reality
- Controversial Questions
- How Should One Live?

Year 2

- Gender Equality
- What We Are: Mind in a Physical World
- Metaphysics, Epistemology and Language

Year 3

- 90 credit points of level 3 Philosophy courses (a broad range of options including Philosophy of Time; Kant’s Critique of Pure Reason; Scepticism; Free Will and Moral Responsibility)
- 30 credits from courses of choice

More course information at

www.abdn.ac.uk/ug/philosophy
Year 4

- Philosophy Dissertation
- 60 credit points from courses of choice (a broad range of options including Sex, Race and Disability; Continental Philosophy; Metaphysics of Possibility; Contemporary Issues in Epistemology)

Joint honours

BSc Physics with Philosophy

We are 12th in the UK and 2nd in Scotland for Philosophy (Guardian University Guide 2017), and we score an impressive 93% for overall student satisfaction (NSS 2016).
Physics challenges our imaginations with concepts like relativity and string theory, and it leads to great discoveries about how the world works. Discoveries in Physics make possible technological innovations like transistors, the microchip, computers and lasers, which in turn change our lives. Physics encompasses the study of the universe from the largest galaxies to the smallest subatomic particles.

Why choose Aberdeen?

- The department of Physics at the University of Aberdeen has a long and illustrious history, and former staff include great physicists such as James Clerk Maxwell and G.P. Thomson.
- We offer a modern, modular degree structure with a broad syllabus and a wide range of degree choices.
- Long tradition of teaching physical sciences combined with modern facilities.
- Emphasis placed on teaching employability and development of generic skills, useful in a wide range of careers.
- We also offer a broad-based, less mathematical degree in Physical Sciences that allows the combination of Physics courses with a wide choice of other subjects.
- We are engaged in a wide range of research areas, from the fundamental nature of the universe through to understanding the atomic structure of complex materials and semiconductor device physics.

Example degree structure

“Physics is a tough subject but stick at it – it gets better and better as you progress each year. When you get to the end you realise you’ve barely skimmed the surface and there is so much science to still explore.”

Stella Kin, Data Analyst, graduated 2011.
Our programmes

Physiology

Physiology is the study of how the body works. It involves using an understanding of biological process at the most basic level to explain how a cell, tissue, whole organ or entire body functions.

Why choose Aberdeen?

• The programme provides you with the scientific content of pre-clinical medicine plus the opportunity to study cellular processes from the whole-body perspective.

• We are located within the Institute of Medical Sciences which allows a high degree of integration, both in research and teaching, between the medically related sciences.

• Scientists at the University of Aberdeen have made major advances in physiological sciences. These include the co-discovery of insulin and the discovery that the brain produces its own morphine-like substances – the endorphins.

• During the five-year MSci option you will undertake a year’s industrial placement in your fourth year and graduate after five years with an MSci (an undergraduate Masters degree) instead of a BSc. Placements vary considerably but, in general terms, you will be placed in an industrial, commercial or research environment where you will obtain a breadth of practical experience to complement your degree programme and enhance your employability.

Example degree structure

Course information is provided for guidance only and is subject to change. Core or compulsory courses are shown which are correct at the time of going to print.

Year 1
• Introduction to Medical Sciences
• Chemistry for the Life Sciences 1 and 2
• The Cell
• Professional Skills Part 1

Year 2
• Physiology of Human Cells
• Molecular Biology of the Gene
• Foundation Skills for Medical Sciences
• Physiology of Human Organ Systems
• Energy for Life
• Research Skills for Medical Sciences

Year 3
• Integrative Physiology
• Cardiovascular Physiology and Pharmacology
• Neurophysiology and Neuropharmacology
• Epithelial Physiology

Year 4
• Advanced Molecules, Membranes and Cells
• Staying Alive – Adaptation in Physiological Systems
• Physiology Research Project
• The Science of Ageing - From Cradle to Grave
• Developmental Neurosciences

Physiology has been taught at Aberdeen since 1593! This heritage has given the subject incredible depth and excellence.
Our programmes

Plant and Soil Science

Are you interested in the complexity, fragility and potential of plants and soil? Together, plants and soil provide an essential resource for all terrestrial life. This is the only degree programme in the UK that focuses on this important and fascinating world.

Doing a Plant and Soil Science degree at the University of Aberdeen will provide you with both core and advanced understanding of this exciting subject area. The knowledge and skills that you gain could open up a world of career opportunities for you, for instance in playing a vital role in informing the debate on climate change and global food security.

Why choose Aberdeen?

• This degree combines the disciplines of plants and soils, with opportunities to specialise in plant biology at different levels from genes to ecosystems, and in soils from chemistry, microbes to global geography.

• The University of Aberdeen has a long and, in many ways, unique tradition for teaching and research in Plant and Soil Science, and is home to a large and active group of award-winning staff in this subject.

• You will have opportunity to collaborate with groups at the James Hutton Institute and SFSA who undertake applied research and policy development work informing national priorities.

• Plant and Soil Science students attend at least two residential field courses selected from our range of courses in the Cairngorms, Spain and at our own field centre at Bettyhill, on the north coast of Sutherland.

• You will have the opportunity to get involved in our research through summer research assistantships, project work and a compulsory final year research project.

More course information at
www.abdn.ac.uk/ug/bio-env-sciences

Example degree structure

Course information is provided for guidance only and is subject to change. Core or compulsory courses are shown which are correct at the time of going to print.

Year 1

• Frontier in Biological Sciences
• Diversity of Life 1 and 2
• Ecology & Environmental Science
• The Cell
• Plants and their Habitats in Northern Scotland – a summer field trip to Bettyhill in the north of Scotland
• Plus three courses of your choice

Year 2

• Biological Enhanced Skills Training
• Plants, People and the Environment
• Ecology
• Genes & Evolution
• Physical Environments
• Plus three courses of your choice

Year 3

• Statistical Analysis of Biological Data
• Global Soil Geography
• Ecosystem Processes
• Soils for Food Security
• Environmental Analysis
• Plant-Environment Interactions
• Plus two courses of your choice
Year 4

You will carry out a research project as well as writing an extended essay and completing advanced courses of your choosing.

- Honours Project
- Honours Essay
- Current Issues in Biological and Environmental Sciences
- Plus three courses of your choice

University league rankings

We were ranked 1st overall in the REF 2014 for Agriculture, Veterinary and Food Science.

Career development

Our Plant and Soil Science degree provides you with academic training and transferable skills relevant to both specialist employment and the wider biology graduate job market. The University of Aberdeen can equip you with a broad range of skills to offer employers.

Students in the School of Biological Sciences may have the opportunity to collaborate with external organisations such as the James Hutton Institute or the Scottish Food Security Alliance, for example whilst undertaking an honours project. Students also work as volunteers in the Cruickshank Botanical Gardens. Such links allow students to become part of professional networks, which can provide opportunities for employment or postgraduate research in plant and soil science.

“...The University of Aberdeen immediately caught my attention – it had a unique programme in which soil and plant sciences are combined in a single degree. Aside from fascinating courses and projects in the herbarium, I really like field courses.”

Imelda Uwase, recent graduate.
Politics and International Relations

Politics and International Relations at Aberdeen, a unique combination in Scotland, focuses on the role of politics, power, states and governments in an ever-changing global context. Taught by internationally renowned academics who regularly appear as experts in the media commenting on events unfolding in the world today. This programme offers the perfect foundation for careers in politics, international affairs, NGOs, the media and more.

Why choose Aberdeen?

- A core curriculum with topical themes of conflict and security, representation and democracy, comparative politics and policy.
- Teaching staff with specialist expertise in political parties and elections, democracy and democratisation, energy politics, European politics, integration and regionalism, human rights, interest groups, modernity and religion, international political economy, nationalism, conflict resolution, regional international relations and security studies.
- Focus on the Middle-East, Latin America, North and South Asia, the Nordic Countries, Central and Eastern Europe – as well as Scotland, the UK and the EU.
- Opportunities to spend time studying abroad in Europe, Japan, Hong Kong or North America.
- A vibrant Politics & International Relations Society – voted Aberdeen ‘Society of the Year’ for the last three years.
- All the history and legacy of being part of a university developed over 500 years of national and international political turbulence, social change and emerging democracy.

Example degree structure

Course information is provided for guidance only and is subject to change. Core or compulsory courses are shown which are correct at the time of going to print.

Year 1

- Academic Writing for Social Sciences
- Politics & International Relations 1: Democracy and Governance
- Politics & International Relations 2: Power and Conflict
- Professional Skills Part 1

Year 2

- Ideas and Ideologies in Politics and International Relations
- Global Politics: Equality and Inequality

Year 3

- Researching in the 21st Century
- Optional courses including: International Security; The Politics of Democratic Spain; Politics & Policy in Scotland; International Peace; Nordic Politics; Political Parties in Britain; International Terrorism, Counterterrorism and International Relations; Memory and Politics of the Past.

Year 4

- Dissertation
- Optional courses including: Modern Day Latin America; Middle East Politics; The Extreme Right in Western Europe; Energy & Climate Politics; Arab-Israeli Relations; War & Peace in International Relations; Nationalism in Modern Europe; Political Islam: Islamist Ideologies and Practices; Soviet Successor States in Global Politics; Wealth, Poverty and International Order; Dirty War and its Aftermath; International Migration & Europe.

Primary Education

The School of Education at Aberdeen is recognised as a national and international centre of excellence for creative and innovative thinking and practice.

Why choose Aberdeen?

- We warmly welcome students of all ages and circumstances, with flexible, part-time, and distance opportunities available.
- Opportunities to add special interests which give further career options, including music or skills in Gaelic language.
- Opportunities to get involved in the latest research on new developments and thinking in education.
- Strong links with European teacher education institutions and schools, with the opportunity to spend a period studying abroad.

Example degree structure

Course information is provided for guidance only and is subject to change. Core or compulsory courses are shown which are correct at the time of going to print.

MA Primary Education

Year 1

- Learning How to Learn
- What Makes Us Human?
- Academic Writing for Education
- Learning How Others Learn

Year 2

- From Learning to Teaching
- Learning and Teaching In and Through the Curriculum

Year 3

- Foundations of Learning for Professional Practice at Early/First Level
- Professional Focus 1 and 2
- Developing Professional Knowledge in a Core Curricular Area 1 and 2
- Transferring Professional Knowledge into Professional Practice for Primary Education

Year 4

- Learning and Teaching in Schools: Developing Professional Practice 1 and 2
- School Experience 1: P4-7 and 2: P1-3

Selection

An interview forms part of the selection process. The information presented in the UCAS application will be used to determine whether or not an applicant is invited for interview. Performance at interview will determine whether or not an offer will be made. A Protection of Vulnerable Groups (PVG) check will be conducted prior to final acceptance.

Teaching and assessment

The Primary Education degree comprises credit rated courses. Our learner-centred approach is characterised by workshops, tutorials, seminars, self-study and lectures, supported by an online learning environment. Courses are assessed through a variety of approaches, including presentation, written assignment, portfolio and examinations. School experience is assessed in partnership with primary school teachers, head teachers and University tutors. As the programme develops, students will be expected to take increasing responsibility for determining and organising their own learning as part of their continuing professional development.

More course information at www.abdn.ac.uk/ug/education
Career development

After graduating from the programme, you will be eligible for a one-year induction training post* in a primary school in Scotland. Graduates from Aberdeen are highly valued by employers in the city, throughout Scotland and across the world.

PGDE courses for graduates

If you are a graduate wishing to apply for primary teaching training, the undergraduate degree is not applicable. An alternative route into teaching is through the one year Professional Graduate Diploma in Education (PGDE). PGDE courses in both primary and secondary education are intended for successful graduates wishing to teach. Further information about these one year courses, both of which are professionally accredited by the General Teaching Council for Scotland (GTCS) is available in the postgraduate prospectus.

Foundation Apprenticeships

The University recognises that Skills Development Scotland, alongside other partners, is working with industry to increase the range of work-based learning opportunities for pupils in the senior phase of secondary schools. The development of Foundation Apprenticeships is one such initiative and this qualification will be considered alongside Highers across a range of degree programmes.

Accreditations

The Master of Arts (MA) in Education (Hons) and Professional Graduate Diploma in Education (PGDE) programmes are accredited to the General Teaching Council for Scotland (GTCS) and allow graduates to apply for provisional registration as primary teachers.

Psychology

Are you interested in what makes people tick? Do you want to understand why people do the things they do? What happens when it goes wrong? Psychology affects all of us, and is offered as a BSc or MA degree at Aberdeen.

Why choose Aberdeen?

- Be introduced to state-of-the-art concepts and theories taught by award-winning teachers and world-class researchers, exposing you to the latest thinking in the field.
- Benefit from the School’s key strengths in social psychology, neuroscience, language, perception and industrial psychology.
- Options in year 4 allow you to specialise in areas such as clinical, forensic, language and developmental psychology.
- Gain experience using specialised laboratories and equipment, including those for brain imaging analysis, eye movement recording, movement analysis and visual neuroscience.
- We have an employability programme for our students that includes internship opportunities, online resources, career talks and networking events.
- In the final year students have the opportunity to undertake a unique research project to a professional level. A number of final year projects have gone on to be published in internationally renowned journals.

Example degree structure

Course information is provided for guidance only and is subject to change. Core or compulsory courses are shown which are correct at the time of going to print.

Year 1

- Introductory Psychology I & II: Concepts and Theory
- Introductory Psychology I & II: Methods and Applications

Real Estate

Real Estate at Aberdeen examines real estate markets from the perspectives of economics, investment and business, at Scotland’s top centre - second in the UK - for real estate teaching and research. Professionally accredited programmes prepare you for a career in surveying, with a focus on commercial real estate, investment, management, valuation and development.

Why choose Aberdeen?

- Top centre for real estate research and teaching in Scotland and second in the UK.
- Professionally accredited programmes with research-led teaching prepare you for a career in the commercial real estate industry. Focus lies on valuation, investment, portfolio management and development.
- Aberdeen student teams participate in prestigious ‘Cornell International Real Estate Competition’ in New York. In recent competition, Aberdeen students finished fourth out of seventeen universities from Australia, Canada, Hong Kong, UK and USA, scooping $1500 in prize money.
- Professional training facilities, including our virtual trading floor, integrating real activity in financial markets into our students’ courses.
- The spectacular, award-winning Sir Duncan Rice Library, providing a top-class study environment with state-of-the-art technology and a first-class collection of reference works in business and management.
- Enterprise Campus, a new offering to nurture entrepreneurial skills and support students wanting to progress their own business ideas.

“This degree provided me with a strong platform from which to launch my career in real estate banking. The emphasis on real estate as an investment asset class and the close links to the Business School allowed me to draw on other subject disciplines to contextualise real estate within the wider economic, financial and capital investment markets.”

Ben Herson, 2013 graduate, now an Associate in the Commercial Real Estate team within Lloyds Bank Commercial Banking.
Scottish Studies at Aberdeen is a wide, thorough and fascinating exploration of the languages and rich literary and cultural heritage of Scotland, taking advantage of our strength in teaching and world-leading research in English, Gaelic and History. We set Scottish culture in its historical context and you gain the skills that employers seek.

You will study widely, from Gaelic Renaissance poetry to Scottish crime fiction, and Scottish Gothic to Scotland in the modern world. You will be inspired by researchers who are international leaders in their fields, and you will enjoy close links with two major research institutes with Scottish culture at their core.

Why choose Aberdeen?

- Home to two major research institutes with Scottish culture at their core – the Research Institute of Irish and Scottish Studies and the Elphinstone Institute.
- Particular strengths in Irish and Scottish studies, Scandinavian studies, late Medieval and early modern history in Scotland and in the Celtic and Gaelic world.
- Major Scottish treasures in the Library’s Special Collections Centre, including the MacBean Stuart and Jacobite Collection of international importance, one of the best collections of the novels of Sir Walter Scott, archives of the Roman Catholic Church in Scotland and fascinating local estate records dating from the Middle Ages.
- The WORD Centre for Creative Writing, promoting creative projects in fiction, non-fiction and collaborative mixed-media in all the languages of north-east Scotland (from Doric to Polish).
- A packed programme of student and public events, exhibitions, seminars, invited speakers and the annual May Festival which welcomes internationally acclaimed authors, broadcasters and public figures to campus.

Example degree structure

Course information is provided for guidance only and is subject to change. Core or compulsory courses are shown which are correct at the time of going to print.

Years 1 and 2

Students take appropriate courses in English, Gaelic and History in their first and second years.

Years 3 and 4

Candidates for general honours in Scottish Studies, which is taught jointly by Gaelic, English and History, will follow a programme of studies to be determined in consultation with the Programme Coordinator. The candidates’ programme will include:

a) At least 60 level 3 or 4 credit points from each of Gaelic, English and History.

b) At least 60 further level 3 or 4 credit points. These will normally be from one or more of Gaelic, English and History, but up to 30 of these credit points may, with the permission of the Programme Coordinator, be from other disciplines.

c) At least 90 credit points in total must be from level 4.

d) Candidates must write a dissertation in one of the

- Scotland into the Modern World: Scottish Literature 1785-1935
- The Gaelic Novel

Career development

A degree in Scottish Studies generates opportunities across a range of employment possibilities and those fluent in Scottish Gaelic may find employment opportunities particularly good.

Broadcasting, journalism, teaching and librarianship are among the career options open to Scottish Studies graduates. The analytical, oral and written skills you develop during your studies are highly sought after by all prospective employers.

Minimum entry requirements

The spectacular, award-winning Sir Duncan Rice Library combines top-class study facilities with state-of-the-art technology, and houses extensive collections of Scottish history, languages and culture.
Our programmes

Sociology

Sociology at Aberdeen opens up your ‘sociological imagination’, as you explore how society shapes us as individuals in all sorts of ways, helping us to understand ourselves, our relationships, and the challenges we face in a changing world. Top-rated teaching and a culture of dynamic research will give you the skills to be a sought-after graduate by employers in many sectors.

Why choose Aberdeen?

• An international reputation for our Sociology research and recognised by the UK’s Economic and Social Research Council (ESRC) as an outlet for research training and supervision for postgraduate students.

• The highest possible rating of ‘Excellent’ in the latest Teaching Quality Assessment.

• Participation in the European Social Survey, one of the largest and most reliable sources of data about Europeans’ attitudes, behaviours and experiences, with data from more than 350,000 individuals across 36 countries since 2002.

• The spectacular, award-winning Sir Duncan Rice Library with its top-class study environment, state-of-the-art technology and extensive collection of sociology publications and resources.

• A packed campus programme of student and public events, lectures, café discussions, exhibitions, seminars, invited speakers, plus the annual May Festival, British Science Week and Being Human Festival attracting thousands to hear from high profile speakers, scientists, authors and broadcasters and regularly featuring Aberdeen research in social sciences.

Example degree structure

Course information is provided for guidance only and is subject to change. Core or compulsory courses are shown which are correct at the time of going to print.

Year 1

• Academic Writing Skills for Social Sciences
• Introductory Sociology 1 and 2
• Professional Skills Part 1

Year 2

• Studying Social Life 1 and 2

Year 3

• Religion and Society
• Thinking Sociologically
• Social Research Methods

Year 4

• Research Project

87% overall student satisfaction - NSS 2016.
Our programmes

Sports and Exercise Science

Sports & Exercise Science is about understanding how our bodies respond and adapt to the stresses imposed upon them during physical activity to benefit both performance and health. The MSci degree offers you the opportunity to undertake a year’s placement in an industrial, commercial or research environment and graduate after five years with an MSci (an undergraduate Masters degree) instead of a BSc.

Why choose Aberdeen?

• The programme at the University of Aberdeen is based on a strong curriculum in physiology, biochemistry and nutrition.

• The degree covers the scientific basis that underpins athletic performance, and the role of scientific support in preparing the athlete for competition.

• Sports science courses complement those in the fundamental biomedical sciences and allow students to place their knowledge in the context of sports performance and physical activity for health.

• Many scientific disciplines contribute to the sports and exercise sciences, including physiology, biochemistry, nutrition, anatomy and biomechanics.

Example degree structure

Course information is provided for guidance only and is subject to change. Core or compulsory courses are shown which are correct at the time of going to print.

Year 1

• Introduction to Medical Sciences
• Introduction to the Science of Sport, Exercise and Health
• Chemistry for the Life Sciences 1 and 2
• The Cell
• Fitness, Performance and Survival
• Professional Skills Part 1
• A further 30 credit points from Sustained Study, Discipline Breadth or Sixth Century Courses

Year 2

• Physiology of Human Cells
• The Science of Sports Performance
• Foundation Skills for Medical Sciences
• Physiology of Human Organ Systems
• Energy for Life
• Exercise and Health
• Research Skills for Medical Sciences
• A further 15 credit points from Sustained Study, Discipline Breadth or Sixth Century Courses

Year 3

• Integrative Physiology
• Clinical Exercise Physiology
• Biochemistry and Nutrition of Exercise
• A further 30 credit points from Discipline Breadth or Sixth Century Courses

More course information at www.abdn.ac.uk/ug/sports-exercise
Year 4 MSci

You will spend year 4 on placement in an industrial, commercial or research environment.

Year 4 BSc/Year 5 MSci

The final year aims to explore in-depth, specific aspects of sports science and exercise physiology. An important feature is the ten-week research project, carried out in research laboratories at the University or in local research institutes.

- Staying Alive – Adaptation in Physiological Systems
- Research Topics in Sports Science and Studies
- Exercise Physiology
- Exercise Science Project

“**I really wanted to study sports science and the degree programme at Aberdeen came highly recommended. The quality of teaching staff was second to none, providing excellent opportunities to learn and develop.**”

Julie Erskine, Exercise Physiologist, graduated 2014.
Our programmes

Theology and Religious Studies

Theology and Religious Studies includes both the study of Christian faith, life and doctrine, and the comparative study of the major and local religious traditions of the world. The study of the Christian tradition attends to its historical, cross-cultural and contemporary contexts, whereas the comparative study of world religions includes an interdisciplinary investigation and interpretation of the origin, function and meaning of religion and religious practices.

Why choose Aberdeen?

• This programme offers a wide variety of courses, from biblical languages to the Reformation in Scotland and from Buddhist philosophy to the stories of the prophets in Islam.

• Our department is host to an international community of respected scholars, studying various aspects of Theology and Religious Studies.

• You will receive a warm welcome, and have access to excellent library facilities and beautiful surroundings.

• The Theology and Religious Studies teaching staff at Aberdeen have a range of professional and academic backgrounds and you will benefit from their unique insights into their subject areas.

• By studying Theology and Religious Studies at Aberdeen, you will become part of a unique group of students who have studied at a university recognised for its tradition of theological excellence.

• At Aberdeen, you will have access to the world-class teaching and research facilities that the University offers.

• Through analysis and evaluation, you will develop a range of skills that will enable you to work in a variety of different sectors.

Example degree structure

Course information is provided for guidance only and is subject to change. Core or compulsory courses are shown which are correct at the time of going to print.

Year 1

• Academic Writing for Divinity, History and Philosophy
• Professional Skills Part 1
• Sacred Rites and Worship (15 credits)
• 45 credits from further level 1 courses in this subject area

Year 2

• Sacred Texts and Scripture (15 credits)
• 45 credits from further level 2 courses in this subject area

Year 3

• 90 credits from level 3 courses in this subject area

Year 4

• Dissertation (30 credits)
• 90 credits from level 4 courses in this subject area

• Optional courses of your choice make up the remaining credits for each term
• 120 credit points per year required
• Full list of optional courses available online

The University of Aberdeen has a tradition of study and excellence in this discipline dating back to 1495.
Our programmes

Zoology

Zoology is the study of all animal life; from primitive microscopic malaria-causing protozoa to large advanced mammals, across all environmental spheres from red deer in mountain forests to dolphins in deep oceans, and from underground burrowing voles to golden eagles in the skies. Some of these animals are useful to us and we nurture them as pets or livestock; some are serious pests or disease-causing; and some are simply splendid and awe-inspiring. No matter what our relation with the animals, we need to understand their behaviour, population dynamics, physiology and the way they interact with other species and their environments. That is Zoology!

Why choose Aberdeen?

• We are one of the few universities in Britain offering a Zoology degree and our programme is the only accredited Zoology BSc honours programme in Scotland.

• We are recognised internationally for our research on animal energetics and dietary studies; fish immunology and salmon farming; animal behaviour and hormones; conservation of UK and international wildlife; honey bee health; dolphin behaviour and shark genetics. Our breadth of expertise means your training is both broad and current and you are taught by world-leading researchers in their field.

• Our programme is rich in hands-on practical sessions. In the laboratory and on day-trips or residential field trips you work directly with organisms and samples in order to develop both technical and generic and transferable skills useful for a career in zoology or broader biology.

• Students benefit from field course teaching throughout the programme at several places in the UK and the Mediterranean. This offers real-world experience, putting classroom taught theories into context as well as skills training for future careers in zoology.

Example degree structure

Course information is provided for guidance only and is subject to change. Core or compulsory courses are shown which are correct at the time of going to print.

Year 1

• Diversity of Life 1 and 2
• Frontiers in Biological Sciences
• The Cell
• Ecology and Environmental Science
• Professional Skills Part 1

Year 2

• Genes and Evolution
• Biological Enhanced Skills Training
• Ecology
• Principles of Animal Physiology
• Zoology Field Course

Year 3

• Statistical Analysis of Biological Data
• Animal Evolution and Biodiversity
• Animal Population Ecology
• Environmental Physiology

More course information at
www.abdn.ac.uk/ug/bio-env-sciences
Year 4

You will carry out a research project as well as writing an extended essay and completing advanced courses of your choosing. Optional course choices include Parasitology, Hormones & Behaviour, Advanced Behavioural Ecology, Molecular Ecology & Evolution, Advanced Vector Biology, Topics in Conservation and Wildlife Management & Conservation.

University league rankings

Career development

Zoology courses are designed to provide a broad based set of specialist and generic skills. A considerable number of Zoology graduates continue their education by reading for higher degrees either in the UK or abroad. Graduates may also enter biology teaching or general science by taking a postgraduate diploma, and many often find full-time employment in a wide range of careers. Typical employers include universities, research institutes, Government agencies (e.g. SEPA, SNH), environmental consultancies, environmental charities including WWF & RSPB, the NHS, libraries and commercial enterprises in aquaculture, animal nutrition and animal health.

Thomson Colour Printers.
The University of Aberdeen is the fifth oldest university in the UK, dating back to 1495. Over the past 500 years, we have consistently offered life-changing opportunities for all of our students. Associated with five Nobel Prize winners, we have a proud heritage in research and teaching combined with a modern outlook. We are consistently ranked among the top 1% of the world’s universities: our knowledge and experience drive us to the cutting edge of learning excellence, delivered in modern facilities in the wonderful city of Aberdeen.
