

# Wireless Connection – Android

You can use this guide to **manually** configure an Android device to connect to the wireless service eduroam.

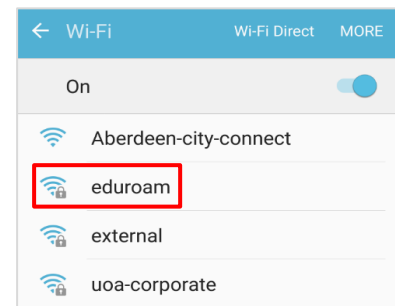

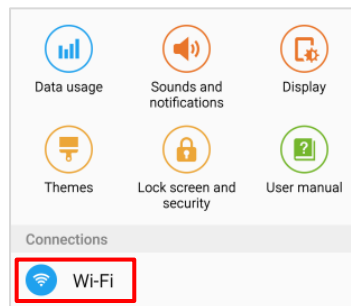

**Note:** If you have *previous* settings for eduroam press that profile and choose *Forget network*.

To ensure maximum **compatibility** and **security** with the eduroam service please **try each** of the **two automatic** online **configuration** tools **first!**:

- **SecureW2** (<http://www.abdn.ac.uk/wireless>)
- **eduroam CAT** (<https://play.google.com/store/apps/details?id=uk.ac.swansea.eduroamcat>)

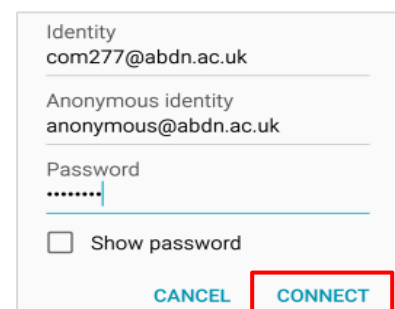

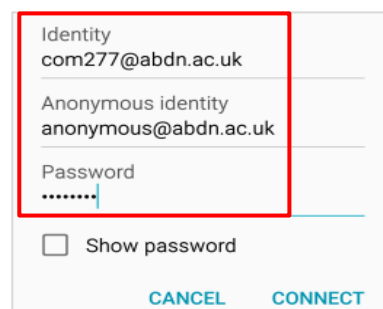

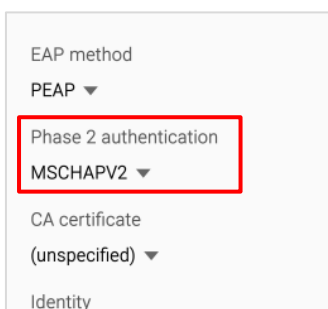

The screenshots in this guide were taken from a Samsung Galaxy S6 running Android 6.0.1. Other phone models may display different menus, options and icons. Please read instructions carefully.

1. Tap the **Settings** cog icon

2. Tap **Wi-Fi** - Make sure it is **On**

3. Select **eduroam**

4. Check that Phase 2 authentication is **MSCHAPV2**

**Plus for Android 7 & above CA certificate:**

- Use system certificates (7)
- Do not validate (8+)
- Domain: **abdn.ac.uk**

5. Under **Identity**, enter:

- Identity: **yourusername@abdn.ac.uk**  
e.g. **u99jb19@abdn.ac.uk**
- Anonymous identity: **anonymous@abdn.ac.uk**
- Password: **your University password**

6. Click **Connect**
