Wireless Connection – Android

You can use this guide to manually configure an Android device to connect to the wireless service eduroam.

To ensure maximum compatibility and security with the eduroam service please try each of the two automatic online configuration tools first:

- XpressConnect (http://www.abdn.ac.uk/wireless/xpc/)

The screenshots in this guide were taken from a Samsung Galaxy S6 running Android 6.0.1. Other phone models may display different menus, options and icons. Please read instructions carefully.

1. Tap the Settings cog icon
2. Tap Wi-Fi - Make sure it is On
3. Select eduroam

4. Check that Phase 2 authentication is MSCHAPV2

   Plus for Android 7 & above
   CA certificate:
   Use system certificates (7)
   Do not validate (8+)
   Domain: abdn.ac.uk

5. Under Identity, enter:

   - Identity: yourusername@abdn.ac.uk
     eg u01abc9@abdn.ac.uk
   - Anonymous identity: anonymous@abdn.ac.uk
   - Password: your University password

6. Click Connect
