You can use this guide to manually configure an Android device to connect to the wireless service eduroam.

To ensure maximum compatibility and security with the eduroam service please try each of the two automatic online configuration tools first:

- SecureW2 (http://www.abdn.ac.uk/wireless)

The screenshots in this guide were taken from a Samsung Galaxy S6 running Android 6.0.1. Other phone models may display different menus, options and icons. Please read instructions carefully.

1. Tap the **Settings** cog icon
2. Tap **Wi-Fi** - Make sure it is **On**
3. Select **eduroam**

4. Check that Phase 2 authentication is **MSCHAPV2**

   **Plus for Android 7 & above**
   - CA certificate: Use system certificates (7)
   - Do not validate (8+)
   - Domain: **abdn.ac.uk**

5. Under **Identity**, enter:
   - Identity: `yourusername@abdn.ac.uk`
     eg u99jb19@abdn.ac.uk
   - Anonymous identity: `anonymous@abdn.ac.uk`
   - Password:
     `your University password`

6. Click **Connect**
