Wireless Connection: Android

You can use this guide to **manually** configure an Android device to connect to the wireless service eduroam.
Note: If you have *previous* settings for eduroam press that profile and choose *Forget network*.

To ensure maximum compatibility and security with the eduroam service **please try each of the two automatic online configuration tools first!**:

– **SecureW2** (www.abdn.ac.uk/wireless)

– **geteduroam app**

The instructions and screenshots in this guide were created using a Motorola running Android 11. Other phone models may display different menus, options and icons. Please read instructions carefully.
How to manually configure   your connection

1. Access your phone's **Settings** (cog icon)
2. Tap **Wi-Fi**
   Note: you may need to tap Network & Internet/Connections or similar to see the wi-fi icon.
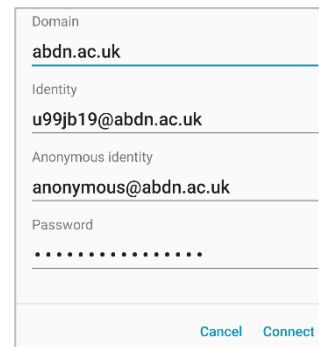

3. Tap **eduroam** in the list of available networks.

4. Set the following options:

   – EAP Method: **PEAP**

   – Phase 2 authentication: **MSCHAPV2**

   – CA Certificate: **Use system certificates**

   – Online certificate status: **leave as default setting**
     (do not verify/validate*)
     * wording is dependent on version of Android

   – Domain: **abdn.ac.uk**
- Identity: *your*username@abdn.ac.uk
  eg *u09jb99@abdn.ac.uk*

- Anonymous Identity: **anonymous@abdn.ac.uk**

- Password**: your usual University password**

- Click **Connect** or tap **tick** ✓ (depending on device)
