

Wireless Connection: iPhone

You can use this guide to **manually** configure an iPhone to connect to the wireless service eduroam.

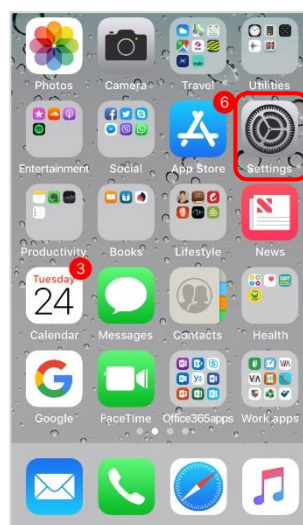

- An [automatic configuration tool SecureW2](#) is available online, try this first!¹

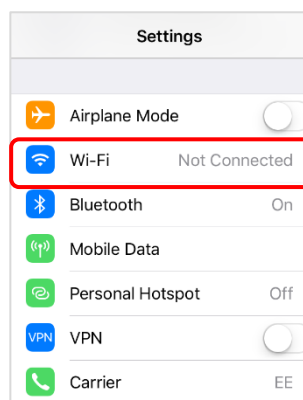

The screenshots in this guide were taken from an iPhone running version iOS 11.4. Other software versions may display different options and icons.

Set up connection

- From the Home screen, Tap Settings

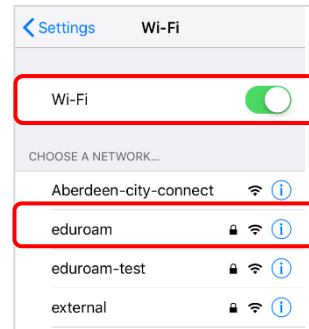

- Tap Wi-Fi

¹ Note: In later iOS versions a profile is created for Wireless connections added using SecureW2. To remove a profile, go to **Settings – General – Profile** or **Settings – General – VPN & Device Management**. Select the profile that is no longer needed or is no longer working due to a password change and choose Remove Profile.

- Ensure Wifi is set to ON
- Tap eduroam

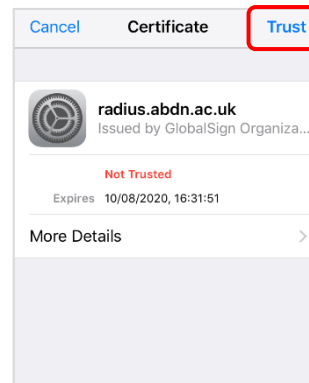

Authentication

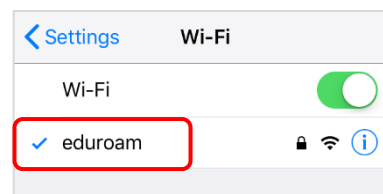

- Type in your University *username@abdn.ac.uk*
(e.g. u99jb19@abdn.ac.uk) and University Password
- Tap Join

- Wait for the Certificate prompt to be displayed
- Tap Accept to accept the certificate

- The Wi-Fi Networks screen show eduroam as connected
- Press the Home button
